SECURITIES AND EXCHANGE COMMISSION**

Washington, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2014

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____.

Commission file number: 000-54483

BankGuam Holding Company

(Exact name of registrant as specified in its charter)

Guam
(State or other jurisdiction of
incorporation or organization)

66-0770448
(IRS Employer
Identification No.)

**111 W Chalan Santo Papa
Hagåtña, Guam 96910
(671) 472-5300**

(Address, including Zip Code, and telephone number, including area code, of the registrant's principal executive offices)

Securities registered pursuant to Section 12(g) of the Act:

<u>Title of Each Class</u>	<u>Name of Each Exchange on which Registered</u>
Common Stock, \$0.2083 par value	None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registration was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K, or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	<input type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/>	Smaller reporting company	<input checked="" type="checkbox"/>

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the voting stock held by non-affiliates of the Registrant was \$44,018,700 based on the number of shares held by non-affiliates of the registrant as of March 17, 2015, and based on the closing sale price of common stock on June 30, 2014, which is the last business day of the registrant's most recently completed second fiscal quarter. This calculation does not reflect a determination that persons are affiliates for any other purposes.

Number of shares of common stock outstanding as of March 17, 2015: 8,928,648.

Documents Incorporated By Reference

Portions of the registrant's proxy statement related to its 2015 annual stockholders' meeting are incorporated by reference into Part III of this Annual Report on Form 10-K where indicated.

Cautionary Note Regarding Forward-Looking Statements

For purposes of this Annual Report, the terms the “Company,” “we,” “us” and “our” refer to BankGuam Holding Company and its subsidiaries. This Annual Report on Form 10-K contains statements that are not historical in nature, are predictive in nature, or that depend upon or refer to future events or conditions or contain forward-looking statements within the meaning of Section 21 of the Securities Exchange Act of 1934, as amended, and the Private Securities Litigation Reform Act of 1995. These include, among other things, statements regarding:

- Competition for loans and deposits and failure to attract or retain deposits and loans;
- Local, regional, national and global economic conditions and events, and the impact they may have on us and our customers, and our assessment of that impact on our estimates, including the allowance for loan losses;
- Risks associated with concentrations in real estate related loans;
- Changes in the level of nonperforming assets and charge-offs and other credit quality measures, and their impact on the adequacy of our allowance for loan losses and our provision for loan losses;
- The effects of and changes in trade, monetary and fiscal policies and laws, including the interest rate policies of the Federal Open Market Committee of the Federal Reserve Board;
- Stability of funding sources and continued availability of borrowings;
- The effect of changes in laws and regulations with which the Company and Bank of Guam must comply, including any increase in Federal Deposit Insurance Corporation insurance premiums;
- Our ability to raise capital or incur debt on reasonable terms;
- Regulatory limits on Bank of Guam’s ability to pay dividends to the Company;
- The impact of the Dodd Frank Wall Street Reform and Consumer Protection Act;
- The effect of changes in accounting policies and practices, as may be adopted by the regulatory agencies, as well as the Public Company Accounting Oversight Board, the Financial Accounting Standards Board and other accounting standard setters;
- Changes in the deferred tax asset valuation allowance in future quarters;
- The costs and effects of legal and regulatory developments, including resolution of legal proceedings or regulatory or other governmental inquiries, and the results of regulatory examinations or reviews;
- The ability to increase market share and control expenses; and,
- Our success in managing the risks involved in the foregoing items,

as well as other statements regarding our future operations, financial condition and prospects, and business strategies. Forward-looking statements may be preceded by, followed by or include the words “expects,” “anticipates,” “intends,” “plans,” “believes,” “seeks,” “estimates,” “will,” “is designed to” and similar expressions. We claim the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995 for all forward-looking statements. We have based these forward-looking statements on our current expectations and projections about future events. These forward-looking statements are subject to risks, uncertainties and assumptions about our business that could affect our future results and could cause those results or other outcomes to differ materially from those expressed or implied in the forward-looking statements. Factors that might cause or contribute to such differences include, but are not limited to, those discussed in “Risk Factors” included elsewhere in this Annual Report and as may be updated in filings we make from time to time with the U.S. Securities and Exchange Commission (SEC), including our other Quarterly Reports on Form 10-Q to be filed by us in our fiscal year 2015. We have no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or risks, except to the extent required by applicable securities laws. If we do update one or more forward-looking statements, no inference should be drawn that we will make additional updates with respect to those or other forward-looking statements. New information, future events or risks could cause the forward-looking events we discuss in this Annual Report not to occur. You should not place undue reliance on these forward-looking statements, which reflect our opinions only as of the date of this Annual Report.

PART I

ITEM 1. Business

General

BankGuam Holding Company (the “Company”), a Guam corporation organized in 2011, is a bank holding company registered under the Bank Holding Company Act of 1956, as amended. We provide a wide range of banking services through Bank of Guam, our wholly-owned subsidiary and principal asset (the “Bank”).

The Bank is a regional community bank that was organized in Guam, a United States flag territory, in 1972. The Bank offers a full range of banking services to consumers, businesses and governments. We lend in all markets where we have a physical presence through our branch network. We attract deposits throughout our market area with a customer-oriented product mix, competitive pricing and convenient locations. We offer a wide range of financial products for commercial and retail banking and a multitude of other products and services to complement our lending and deposit services, including trade financing, trust and retail investment services. We also offer insurance through a series of agency arrangements.

Bank of Guam

The Bank is a Guam-chartered bank headquartered at 111 West Chalan Santo Papa in Hagåtña, Guam 96910. It was incorporated in March 1972 and opened for business in December of that year. We operate through 23 full service branch offices, including 12 in Guam; two in Saipan and one each in Tinian and Rota, all in the Commonwealth of the Northern Mariana Islands; one in the Republic of Palau; one each in the states of Yap, Chuuk, Pohnpei and Kosrae in the Federated States of Micronesia; one in the Republic of the Marshall Islands; and one in San Francisco, California.

The Bank’s business strategy has been to emphasize and support economic growth and development in and among the U.S.-affiliated islands in the western Pacific Ocean. To accomplish this goal, the Bank offers competitively-priced deposit and loan products and other financial services that are primarily tailored to the needs of consumers, small businesses and government entities. Although the needs of our customers in a small, remote island environment can be particularly challenging for a community bank, we have succeeded in providing a broad range of services, such as trade financing and corporate trust services, that are typically provided only by much larger, money center institutions.

Our lending products include commercial, real estate, construction, consumer and Small Business Administration-guaranteed loans. We also provide home mortgage and home equity loans. Commercial loans and industrial loans comprise the largest portion of the Bank’s loan portfolio. Residential mortgage loans comprise the second largest portion of the Bank’s loan portfolio.

We offer a wide range of deposit products for retail and business banking markets including checking accounts, interest-bearing transaction accounts, savings accounts, time deposits and retirement accounts. Our branch network enables us to attract deposits from throughout our market area with a customer-oriented product mix, competitive pricing and convenient locations.

In addition, correspondent bank deposit accounts are maintained to enable the Bank to transact types of activity that it would otherwise be unable to perform or would not be cost effective due to the size of the Bank or the volume of activity. The Bank has utilized several correspondent banks to process a variety of transactions. The Bank also provides a multitude of other products and services to complement our lending and depository services. These include wire and Automated Clearing House transfers, cashier’s checks, traveler’s checks, corporate and consumer credit cards, bank-by-mail, ATMs, night depositories, safe deposit boxes, direct deposit, electronic funds transfers, online banking and bill payments, merchant services, check imaging, and other customary banking services. We currently operate ATMs at eighty-six locations.

The Bank has a trust department, primarily engaged in corporate trust services under indenture. In addition to the traditional financial services offered, the Bank offers credit life, health, auto and homeowners insurance through its subsidiary, BG Insurance, and wealth management services in collaboration with its affiliate, Money Concepts.

Competition

Banking and the financial services industry in Guam are highly competitive. The market is dominated by the Bank, two of Hawaii’s largest banks and a locally-organized federal credit union. Also, as a result of the U.S. military presence as a longtime employer, military credit unions have physical branches at the island’s main military facilities. The Bank’s presence in the remaining areas of the western Pacific is less competitive, and in many cases the Bank remains the dominant financial services organization in the islands. In the San Francisco Bay area, where the Bank has had a branch office since 1983, the Bank’s California division primarily focuses its lending efforts on owner-occupied commercial real estate and commercial investor properties. The division provides financing to hotels, gasoline service station, apartments, office and retail space, and residential care homes for the elderly and disabled, and also

works closely with selected banks in loan participations. Framing this environment is the increasingly competitive setting as a result of regulatory, technological and product delivery systems changes.

Larger banks have a competitive advantage because of global marketing campaigns and U.S. name recognition. They also offer extensive international, trade finance and discount brokerage services that the Bank is not currently prepared to provide. To compensate for this, the Bank has arrangements with correspondent banks and other financial institutions to deliver such services to its customers.

To compete with other financial institutions in its service area, the Bank relies principally on local media as well as personal contact by directors, officers and employees with existing and potential customers. The Bank emphasizes to customers the advantages of dealing with a locally-owned and managed community-oriented institution. Because decisions are made locally by people who are intimately familiar with the economy, the legal structure and the developmental needs of the islands, the Bank is able to respond more quickly and effectively to customer needs than are many of its competitors. The Bank also provides local service and timely decision-making for small businesses and local governments.

The financial services industry continues to undergo rapid technological changes involving the frequent introductions of new technology-driven products and services that have further increased competition. The Bank often adopts these new technologies and products ahead of its competitors, but there is no assurance that these technological improvements, if made, will increase the Company's operational efficiency, or that the Company will be able to effectively implement new technology-driven products and services or be successful in marketing these products and services to our customers.

Employees

At December 31, 2014, the Bank had 523.5 full-time equivalent employees. The Bank's employees are not represented by any union or collective bargaining agreement, and the Bank believes its employee relations are good.

Supervision and Regulation

Recent Developments

On July 21, 2010, the President signed the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act"). This law has significantly changed the U.S. bank regulatory structure and affected the lending, deposit, investment, trading and operating activities of financial institutions and their holding companies. The Dodd-Frank Act requires various federal agencies to adopt a broad range of new implementing rules and regulations, and to prepare numerous studies and reports for Congress. The federal agencies are given significant discretion in drafting the implementing rules and regulations, and consequently many of the details and much of the impact of the Dodd-Frank Act may not be known for several more years.

Among other things, the Dodd-Frank Act requires the federal banking agencies to establish minimum leverage and risk-based capital requirements for insured banks and their holding companies. The federal banking agencies issued a joint final rule, or the "Final Capital Rule," that implements the Basel III capital standards and establishes the minimum capital levels required under Dodd-Frank. We must comply with the Final Capital Rule beginning January 1, 2015, as well as the increasingly stringent capital requirements that it will phase in through 2019. The Final Capital Rule establishes a minimum common equity Tier I capital ratio of 6.5% of risk-weighted assets for a "well-capitalized" institution and increases the minimum Tier I risk-based capital ratio for a "well-capitalized" institution from 6.0% to 8.0%. Additionally, the Final Capital Rule requires an institution to maintain a 2.5% common equity Tier I capital conservation buffer over the 6.5% minimum risk-based capital requirement to avoid restrictions on the ability to pay dividends, discretionary bonuses, and engage in share repurchases. The Final Capital Rule also increases the required capital for certain categories of assets, including high-volatility construction real estate loans, but retains the current capital treatment of residential mortgages. Under the Final Capital Rule, we may make a one-time, permanent election to continue to exclude accumulated other comprehensive income from capital. If we do not make this election, unrealized gains and losses will be included in the calculation of our regulatory capital. Implementation of these standards, or any other new regulations, may adversely affect our ability to pay dividends, or require us to reduce business levels or raise capital, including in ways that may adversely affect our results of operations or financial condition.

It is difficult to predict at this time what other specific impacts the Dodd-Frank Act and the yet-to-be-written implementing rules and regulations will have on community banks. However, it is expected that, at a minimum, they will increase our operating and compliance costs.

Introduction

Banking is a complex, highly regulated industry. The primary goals of the regulatory scheme are to maintain a safe and sound banking system, protect depositors and the FDIC insurance fund, and facilitate the conduct of sound monetary policy. In furtherance of these goals, Congress and the states have created several largely autonomous regulatory agencies and enacted numerous laws that govern banks, bank holding companies and the financial services industry in general. Consequently, the growth and earnings performance of the Bank can be affected not only by management decisions and general economic conditions, but also by the requirements of applicable state and federal statutes, regulations and the policies of various governmental regulatory authorities, including the Federal Reserve Board, FDIC, and the banking authorities of each of the jurisdictions in which the Bank operates.

The Bank's business is also influenced by the monetary and fiscal policies of the federal government and the policies of regulatory agencies, particularly the Federal Reserve Board and the FDIC. The Federal Reserve Board implements national monetary policies (with objectives such as curbing inflation and combating unemployment) through its open-market operations in U.S. Government securities, by adjusting the required level of reserves for depository institutions subject to its reserve requirements, and by varying the target Federal Funds and discount rates applicable to borrowings by depository institutions. The actions of the Federal Reserve Board in these areas influence the growth of bank loans, investments and deposits, and also affect interest earned on interest-earning assets and paid on interest-bearing liabilities. The nature and impact of any future changes in monetary and fiscal policies on the Bank are difficult to predict.

The system of supervision and regulation applicable to financial services businesses governs most aspects of the business of the Bank, including: (i) the scope of permissible business; (ii) investments; (iii) reserves that must be maintained against deposits; (iv) capital levels that must be maintained; (v) the nature and amount of collateral that may be taken to secure loans; (vi) the establishment of new branches; (vii) mergers and consolidations with other financial institutions; and (viii) the payment of dividends.

From time to time, federal and local legislation is enacted which may have the effect of materially increasing the cost of doing business, limiting or expanding permissible activities, or affecting the competitive balance between banks and other financial services providers. In addition, the various bank regulatory agencies often adopt new rules, regulations and policies to implement and enforce existing legislation. It cannot be predicted whether, or in what form, any such legislation or regulations or changes in policy may be enacted, or the extent to which the business of the Bank or the Company would be affected thereby. The Bank cannot predict whether or when potential legislation will be enacted and, if enacted, the effect that it, or any implemented regulations and supervisory policies, would have on our financial condition or results of operations. In addition, the outcome of examinations, any litigation or any investigations initiated by federal or local authorities may result in necessary changes in our operations that may increase our costs.

Set forth below is a description of the significant elements of the laws and regulations applicable to the Company and the Bank. The description is qualified in its entirety by reference to the full text of the statutes, regulations and policies that are described. Also, such statutes, regulations and policies are continually under review by the U.S. Congress and local legislatures and federal and local regulatory agencies, and, where applicable, their foreign counterparts. A change in statutes, regulations or regulatory policies applicable to the Company or the Bank could have a material effect on our business.

Regulation of BankGuam Holding Company

As a bank holding company, the Company is registered under the Bank Holding Company Act of 1956, as amended ("BHCA"), and is subject to regulation and periodic examination by the Federal Reserve Board. The Company is also required to file periodic reports of its operations and any additional information regarding its activities and those of its subsidiaries, as may be required by the Federal Reserve Board.

Federal Reserve Board regulations require bank holding companies to act as a source of financial and managerial strength to their subsidiary banks. Under these regulations, the holding company is expected to commit resources to support its bank subsidiary, including at times when the holding company may not be in a financial position to provide such support. Bank holding companies must also maintain the financial flexibility and capital raising capacity to obtain additional resources for assisting their subsidiary bank. A bank holding company's failure to meet its obligations to serve as a source of strength to its subsidiary bank will generally be considered by the Federal Reserve Board to be an unsafe and unsound banking practice, or a violation of the Federal Reserve Board's regulations, or both.

Under the BHCA, a bank holding company must obtain the Federal Reserve Board's approval before: (i) directly or indirectly acquiring more than 5% ownership or control of any voting shares of another bank or bank holding company; (ii) acquiring all or substantially all of the assets of another bank; or (iii) merging or consolidating with another bank holding company.

The business activities of the Company, as a bank holding company, are restricted by the BHCA. Under the BHCA and the Federal Reserve's bank holding company regulations, the Company may only engage in, acquire or control voting securities or assets of a

company engaged in: (i) banking, or managing or controlling banks and other subsidiaries authorized under the BHCA; and, (ii) any non-banking activity the Federal Reserve has determined to be so closely related to banking or managing or controlling banks to be a proper incident thereto. These include any incidental activities necessary to carry on those activities as well as a variety of activities that the Federal Reserve has determined to be so closely related to the business of banking as to be a proper incident thereto.

There are various restrictions on the ability of the holding company to borrow from, and engage in certain other transactions with, its bank subsidiary. In general, these restrictions require that any extensions of credit by the Bank to any single affiliate of the Bank must be secured by designated amounts of specified collateral and are limited to 10% of the Bank's capital stock and surplus, and, as to the Company and all other affiliates of the Bank collectively, to 20% of the Bank's capital stock and surplus. Federal law also provides that extensions of credit and other transactions between the Bank and the Company must be on terms and conditions, including credit standards, that are substantially the same or at least as favorable to the Bank as those prevailing at the time for comparable transactions involving non-affiliated companies or, in the absence of comparable transactions, on terms and conditions, including credit standards, that in good faith would be offered to or would apply to non-affiliated companies.

Federal law prohibits a bank holding company and any subsidiary banks from engaging in certain tie-in arrangements in connection with the extension of credit. Thus, for example, the Bank may not extend credit, lease or sell property, or furnish any services, or fix or vary the consideration for any of the foregoing on the condition that: (i) the customer must obtain or provide some additional credit, property or services from or to the Bank other than a loan, discount, deposit or trust services; (ii) the customer must obtain or provide some additional credit, property or service from or to the Company or the Bank; or, (iii) the customer must not obtain some other credit, property or services from competitors, except reasonable requirements to ensure soundness of the credit extended.

The principal source of the Company's cash revenues are dividends from its subsidiary, the Bank. The Company's earnings and activities are affected by legislation, by regulations and by local legislative and administrative bodies and decisions of courts in the jurisdictions in which we conduct business. For example, these include limitations on the ability of the Bank to pay dividends to the Company and our ability to pay dividends to our stockholders. It is the policy of the Federal Reserve Board that bank holding companies should pay cash dividends on common stock only out of income available over the past year and only if prospective earnings retention is consistent with the organization's expected future needs and financial condition. The policy provides that bank holding companies should not maintain a level of cash dividends that undermines the bank holding company's ability to serve as a source of strength to its banking subsidiary.

Regulation of the Bank

General. As a Guam-chartered bank, the Bank is subject to supervision, periodic examination and regulation by the Guam Banking Commission. As a member of the Federal Deposit Insurance Corporation, the Bank is also subject to supervision, periodic examination and regulation by the FDIC as the Bank's primary federal regulator. If, as a result of an examination, the Guam Banking Commission or the FDIC should determine that the financial condition, capital resources, asset quality, earnings prospects, management, liquidity, or other aspects of the Bank's operations are unsatisfactory, or that the Bank or its management is violating or has violated any law or regulation, the Guam Banking Commission and the FDIC have residual authority to: (i) require affirmative action to correct any conditions resulting from any violation or practice; (ii) direct an increase in capital; (iii) restrict the Bank's growth geographically, by products and services or by mergers and acquisitions; (iv) enter into informal nonpublic or formal public memoranda of understanding or written agreements; (v) enjoin unsafe and unsound practices and issue cease and desist orders to take corrective action; (vi) remove officers and directors and assess civil monetary penalties; and, (vii) take possession of, close and liquidate the Bank.

Guam law permits locally-chartered commercial banks to engage in any activity permissible for national banks. Therefore, the Bank may form subsidiaries to engage in the many so-called "closely related to banking" or "nonbanking" activities commonly conducted by national banks in operating subsidiaries, and further, pursuant to the Gramm-Leach-Bliley Act, the Bank may conduct certain "financial" activities in a subsidiary to the same extent as may a national bank, provided the Bank is and remains "well-capitalized," "well-managed" and in satisfactory compliance with the Community Reinvestment Act (discussed below).

The Bank is a member of the Federal Home Loan Bank ("FHLB") of Seattle. Among other benefits, each FHLB serves as a reserve or central bank for its members within its assigned region and makes available loans or advances to its members. Each FHLB is financed primarily from the sale of consolidated obligations of the FHLB system. As an FHLB member, the Bank is required to own a certain amount of capital stock in the FHLB. At December 31, 2014, the Bank was in compliance with the FHLB's stock ownership requirement.

Regulatory Capital Guidelines. The federal banking agencies have established minimum capital standards known as risk-based capital guidelines. These guidelines are intended to provide measures of capitalization that reflect the degree of risk associated with a bank's operations. The risk-based capital guidelines include both a definition of capital and a framework for calculating the amount of capital that must be maintained against a bank's assets and off-balance sheet items. The amount of capital required to be maintained is based

upon the credit risks associated with the various types and quality of a bank's assets and off-balance sheet items. A bank's assets and off-balance sheet items are classified under several risk categories, with each category assigned a particular risk weighting from 0% to 100%. The Bank's Tier I capital consists of its capital stock, capital surplus, treasury stock, undivided earnings and the cumulative effect of the FDIC's adjustment of our intangible assets. Our Tier II capital adds to Tier I the allowed portion of our reserves for possible loan losses. The inclusion of Tier II capital as qualifying capital for regulatory purposes is subject to certain other requirements and limitations of the federal banking agencies. The federal regulators require a minimum ratio of total qualifying capital to risk-adjusted assets of 8%, a minimum ratio of Tier I capital to risk-adjusted assets of 4% and a minimum amount of Tier I capital to total assets (referred to as the "leverage ratio") of 4%. As of December 31, 2014, the Company's capital levels met all minimum regulatory requirements and the Bank was considered "well capitalized" under the regulatory framework for prompt corrective action described below. There is no condition or event since December 31, 2014, that management believes has changed the Company's or the Bank's capitalization category.

Prompt Corrective Action. The federal banking agencies possess broad powers to take prompt corrective action to resolve the problems of regulated banks. Each federal banking agency has issued regulations defining five capital categories: "well capitalized," "adequately capitalized," "undercapitalized," "significantly undercapitalized," and "critically undercapitalized." Under the regulations, a bank shall be deemed to be:

- "well capitalized" if it has a total risk-based capital ratio of 10.0% or more, has a Tier 1 risk-based capital ratio of 6.0% or more, has a leverage capital ratio of 5.0% or more, and is not subject to specified requirements to meet and maintain a specific capital level for any capital measure;
- "adequately capitalized" if it has a total risk-based capital ratio of 8.0% or more, a Tier 1 risk-based capital ratio of 4.0% or more, and a leverage capital ratio of 4.0% or more (3.0% under certain circumstances) and does not meet the definition of "well capitalized";
- "undercapitalized" if it has a total risk-based capital ratio that is less than 8.0%, a Tier 1 risk-based capital ratio that is less than 4.0%, or a leverage capital ratio that is less than 4.0% (3.0% under certain circumstances);
- "significantly undercapitalized" if it has a total risk-based capital ratio that is less than 6.0%, a Tier 1 risk-based capital ratio that is less than 3.0% or a leverage capital ratio that is less than 3.0%; and
- "critically undercapitalized" if it has a ratio of tangible equity to total assets that is equal to or less than 2.0%.

Banks are prohibited from paying dividends or management fees to controlling persons or entities if, after making the payment, the bank would be "undercapitalized," that is, the bank fails to meet the required minimum level for any relevant capital measure. Asset growth and branching restrictions apply to "undercapitalized" banks. Banks classified as "undercapitalized" are required to submit acceptable capital plans guaranteed by their holding company, if any. Broad regulatory authority was granted with respect to "significantly undercapitalized" banks, including forced mergers, growth restrictions, ordering new elections for directors, forcing divestiture by their holding company, if any, requiring management changes, and prohibiting the payment of bonuses to senior management. Even more severe restrictions are applicable to "critically undercapitalized" banks, those with capital at or less than 2%. Restrictions for these banks include the appointment of a receiver or conservator. All of the federal banking agencies have promulgated substantially similar regulations to implement this system of prompt corrective action.

A bank, based upon its capital levels, that is classified as "well capitalized," "adequately capitalized" or "undercapitalized" may be treated as though it were in the next lower capital category if the appropriate federal banking agency, after notice and opportunity for a hearing, determines that an unsafe or unsound condition, or an unsafe or unsound practice, warrants such treatment. At each successive lower capital category, an insured bank is subject to more restrictions. The federal banking agencies, however, may not treat an institution as "critically undercapitalized" unless its capital ratios actually warrant such treatment.

In addition to measures taken under the prompt corrective action provisions, insured banks may be subject to potential enforcement actions by federal banking agencies, or the banking regulators in any of the jurisdictions in which the Bank operates, for unsafe or unsound practices in conducting their businesses, or for violations of any law, rule, regulation or any condition imposed in writing by the agency, or any written agreement with the agency. Enforcement actions may include the imposition of a conservator or receiver, the issuance of a cease-and-desist order that can be judicially enforced, the termination of insurance of deposits (in the case of a depository institution), the imposition of civil money penalties, the issuance of directives to increase capital, the issuance of formal and informal agreements, and the issuance of removal and prohibition orders against "institution-affiliated" parties. The enforcement of such actions through injunctions or restraining orders may be based upon a judicial determination that the agency would be harmed if such equitable relief was not granted.

Neither the Company nor the Bank is currently operating under any corrective actions by their respective regulatory authorities.

Safety and Soundness Standards. The federal banking agencies have also adopted guidelines establishing safety and soundness standards for all insured depository institutions, as have the other regulatory authorities in jurisdictions in which the Bank operates. Those guidelines relate to internal controls, information systems, internal audit systems, loan underwriting and documentation, compensation and interest rate exposure. In general, the standards are designed to assist the various banking authorities in identifying and addressing problems at depository institutions before capital becomes impaired. If an institution fails to meet these standards, the appropriate banking authority may require the institution to submit a compliance plan and may institute enforcement proceedings if an acceptable compliance plan is not submitted.

FDIC Insurance and Insurance Assessments. The FDIC is an independent federal agency that insures deposits, up to prescribed statutory limits, of federally insured banks and savings institutions, and safeguards the safety and soundness of the banking and savings industries. The FDIC insures the Bank's customer deposits through the Deposit Insurance Fund ("DIF"). The maximum deposit insurance amount was permanently increased from \$100,000 to \$250,000 under the Dodd-Frank Act.

The amount of FDIC assessments paid by each DIF member institution is based on its relative risk of default as measured by regulatory capital ratios and other supervisory factors. Pursuant to the Federal Deposit Insurance Reform Act of 2005, the FDIC is authorized to set the reserve ratio for the DIF annually at between 1.15% and 1.50% of estimated insured deposits. The FDIC may increase or decrease the assessment rate schedule on a semi-annual basis.

On February 7, 2011, as required by the Dodd-Frank Act, the FDIC adopted final rules to revise the assessment base to consist of average consolidated total assets during the assessment period minus the average tangible equity during the assessment period. In addition, the revisions eliminate the adjustment for secured borrowings and make certain other changes to the impact of unsecured borrowings and brokered deposits on an institution's deposit insurance assessment. The rule also revises the assessment rate schedule to provide assessments ranging from 5 to 45 basis points, which took effect on April 1, 2011.

The FDIC may terminate a depository institution's deposit insurance upon a finding that the institution's financial condition is unsafe or unsound or that the institution has engaged in unsafe or unsound practices that pose a risk to the DIF or that may prejudice the interest of depositors.

Depositor Preference. In the event of the "liquidation or other resolution" of an insured depository institution, the claims of depositors of the institution, including the claims of the FDIC as subrogee of insured depositors, and certain claims for administrative expenses of the FDIC as a receiver, will have priority over other general unsecured claims against the institution. If an insured depository institution fails, insured and uninsured depositors, along with the FDIC, will have priority in payment ahead of unsecured, non-deposit creditors, including the parent bank holding company, with respect to any extensions of credit they have made to such insured depository institution.

Community Reinvestment Act ("CRA"). The CRA is intended to encourage insured depository institutions, while operating safely and soundly, to help meet the credit needs of their communities. The CRA specifically directs the federal bank regulatory agencies, in examining insured depository institutions, to assess their record of helping to meet the credit needs of their entire community, including low- and moderate-income neighborhoods, consistent with safe and sound banking practices. The CRA further requires the agencies to take a financial institution's record of meeting its community credit needs into account when evaluating applications for, among other things, domestic branches, consummating mergers or acquisitions, or holding company formations.

The federal banking agencies have adopted regulations which measure a bank's compliance with its CRA obligations on a performance-based evaluation system. This system bases CRA ratings on an institution's actual lending service and investment performance rather than the extent to which the institution conducts needs assessments, documents community outreach or complies with other procedural requirements. The ratings range from "outstanding" to a low of "substantial noncompliance." The Bank had a CRA rating of "satisfactory" as of its most recent regulatory examination. A copy of the rating report is publicly available for review in the Bank's Hagåtña Branch.

Other Consumer Protection Laws and Regulations. The bank regulatory agencies are increasingly focusing attention on compliance with consumer protection laws and regulations, and banks have been advised to carefully monitor their compliance with these laws and regulations. The federal Interagency Task Force on Fair Lending issued a policy statement on discrimination in home mortgage lending describing three methods that federal agencies will use to prove discrimination: overt evidence of discrimination, evidence of disparate treatment, and evidence of disparate impact. In addition to CRA and fair lending requirements, the Bank is subject to numerous other federal consumer protection statutes and regulations. Due to heightened regulatory concern related to compliance with consumer protection laws and expanded regulations generally, the Bank may incur additional compliance costs or be required to expend additional funds for investments in the local communities it serves.

Privacy. The Federal Reserve Board and other bank regulatory agencies have adopted guidelines for safeguarding confidential, personal customer information. These guidelines require financial institutions to create, implement and maintain a comprehensive

written information security program designed to ensure the security and confidentiality of customer information, protect against any anticipated threats or hazards to the security or integrity of such information, and protect against unauthorized access to or use of such information that could result in substantial harm or inconvenience to any customer. The Bank has adopted a customer information security program to comply with these requirements.

Financial institutions are also required to implement policies and procedures regarding the disclosure of nonpublic personal information about consumers to non-affiliated third parties. In general, financial institutions must provide explanations to consumers on policies and procedures regarding the disclosure of such nonpublic personal information, and, except as otherwise required by law, prohibits disclosing such information except as provided in the Bank's policies and procedures. The Bank has implemented privacy policies addressing these restrictions, and these policies are distributed regularly to all existing and new customers of the Bank.

USA Patriot Act of 2001. Under USA Patriot Act of 2001 (the "Patriot Act"), financial institutions are subject to prohibitions regarding specified financial transactions and account relationships, as well as enhanced due diligence and "know your customer" standards in their dealings with foreign financial institutions and foreign customers. Among other things, the Patriot Act requires: (i) enhanced due diligence policies, procedures, and controls on banks opening or holding accounts for foreign banks or wealthy foreign individuals; and, (ii) requires all financial institutions to establish anti-money laundering programs. The Bank has adopted and implemented policies and procedures to comply with the requirements of the Patriot Act.

Office of Foreign Assets Control Regulation. The United States has imposed economic sanctions that affect transactions with designated foreign countries, nationals and others. These are typically known as the "OFAC" rules based on their administration by the U.S. Treasury Department Office of Foreign Assets Control ("OFAC"). The OFAC-administered sanctions targeting countries take many different forms. Generally, however, they contain one or more of the following elements: (i) restrictions on trade with or investment in a sanctioned country, including prohibitions against direct or indirect imports from and exports to a sanctioned country and prohibitions on "U.S. persons" engaging in financial transactions relating to making investments in, or providing investment-related advice or assistance to, a sanctioned country; and, (ii) a blocking of assets in which the government or specially designated nationals of the sanctioned country have an interest, by prohibiting transfers of property subject to U.S. jurisdiction (including property in the possession or control of U.S. persons). Blocked assets (e.g., property and bank deposits) cannot be paid out, withdrawn, set off or transferred in any manner without a license from OFAC. Failure to comply with these sanctions could have serious legal and reputational consequences, including civil money penalties and potential criminal prosecution, so the Bank has established policies and implemented procedures to detect and prohibit transactions that would violate the OFAC rules.

Other Aspects of Banking Law. The Bank is also subject to federal statutory and regulatory provisions covering, among other things, security procedures, insider and affiliated party transactions, management interlocks, electronic funds transfers, funds availability, and truth-in-savings.

Other Pending and Proposed Legislation

Other legislative and regulatory initiatives which could affect the Bank, the Company and the banking industry in general may be proposed or introduced before the United States Congress, the Guam legislature and other governmental bodies in the future. Such proposals, if enacted, may further alter the structure, regulation and competitive relationship among financial institutions, and may subject the Bank or the Company to increased regulation, disclosure and reporting requirements. In addition, the various banking regulatory agencies often adopt new rules and regulations to implement and enforce existing legislation. It cannot be predicted whether, or in what form, any such legislation or regulations may be enacted or the extent to which the business of the Bank or the Company would be affected thereby.

Available Information

The Company makes available free of charge through the Bank's website (www.bankofguam.com) the Company's annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to these reports. The Company makes these reports available on the Bank's website as soon as reasonably practicable after we electronically file such material with, or otherwise furnish it to, the SEC. The information posted on our website is not incorporated by reference into this Annual Report.

ITEM 1A. Risk Factors

Our business, financial condition and results of operations are subject to various risks, including those discussed below. The risks discussed are those that we believe are the most significant risks, although additional risks not presently known to us or that we currently deem less significant may also adversely affect our business, financial condition and results of operations, perhaps materially.

Risks Relating to Recent Economic Conditions and Governmental Response Efforts

Our business may be adversely affected by conditions in the financial markets and economic conditions generally.

The United States economy is finally recovering, moderately, from a downturn that started in 2007, but business activity and growth across industries and regions have not yet been fully restored. Although there are indications that the recovery is accelerating, the sustainability of recent growth is still not certain. Consumer spending, liquidity and availability of credit are tentatively improving, and the unemployment rate, while slowly decreasing, is still relatively high nationally, as well as in the principal markets we serve.

The financial services industry was materially and adversely affected by the weakened economy and by the monetary policy responses intended to correct that weakness. The negative effect of historically low market interest rates has reduced our interest rate margin despite us having established minimum rate levels on our variable rate loans. In order to retain core deposits and as a reputational matter, our consumer savings account rates have been higher than our competitors' offerings for the past five years. The slow recovery of the economy and continued high unemployment may negatively impact our operating results; however, the Bank has not experienced any adverse liquidity issues in recent years. Additionally, the remaining adverse changes in the economy may also continue to have a negative effect on the ability of our borrowers to make timely repayments of their loans. These factors could expose us to an increased risk of loan defaults and losses, and have an adverse impact on our earnings.

Recent legislative and required regulatory initiatives will impose restrictions and requirements on financial institutions that could have an adverse effect on our business.

Current and future legal and regulatory requirements, restrictions, and regulations, including those imposed under the 2010 Dodd-Frank Act, which was enacted in response to the 2008 financial crisis and subsequent economic weakness, may adversely impact our profitability, financial condition and operations; may require us to invest significant management attention and resources to evaluate and make any changes required by the legislation and related regulations; and may make it more difficult for us to attract and retain qualified executive officers and employees. Few provisions of the Dodd-Frank Act were effective immediately, with various provisions becoming effective in stages. Many of the provisions required governmental agencies to implement rules that have increased regulation of the banking industry. As examples, these rules impact the ability of banks to charge certain fees and impose new restrictions on lending practices. The Dodd-Frank Act created a new financial consumer protection agency, known as the Consumer Financial Protection Bureau (the "Bureau"), that is empowered to promulgate new consumer protection regulations and revise existing regulations in many areas of consumer compliance, which may increase our regulatory compliance burden and costs, and may restrict the financial products and services we offer to our customers.

The Dodd-Frank Act prohibits new trust preferred issuances from counting as Tier 1 capital. These restrictions limit our future capital strategies. Although neither the Bank nor the Company use derivative transactions, the Dodd-Frank Act also increases regulation of derivatives and hedging transactions, which could limit our ability in the future to enter into, or increase the costs associated with, interest rate and other hedging transactions. Although certain provisions of the Dodd-Frank Act, such as direct supervision by the Bureau, will not apply to banking organizations with less than \$10 billion of assets, such as the Company, the changes resulting from the legislation will impact our business nonetheless. These and future changes may have a material, adverse effect on our business, our financial condition and the results of our operations.

Implementation of the new Basel III capital rules adopted by the federal bank regulatory agencies will require increased capital levels that could impede our growth and profitability.

The federal bank regulatory agencies adopted new capital requirements in mid-2013 that will increase the minimum Tier 1 risk-based capital ratio, add a new minimum common equity Tier 1 capital ratio, establish a new capital conservation buffer and change the risk-weighting of certain assets. These requirements, implemented beginning in January 2015, will be phased in through 2019, providing banks with adequate time to adjust their balance sheets. Management has assessed the effects of the new rules on the Company and the Bank's capital position. Although we currently exceed the new minimum requirements, they could have a material and adverse effect on our liquidity, capital resources, financial performance and financial condition.

Any future FDIC insurance premium increases will adversely affect our earnings.

In April 2009, the FDIC revised its risk-based assessment system. The changes to the system involve adjustments to the risk-based calculation of an institution's unsecured debt, secured liabilities and brokered deposits. Depending on any future losses that the FDIC Deposit Insurance Fund may suffer due to failed institutions, there can be no assurance that there will not be additional premium increases in order to replenish the Fund, but the rate of bank failures has diminished over the past three years. Our FDIC deposit insurance expense for the year ended December 31, 2014, was \$1.2 million; in 2013, it was \$1.4 million.

Risks Related to Our Markets and Business

Our profitability is dependent upon the economic conditions of the markets in which we operate.

We operate primarily in Guam and the Commonwealth of the Northern Mariana Islands, and, as a result, our financial condition and results of operations are affected by changes in the economic conditions in those areas. Our success depends upon the business activity, population, income levels, deposits and lending activity in these markets. Because some of our customers' business and financial interests may extend well beyond these market areas, adverse economic conditions that affect those other market areas could reduce our growth rate, affect the ability of those customers to repay their loans, and generally affect our financial condition and results of operations. Our lending operations are located in market areas dependent on tourism and fishing, along with a military presence and other federal government activities in Guam. Although recent events seem to indicate a nascent recovery, the Commonwealth of the Northern Mariana Islands has suffered setbacks in recent years because of a decline in its visitor industry and the failure of its garment industry. The other island economies have remained relatively stable. However, because of the magnified influence of external events, these small island economies tend to be somewhat more volatile than larger economic systems. Thus, our borrowers could be adversely impacted by a downturn in these sectors of the economy that could reduce the demand for loans and adversely impact the borrowers' ability to repay their loans, which would, in turn, increase our nonperforming assets. Because of our geographic concentration in several relatively small island economies, we are less able than many regional or national financial institutions to diversify our credit risks across multiple dissimilar markets. In recent years, we have taken the initiative to expand our operations in California in an effort to increase and help to stabilize our profitability.

Our loan portfolio has a large concentration of real estate loans in Guam and San Francisco, which involves risks specific to real estate values.

A downturn in our real estate markets could adversely affect our business because many of our loans are secured by real estate. Real estate lending (including commercial and construction) is a large portion of our loan portfolio. At December 31, 2014, approximately \$581.7 million, or 59.2% of our loan portfolio, was secured by various forms of real estate, including residential and commercial real estate. The real estate securing our loan portfolio is concentrated in Guam and San Francisco. From time to time, there have been adverse developments affecting real estate values in one or more of our markets, and the market value of real estate can fluctuate significantly in a short period of time as a result of market conditions in the geographic area in which the real estate is located. Real estate values and real estate markets are generally affected by changes in national, regional or local economic conditions, fluctuations in interest rates and the availability of loans to potential purchasers, changes in tax laws and other governmental statutes, regulations and policies, and acts of nature, such as earthquakes and typhoons. Additionally, commercial real estate lending typically involves larger loan principal amounts and the repayment of the loans generally is dependent, in large part, on sufficient income from the properties securing the loans to cover operating expenses and debt service. If real estate values decline, the value of the collateral securing some of our loans could be significantly reduced. Our ability to recover on defaulted loans by foreclosing and selling the real estate collateral would then be diminished and we would be more likely to suffer losses on defaulted loans.

Our performance depends on attracting and retaining key employees and skilled personnel to operate our business effectively, and the loss of one or more of those key personnel may materially and adversely affect our prospects.

Our success is dependent on our ability to recruit and retain qualified, skilled management, loan origination, finance, administrative, marketing and technical personnel to operate our business effectively. Competition for qualified employees and personnel in the banking industry is intense and there is a limited number of persons with knowledge of, and experience in, the community banking industry in the markets we serve. In particular, our success has been and continues to be highly dependent upon the abilities of key executives, including our Chief Executive Officer, our Chief Operating Officer, our Chief Financial Officer, and certain other key employees. Failure to maintain adequate staffing in key positions could adversely impact our operations and our ability to compete.

We are subject to credit risk.

There are inherent risks associated with our lending activities. These risks include, among other things, the impact of changes in interest rates and changes in the economic conditions in the markets where we operate, as well as those within our region, across the United States and abroad. Increases in interest rates and/or weakening economic conditions could adversely impact the ability of

borrowers to repay outstanding loans or the value of the collateral securing those loans. We are also subject to various laws and regulations that affect our lending activities. Failure to comply with applicable laws and regulations could subject us to regulatory enforcement action, which could result in the assessment of significant civil money penalties against us.

We seek to mitigate the risks inherent in our loan portfolio by adhering to specific underwriting practices. Although we believe that our underwriting criteria are appropriate for the various kinds of loans we make, we may incur losses on loans that meet our underwriting standards, and these losses may exceed the amounts set aside as reserves in our allowance for loan losses. Due to recent economic conditions, many lending institutions, including the Bank, have experienced declines in the performance of their loans, including consumer and commercial loans. The value of real estate collateral supporting some commercial loans has declined and may continue to decline. Recent developments in the financial industry and credit markets may continue to adversely impact our financial condition and results of operations.

Our allowance for loan losses may not be adequate to cover actual loan losses, which could adversely affect our earnings.

We maintain an allowance for loan losses for possible defaults and other reductions in the principal value of the Bank's loan portfolio. The allowance is established through a provision for loan losses based on management's evaluation of the risks inherent in the loan portfolio and the general economy. The allowance is also appropriately increased for new loan growth. The allowance is based upon a number of factors, including the size of the loan portfolio, asset classifications, economic trends, industry experience and trends, industry and geographic concentrations, estimated collateral values, management's assessment of the credit risk inherent in the portfolio, historical loan loss experience and loan underwriting policies.

We strive to carefully manage and monitor credit quality and to identify deteriorating loans, and adjust the allowance for loan losses accordingly. However, because future events are uncertain and because we may not successfully identify all deteriorating loans in a timely manner, there may be loans that deteriorate in an accelerated time frame. As a result, future additions to the allowance may be necessary. Further, because the loan portfolio contains some commercial real estate, construction, and land development loans with relatively large balances, deterioration in the credit quality of one or more of these loans may require a significant increase to the allowance for loan losses. Future additions to the allowance may also be required due to changes in the financial condition of borrowers, such as changes resulting from current and potentially worsening economic conditions, or as a result of incorrect assumptions by management in determining the allowance for loan losses. Our regulators, as an integral part of their examination process, periodically review our allowance for loan losses and may require us to increase our allowance for loan losses by making additional provisions for loan losses charged as an expense, or to decrease our allowance for loan losses by recognizing loan charge-offs, net of recoveries. Any such additional provisions for loan losses or charge-offs, as required by these regulatory agencies, could have a material adverse effect on our financial condition and results of operations.

Nonperforming assets take significant time to resolve and adversely affect our results of operations and financial condition.

At December 31, 2014, nonperforming loans were 1.08% of the total loan portfolio, and 0.72% of total assets, as compared to 1.29% and 0.88% at December 31, 2013, respectively, indicating a reduced level of risk. Nonperforming assets adversely affect our earnings in various ways. Until economic and market conditions improve, we may incur losses relating to an increase in nonperforming assets. We do not record interest income on non-accrual loans or other real estate owned, thereby adversely affecting our income, and increasing our loan administration costs. Upon foreclosure or similar proceedings, we record the foreclosed asset at the fair value of the asset, reduced by estimated selling costs, which may result in a loss. An increase in the level of nonperforming assets increases our risk profile and may impact the capital levels our regulators believe are appropriate in light of the increased risk profile. While we reduce problem assets through collection efforts, asset sales, workouts, restructurings and otherwise, decreases in the value of the underlying collateral or in these borrowers' performance or financial condition, whether or not due to economic and market conditions beyond our control, could adversely affect our business, our results of operations and our financial condition.

In addition, the resolution of nonperforming assets requires significant commitments of time from management and our directors, which can hinder the performance of their other responsibilities. If the current economic and market conditions worsen, it is possible that we will experience future increases in nonperforming assets, particularly if we are unsuccessful in our efforts to reduce our classified assets, which would have an adverse effect on our business.

We may be required to make additional provisions for loan losses and charge off additional loans in the future, which could adversely affect our results of operations.

For the year ended December 31, 2014, we recorded a \$4.5 million provision for loan losses, charged off \$6.0 million of loans, and recovered \$1.9 million of loans previously charged off. At December 31, 2014, we had \$581.7 million in commercial and residential real estate loans and \$40.0 million in construction loans, of which \$16.3 million was on non-accrual. Construction loans and commercial real estate loans comprise a substantial portion of our nonperforming assets. Deterioration in the real estate market in Guam, San Francisco and/or the Commonwealth of the Northern Mariana Islands could affect the ability of our loan customers to

service their debt, which could result in additional loan charge-offs and provisions for loan losses in the future, and could have a material adverse effect on our financial condition, results of operations and capital.

Our business is subject to interest rate risk and variations in interest rates may negatively affect our financial performance.

Our earnings and cash flows are highly dependent upon net interest income. Net interest income is the difference between interest income earned on interest-bearing assets, such as loans and securities, and interest expense paid on interest-bearing liabilities, such as deposits and borrowed funds. Our net interest income (including net interest spread and margin) and ultimately our earnings are impacted by changes in interest rates and monetary policy. Changes in interest rates and monetary policy can impact the demand for new loans, the credit profile of our borrowers, the yields earned on loans and securities, and rates paid on deposits and borrowings. Given our current volume and mix of interest-bearing liabilities and interest-earning assets, we would expect our interest rate spread (the difference in the rates paid on interest-bearing liabilities and the yields earned on interest-earning assets) as well as net interest income to increase if interest rates rise and, conversely, to decline if interest rates fall. Additionally, increasing levels of in-market and out-of-market competition in the banking and financial services business may decrease our net interest spread as well as net interest margin by forcing us to offer lower lending interest rates and pay higher deposit interest rates. Although we believe our current level of interest rate sensitivity is reasonable, significant fluctuations in interest rates (such as a sudden and substantial increase in Prime and Fed Funds rates) as well as increasing competition may require us to increase rates on deposits at a faster pace than the yield we receive on interest-earning assets increases. The impact of any sudden and substantial move in interest rates and/or increased competition may have an adverse effect on our business, financial condition and results of operations, as our net interest income may be adversely affected.

Additionally, a sustained decrease in market interest rates could negatively affect our earnings. When interest rates decline, borrowers tend to refinance higher-rate, fixed-rate loans at lower rates, prepaying their existing loans. Under those circumstances, we would not be able to reinvest those prepayments in assets earning interest rates as high as the rates on the prepaid loans. In addition, our commercial loans, which carry variable interest rates that generally adjust in accordance with changes in the prime rate, will adjust to lower rates. Because of this, we have established minimum interest rates on those loans to mitigate our interest rate risk and potential reductions in income.

We are also significantly affected by the level of loan demand available in our market. The inability to make sufficient loans directly affects the interest income we earn. Lower loan demand will generally result in lower interest income realized as we place funds in lower yielding investments.

Liquidity risk could impair our ability to fund operations and jeopardize our financial condition.

Liquidity is essential to our business. An inability to raise funds through deposits, borrowings, the sale of loans and other sources could have a substantial negative effect on our liquidity. Our access to funding sources in amounts adequate to finance our activities could be impaired by factors that affect us specifically or the financial services industry in general. Factors that could detrimentally impact our access to liquidity sources include a decrease in the level of our business activity due to a market downturn in markets in which our loans are concentrated or adverse regulatory action against us. Our ability to borrow could also be impaired by factors that are not specific to us, such as a severe disruption of the financial markets or negative views and expectations about the prospects for the financial services industry as a whole.

If we lost a significant portion of our low-cost deposits, it would negatively impact our liquidity and profitability.

Our profitability depends in part on our success in attracting and retaining a stable base of low-cost deposits. At December 31, 2014, 28.9% of our deposit base was comprised of non-interest bearing deposits, and the average rate on our interest-bearing deposits was 0.28%. While we generally do not believe these core deposits are very sensitive to interest rate fluctuations, the competition for these deposits in our markets is strong. If we were to lose a significant portion of our low-cost deposits, it could negatively impact our liquidity and profitability.

We have the ability to borrow from the Federal Home Loan Bank, and there can be no assurance their programs will continue in their current manner.

We utilize the Federal Home Loan Bank of Seattle for term advances; we also borrow from correspondent banks under our Fed Funds lines of credit from time to time, primarily to test the continuing availability of those lines. The amount loaned to us is generally dependent on the value of the collateral pledged. These lenders could reduce the percentages loaned against various collateral categories, could eliminate their acceptance of certain types of collateral, and could otherwise modify or even terminate their loan programs, particularly to the extent they are required to do so because of capital adequacy or other balance sheet concerns. Any change or termination of the programs under which we borrow from the Federal Home Loan Bank of Seattle or correspondent banks could have an adverse effect on our liquidity and profitability.

Our results of operations may be adversely affected by other-than-temporary impairment charges relating to our securities portfolio.

We may be required to record future impairment charges on our securities, including our stock in the Federal Home Loan Bank of Seattle, if they suffer declines in value that we consider other-than-temporary. Numerous factors, including the lack of liquidity for resale of certain securities, the absence of reliable pricing information for securities, adverse changes in the business climate, adverse regulatory actions or unanticipated changes in the competitive environment, could have a negative effect on our securities portfolio in future periods. Significant impairment charges could also negatively impact our regulatory capital ratios and result in the Bank not being classified as “well-capitalized” for regulatory purposes.

We may need to raise additional capital in the future and such capital may not be available when needed or at all.

We may need to raise additional capital in the future to provide us with sufficient capital resources and liquidity to meet regulatory requirements, our commitments or our business needs. Our ability to raise additional capital, if needed, will depend, among other things, on conditions in the capital markets at that time, which are outside of our control, and our financial performance. The recent loss of confidence in financial institutions may increase our cost of funding and limit our access to some of our customary funding sources, including, but not limited to, inter-bank borrowings and borrowings from the discount window of the Federal Reserve.

We cannot assure you that such capital will be available to us on acceptable terms or at all. Any occurrence that may limit our access to the capital markets, such as a decline in the confidence of debt purchasers, depositors of the Bank or counterparties participating in the capital markets may adversely affect our capital costs and our ability to raise capital and, in turn, our liquidity.

We must effectively manage our growth strategy.

As part of our general growth strategy, we may expand into additional communities or attempt to strengthen our position in our current markets by opening new offices. To the extent that we are able to open additional offices, we are likely to temporarily experience the effects of higher operating expenses relative to operating income from the new operations for a period of time, which may have an adverse effect on our levels of reported net income, return on average equity and return on average assets. Our current growth strategies involve internal growth from our current offices and the addition of new offices over time, so that the additional overhead expenses associated with recent openings are absorbed prior to opening other new offices.

We have a nominal amount of deferred tax asset and cannot assure that it will be fully realized.

Deferred tax assets and liabilities are the expected future tax amounts for the temporary differences between the carrying amounts and tax basis of assets and liabilities computed using enacted tax rates. If we determine that we will not achieve sufficient future taxable income to realize our net deferred tax asset, we are required under generally accepted accounting principles to establish a full or partial valuation allowance. If we determine that a valuation allowance is necessary, we are required to incur a charge to operations. We regularly assess available positive and negative evidence to determine whether it is more likely than not that our net deferred tax asset will be realized. Realization of a deferred tax asset requires us to apply significant judgment and is inherently speculative because it requires estimates that cannot be made with certainty. At December 31, 2014, we had a net deferred tax asset of \$5.5 million. For the year ended December 31, 2014, we established a partial valuation allowance of \$2.3 million to reduce the gross deferred tax asset of \$7.8 million because, in management’s opinion, it is more likely than not that only the remaining \$5.5 million will be realized. If we were to determine at some point in the future that we will not achieve sufficient future taxable income to realize our net deferred tax asset, we would be required, under generally accepted accounting principles, to establish a full or increase any partial valuation allowance, which would require us to incur a charge to operations for the period in which the determination was made.

We face strong competition from financial service companies and other companies that offer banking services.

We face substantial competition in all phases of our operations from a variety of different competitors. Our competitors, including larger commercial banks, community banks, savings and loan associations, credit unions, consumer finance companies, insurance companies, brokers, investment advisors and other financial institutions, compete with the lending and deposit-gathering services we offer. Increased competition in our markets may result in reduced loans and deposits.

Many of these competing institutions have much greater financial and marketing resources than we have. Due to their size, many competitors can achieve larger economies of scale in a broader range of products and services than we can. If we are unable to offer competitively priced products and services, our business may be negatively affected.

Some of the financial services organizations with which we compete are not subject to the same degree of regulation as is imposed on bank holding companies and federally insured financial institutions, and are not subject to increased supervisory oversight arising from regulatory examinations. As a result, these non-bank competitors have certain advantages over us in accessing funding and in

providing various services. The banking business in our primary market areas is very competitive, and the level of competition facing us may increase further, which may limit our asset growth and financial results.

In the future, the Bank and/or the Company may become subject to supervisory actions and/or enhanced regulation that could have a material adverse effect on our business, operating flexibility, financial condition and the value of our common stock.

Under federal, state and local laws and regulations pertaining to the safety and soundness of insured depository institutions, various state or local regulators (for non-federally chartered banks), the Federal Reserve Board (for bank holding companies and member banks), the local financial industry regulators of the various jurisdictions in which the Bank operates and, separately, the FDIC as the insurer of bank deposits, each have the authority to compel or restrict certain activities on our part if they determine that we have insufficient capital or are otherwise operating in a manner that may be deemed to be inconsistent with safe and sound banking practices. Under their respective authority, our bank regulators can require us to enter into informal or formal enforcement orders, including board resolutions, memoranda of understanding, written agreements, and consent or cease and desist orders, pursuant to which we may be required to take identified corrective actions to address cited concerns or to refrain from taking certain actions. Neither the Bank nor the Company is currently operating under any regulatory enforcement orders.

Technology is continually changing and we must effectively implement new technologies.

The financial services industry is undergoing rapid technological changes with frequent introductions of new technology-driven products and services. In addition to better serving customers, the effective use of technology increases efficiency and enables us to reduce costs. Our future success will depend in part upon our ability to address the needs of our customers by using technology to provide products and services that will satisfy their demands for convenience, as well as to create additional efficiencies in our operations as we continue to grow and expand our geographic and product markets. In order to anticipate and develop new technology, we employ a qualified staff of internal information system specialists and consider this area a core part of our business. We do not develop our own software products, but have been able to respond to technological changes in a timely manner through association with leading technology vendors. We must continue to make substantial investments in technology which may affect our results of operations. If we are unable to make such investments, or we are unable to respond to technological changes in a timely manner, our operating costs may increase, which could adversely affect our operating results.

System failure or breaches of our network security could subject us to increased operating costs as well as litigation and other liabilities.

The computer systems and network infrastructure we use could be vulnerable to unforeseen problems. Our operations are dependent upon our ability to protect our computer equipment against damage from physical theft, fire, power loss, telecommunications failure or a similar catastrophic event, as well as from security breaches, denial of service attacks, viruses, worms and other disruptive problems caused by hackers. Any damage or failure that causes an interruption in our operations could have a material adverse effect on our financial condition and results of operations. Computer break-ins and other disruptions could also jeopardize the security of information stored in and transmitted through our computer systems and network infrastructure, which may result in significant liability to us and may cause existing and potential customers to refrain from doing business with us. We employ external auditors to conduct auditing and testing for weaknesses in our systems, controls, firewalls and encryption to reduce the likelihood of any security failures or breaches, as well as both internal and external monitoring systems to detect and report any attempt to overcome our electronic defenses. Although we, with the help of third-party service providers and auditors, intend to continue to implement effective security technology and establish operational procedures to prevent such damage, there can be no assurance that these security measures will ultimately be successful. In addition, advances in computer capabilities, new discoveries in the field of cryptography or other developments could result in a compromise or breach of the algorithms we and our third-party service providers use to encrypt and protect customer transaction data. A failure of such security measures could have a material adverse effect on our financial condition and results of operations.

Breaches of third parties' network security could subject us to increased operating costs and other liabilities.

In recent years, there have been numerous highly publicized breaches of customer databases maintained by both public and private entities, often compromising personally identifiable information. The Bank has established systems to mitigate the possibility that some of this information could be used fraudulently to open deposit and/or loan accounts. Despite all reasonable efforts, though, we are unable to be absolutely certain that the risk of that form of fraud is entirely eliminated.

Further, some of these third party data breaches have compromised credit card information, creating an opportunity to defraud the Bank and its credit card customers by initiating fraudulent charges using the compromised card information. Although efforts are being made in the U.S. Congress to reassign the liability for these fraudulent charges to the third parties whose systems have been breached, unless and until that reassignment is made, the Bank retains potential liabilities associated with those fraudulent charges.

Also, when it is known that a credit card has been compromised, the Bank incurs costs in replacing the card. As a result, a third party network security breach could have a material adverse effect on our financial condition and the results of our operations.

Managing operational risk is important to attracting and maintaining customers, investors and employees.

Operational risk represents the risk of loss resulting from our operations, including but not limited to, the risk of fraud by employees or persons outside the Bank, the execution of unauthorized transactions by employees, transaction processing errors and breaches of the internal control system, and of compliance requirements. This risk of loss also includes the potential legal actions that could arise as a result of an operational deficiency or as a result of noncompliance with applicable regulatory standards, adverse business decisions or their implementation, and customer attrition due to potential negative publicity. Operational risk is inherent in all business activities and the management of this risk is important to the achievement of our business objectives. In the event of a breakdown in our internal control system, improper operation of systems or improper employee actions, we could suffer financial loss, face regulatory action and suffer damage to our reputation. We have a stringent code of ethics and attendant procedures in place to protect our reputation and promote ethical conduct, but these policies and procedures might not be fully effective. Negative publicity regarding our business, employees, or customers, with or without merit, may result in the loss of customers, investors and employees, costly litigation, a decline in revenues and increased governmental regulation.

We have not sought an advisory stockholder vote to approve the compensation of our named executive officers.

Rule 14a-21 under the Exchange Act requires us to provide a separate stockholder advisory vote in our proxy statements to approve the compensation of named executive officers, not less frequently than once every three years (“say-on-pay” vote), and, at least every six years, to provide a separate stockholder advisory vote on the frequency with which we will solicit advisory say-on-pay votes from our stockholders (“say-on-frequency” vote). In 2013, the year in which Rule 14a-21 became applicable to smaller reporting companies, and in 2014, we did not submit to our stockholders a say-on-pay vote to approve an advisory resolution regarding our compensation program for our named executive officers, or a say-on-frequency vote. Consequently, the Board of Directors has not considered the outcome of our say-on-pay vote results when determining future compensation policies and pay levels for our named executive officers. At our 2015 annual stockholders meeting, we will be asking our stockholders to vote on a proposal to approve an advisory resolution regarding our compensation program for our named executive officers, and soliciting a separate say-on-frequency vote. Following such annual meeting, the Board will consider the outcome of our say-on-pay vote results when determining future compensation policies and pay levels for our named executive officers, and will report the results of the say-on-pay vote and the say-on-frequency vote as required by applicable SEC rules.

Severe weather, natural disasters, acts of war or terrorism and other external events could significantly impact our business.

Severe weather, natural disasters, acts of war or terrorism and other adverse external events could have a significant impact on our ability to conduct business. Such events could affect the stability of our deposit base, impair the ability of borrowers to repay outstanding loans, impair the value of collateral securing loans, cause significant property damage, result in loss of revenue and/or cause us to incur additional expenses. For example, our primary market areas in Guam and the CNMI are subject to typhoons, earthquakes and wildland fires. Operations in our market could be disrupted by both the evacuation of large portions of the population as well as damage and/or lack of access to our banking and operational facilities. While we have experienced severe weather and strong earthquakes in the past and resumed our operations promptly, a recurrence of these, along with acts of war, terrorism or other adverse external events, may occur in the future. Although management has established a business continuity plan, disaster recovery policies and corresponding procedures, the occurrence of any such event could have a material adverse effect on our business, which, in turn, could have a material adverse effect on our financial condition and results of operations.

Risks Related to Our Securities

The price of our common stock may fluctuate significantly, and this may make it difficult for stockholders to resell shares of common stock at times or at prices they find attractive.

The Company common stock is traded in the Over-the-Counter market under the symbol “BKGMF.” The trading volume has historically been substantially less than that of larger financial services companies. This may make it difficult for stockholders to resell shares of common stock at times or at prices they find attractive. Stock price volatility may also make it more difficult to sell common stock quickly and at attractive prices.

ITEM 1B. Unresolved Staff Comments

None.

ITEM 2. Properties

Our properties consist primarily of leased office facilities for our branch offices. Our headquarters facility, which we own, consists of 74,240 square feet in Hagåtña, Guam. We also own the buildings of our Santa Cruz branch in Guam, and Garapan branch in Saipan and the Rota branch in the CNMI, which comprise 47,292 square feet in total. These branch buildings are situated on leased land. We believe our facilities are in excellent condition and suitable for the conduct of our business.

For additional information on operating leases and rent expense, see Note 16 to the Consolidated Financial Statements.

ITEM 3. Legal Proceedings

Neither the Company nor the Bank is involved in any legal proceedings other than those occurring on a routine basis in the ordinary course of business. The majority of such proceedings have been initiated by the Bank in the process of collecting delinquent loans. Such routine legal proceedings, in the aggregate, are believed by Management to be immaterial to the financial condition, results of operations and cash flows of the Company as of December 31, 2014.

ITEM 4. Mine Safety Disclosures

None.

PART II

ITEM 5. Market For Registrant's Common Equity, Related Stockholder Matters And Issuer Purchases Of Equity Securities

Market and Dividend Information

The Company's common stock is traded through the OTC Bulletin Board and is quoted under the symbol "BKGMF." Transactions of the Company's common stock through private negotiated sales are also facilitated with the assistance of the Bank's Trust Department. Management is not aware of any securities dealers which actively make a market in the Company's common stock. No assurance can be given that an active trading market will be sustained for the common stock at any time in the future. The following table sets forth the high and low sale price for the common stock for the periods indicated, along with cash dividend payments for each of the quarters presented. The stock prices in the table are based upon information provided by the Bank's Trust Department, and are derived from private sales executed through the Bank's Trust Department, and sales through the OTC Bulletin Board.

	Stock Price		Dividend Per Share
	High	Low	
Year ended December 31, 2014			
Fourth Quarter.....	\$ 10.90	\$ 9.00	\$ 0.100
Third Quarter.....	\$ 11.01	\$ 9.00	\$ 0.100
Second Quarter.....	\$ 11.50	\$ 9.00	\$ 0.125
First Quarter.....	\$ 10.00	\$ 9.00	\$ 0.125
Year ended December 31, 2013			
Fourth Quarter.....	\$ 10.00	\$ 6.55	\$ 0.125
Third Quarter.....	\$ 10.00	\$ 7.15	\$ 0.125
Second Quarter.....	\$ 10.04	\$ 9.00	\$ 0.125
First Quarter.....	\$ 10.05	\$ 8.00	\$ 0.125

As of March 17, 2015, there were approximately 4,342 holders of record of common stock. There are no other classes of common equity or other types of stock outstanding.

Dividend Policy

At its discretion, the Board of Directors of the Company declares dividends to its stockholders on a quarterly basis. The Company declared and paid dividends of \$0.125 per share to stockholders as of a declaration date for each share of common stock outstanding in each of the quarters during the years ended December 31, 2013 and 2012, and in the first and second quarters of 2014; in the third and fourth quarters of 2014, the Company declared and paid dividends of \$0.10 per share to stockholders as of a declaration date.

The amount of future dividends will depend upon our earnings, financial condition, capital requirements and other factors, and will be determined by our Board of Directors on a quarterly basis. It is the policy of the Federal Reserve Board that bank holding companies generally pay dividends on common stock only out of income available over the past year, and only if prospective earnings retention is consistent with the organization's expected future needs and financial condition. It is also the policy of the Federal Reserve Board that bank holding companies not maintain dividend levels that undermine the holding company's ability to be a source of strength to its banking subsidiaries. Additionally, in consideration of the current financial and economic environment, the Federal Reserve Board has indicated that bank holding companies should carefully review their dividend policy and has discouraged payment ratios that are at maximum allowable levels unless both asset quality and capital are very strong. Under the federal Prompt Corrective Action regulations, the Federal Reserve Board may prohibit a bank holding company from paying any dividends if the holding company is undercapitalized, and the FDIC may prohibit a non-member bank from paying any dividends if the bank is undercapitalized.

As a holding company, our ability to pay cash dividends is affected by the ability of our bank subsidiary, the Bank, to pay cash dividends. The ability of the Bank (and our ability) to pay cash dividends in the future and the amount of any such cash dividends is and could be in the future further influenced by bank regulatory requirements and approvals and capital guidelines. Funds for payment of any cash dividends by the Company would be obtained from its investments as well as dividends from the Bank. The decision whether to pay dividends will be made by our Board of Directors in light of conditions then existing, including factors such as our results of operations, financial condition, business conditions, regulatory capital requirements and covenants under any applicable contractual arrangements, including agreements with regulatory authorities.

Securities Authorized For Issuance Under Equity Compensation Plans

Employee Stock Purchase Plan

The Bank's 2011 Employee Stock Purchase Plan (the "2011 Plan") was adopted by the Bank's Board of Directors and approved by the Bank's Stockholders on May 2, 2011, to replace the Bank's 2001 Non-Statutory Stock Option Plan. This plan was subsequently adopted by the Company after the Reorganization. The 2011 Plan is open to all employees of the Company and the Bank who have met certain eligibility requirements.

Under the 2011 Plan, as amended and restated as of July 1, 2012, eligible employees can purchase, through payroll deductions, shares of common stock at a discount. The right to purchase stocks is granted to eligible employees during a quarterly offer period that is established from time to time by the Board of Directors of the Company. Eligible employees cannot accrue the right to purchase more than \$25 thousand worth of stock at the fair market value at the beginning of each offer period. Eligible employees also may not purchase more than one thousand five hundred (1,500) shares of stock in any one offer period. The shares are purchased at 85% of the fair market price of the stock on the enrollment date.

ITEM 7. Management's Discussion And Analysis Of Financial Condition And Results Of Operations

The following discussion provides information about the results of operations, financial condition, liquidity, and capital resources of the Company and its wholly-owned subsidiary, the Bank. This information is intended to facilitate the understanding and assessment of significant changes and trends related to our financial condition and the results of operations. This discussion and analysis should be read in conjunction with our consolidated financial statements and the accompanying notes presented elsewhere in this Annual Report.

Executive Summary

This summary is intended to identify the most important matters on which management focuses when it evaluates the financial condition and performance of the Bank. When evaluating financial condition and performance, management looks at certain key metrics and measures. The Bank's evaluation includes comparisons with peer group financial institutions and its own performance objectives established in internal planning processes.

The primary activity of the Bank is commercial banking, as it has been since the Bank opened in Guam in 1972. The Company's operations are located entirely in the U.S. territories, the U.S.-affiliated nations of the western Pacific, and in the San Francisco Bay area of California. The largest community in the Bank's western Pacific market is Guam, followed by the Commonwealth of the Northern Mariana Islands. The market includes a number of transportation-, travel- and tourism-related companies in the region, as well as substantial U.S. Department of Defense and other U.S. federal government activities in Guam. The Company's customers are primarily transnational corporations, governments, closely-held businesses and individuals.

During 2014, there were two significant factors that impacted the Company's financial condition and operations:

- There was a substantial inflow of deposits throughout the year, and a large portion of the inflow was due to the closure of a large competitor in the Guam market segment. The Bank also succeeded in acquiring government accounts throughout the Freely Associated States, along with land use payments in the Republic of the Marshall Islands, as well as significant deposit growth in private and government deposits in the Commonwealth of the Northern Mariana Islands. In total, the Bank's deposit base grew \$172.1 million, or 14.5%.
- Over the course of the year, tourist arrivals continued to increase in Guam and other islands in the region. In Guam, the number of visitors reached its highest level since 1997, at 1.34 million, and the third highest level ever. This was due, in part, to the fact that a moderate decrease in Japanese arrivals was offset by increasing arrivals from South Korea and China, as well as increasing arrivals from Russia and Taiwan. Although these last three comprise a relatively small portion of the total market, they continue to grow. The continuing growth in Guam's tourism industry and increasing arrivals in the other islands led to modest improvements in payroll employment and other aspects of the regional economy, enhancing the Bank's business.

For the year ended December 31, 2014, net income was \$9.6 million, or \$1.08 per diluted common share. For the year ended December 31, 2013, net income was \$9.9 million, or \$1.12 per diluted common share. For the year ended December 31, 2012, net income was \$8.6 million, or \$0.98 per diluted common share.

The annualized return on average assets and average equity for the year ended December 31, 2014 were 0.66% and 9.78%, respectively, compared to 0.77% and 10.45%, respectively, for 2013, and 0.71% and 9.26%, respectively, for 2012.

The following are major factors that impacted the Company's results of operations:

- Net interest income increased 6.7% to \$62.7 million for the year ended December 31, 2014, from \$58.8 million for the year ended December 31, 2013, due to a \$2.9 million increase in interest income and a reduction of \$1.0 million in interest expenses. Net interest income increased 3.6% to \$58.8 million for the year ended December 31, 2013, from \$56.7 million for the year ended December 31, 2012, due to an increase of \$1.3 million in interest income and a decrease of \$747 thousand in interest expense.
- The net interest margin decreased 29 basis points to 4.52% for the year ended December 31, 2014, compared with 4.81% for the year ended December 31, 2013. The decrease in the net interest margin for 2014 compared to 2013 was primarily due to a 43 basis point decrease in the yields on loans, a 17 basis point decline in the yield on our securities portfolio and a 10 basis point reduction of yields on interest-bearing deposits in banks, partially offset by a 16 basis point decrease in rates paid on deposits and other borrowings. The net interest margin decreased by 20 basis points to 4.81% for the year ended December 31, 2013, compared with 5.01% for the year ended December 31, 2012. The decrease in the net interest margin for 2013 compared to 2012 was primarily due to a 50 basis point decrease in the yields on loans, a 20 basis point reduction of yields on interest-bearing deposits in banks and an 11 basis point decline in the yield on our securities portfolio, partially offset by a 12 basis point decrease in rates paid on deposits and other borrowings.
- The provision for loan losses was \$4.5 million for the year ended December 31, 2014, compared to \$2.1 million for the year ended December 31, 2013, and \$3.9 million for the year ended December 31, 2012. The increase in the provision for loan losses in 2014 compared to 2013 reflects a supplemental provision of \$565 thousand during the third quarter, primarily in response to the charge-off of one loan in the amount of \$1.5 million. The decrease in the 2013 provision for loan losses compared to 2012 reflects lower net charge-offs during the year, tempered by an increase in nonperforming loans associated with moderate growth in on our loan portfolio, as well as management's assessment of economic conditions.
- Non-interest income decreased by 7.5%, to \$10.8 million, for the year ended December 31, 2014, \$879 thousand less than the \$11.7 million for the year ended December 31, 2013. The decrease in non-interest income in 2014 compared to 2013 was primarily due to a decrease in revenues from merchant services in 2014, a reduction of \$1.0 million from the previous year, a reduction of \$156 thousand in net investment securities gains and a reduction of \$124 thousand in trustee fees, partially offset by the additional \$351 thousand in cardholder income and \$141 thousand in service charges and fees. Non-interest income decreased by 7.0% in 2013 to \$11.7 million, compared to \$12.6 million in 2012, primarily due to a

reduction of \$724 thousand in net investment securities gains in 2013 from the previous year, a reduction of \$289 thousand in cardholder income and a decrease of \$195 thousand in trustee fees, partially offset by the additional \$298 thousand in service charges and fees and the \$132 thousand increase in income from merchant services.

- Non-interest expense was \$55.7 million for the year ended December 31, 2014, compared to \$54.4 million for the year ended December 31, 2013, an increase of 2.3%, primarily due to an increase of \$657 thousand in salaries and employee benefits, an additional \$420 thousand in professional services expense, \$398 thousand in contract services expense, \$263 thousand in furniture and equipment depreciation and \$190 thousand in general, administrative and other expense, partially offset by reductions of \$846 thousand in expenses associated with other real estate owned and a \$161 thousand in Federal Deposit Insurance Corporation insurance assessments. Non-interest expense increased to \$54.4 million in the year ended December 31, 2013, from \$53.4 million for the year ended December 31, 2012, primarily due to an increase of \$996 thousand in expenses associated with other real estate owned, \$607 thousand in occupancy expense and \$358 thousand in Federal Deposit Insurance Corporation assessments, partially offset by reductions of \$268 thousand in professional services expense, \$143 thousand in furniture and equipment depreciation and \$140 thousand in stationery and supplies expense.
- The 2.5% decrease of net after tax income to \$9.6 million in 2014 compared to \$9.9 million 2013 was due to the \$1.2 million increase in non-interest expense and the \$879 thousand decrease in non-interest income, offset by the \$1.5 million increase in net interest income (after the provision for loan losses) and the decrease of \$324 thousand in income taxes. The 14.5% increase in net income from 2012 to 2013 was primarily due to the \$3.9 million increase in net interest income (after the provision for loan losses), partially offset by the \$1.1 million increase in non-interest expense, the decrease of \$875 thousand in non-interest income and the increase of \$656 thousand in income taxes.

The following are important factors in understanding our current financial condition and liquidity position:

- Cash, Federal Funds sold, interest-bearing deposits in other financial institutions, and investment securities available-for-sale and held-to-maturity collectively increased by 19.9%, to \$441.7 million, at December 31, 2014, from \$368.4 million at December 31, 2013. The increase in liquid assets is primarily due to an increase of \$172.1 million of in total deposits and an increase of \$2.4 million in other liabilities, partially offset by an increase of \$106.5 million in net loans and an increase of \$2.8 million in other assets.
- Total loans, net of deferred fees and the allowance for loan losses, increased \$106.5 million, or 12.4%, to \$967.4 million at December 31, 2014, compared to \$860.9 million at December 31, 2013. Commercial loans increased by \$85.1 million to \$649.6 million at December 31, 2014 from \$564.5 million at December 31, 2013. In addition, consumer loans, including residential mortgage loans, increased by \$22.0 million, to \$332.7 million, at December 31, 2014, from \$310.7 million at December 31, 2013.
- Classified assets increased to \$26.0 million at December 31, 2014, compared to \$22.7 million at December 31, 2013.
- The allowance for loan losses at December 31, 2014, was \$12.5 million, or 1.28% of total loans. The allowance for loan losses at December 31, 2013, was \$12.1 million, or 1.38% of total loans.
- Nonperforming loans decreased \$637 thousand to \$10.6 million, or 1.08% of total loans, at December 31, 2014, from \$11.3 million, or 1.29% of total loans, at December 31, 2013.
- Net loan charge-offs were \$4.09 million for the year ended December 31, 2014, as compared to the \$2.25 million in net charge-offs for the year ended December 31, 2013.
- The ratio of noncore funding of \$42.5 million (which consists of \$100,000 and over time deposits plus short-term borrowings) to total assets was 2.90% at December 31, 2014, compared to \$43.3 million, or 3.37% of total assets, at December 31, 2013.
- The loan-to-deposit ratio decreased to 72.3% at December 31, 2014, as compared to 73.8% at December 31, 2013.
- Capital ratios significantly exceed regulatory requirements for a well-capitalized financial institution, both at the Company level and in the Bank. The leverage ratio at the Company was 7.01%, with a Tier 1 risk-based capital ratio of 10.58%, and a total risk-based capital ratio of 11.83% at December 31, 2014. The leverage ratio at the Company was 7.60%, with a Tier 1 risk-based capital ratio of 11.43%, and a total risk-based capital ratio of 12.53% at December 31, 2013. The regulatory well-capitalized guidelines are a minimum of a 5% leverage ratio, a 6% Tier 1 risk-based capital ratio, and a 10% total risk-based capital ratio. The decrease in the risk-based ratios from December 31, 2013, to December 31, 2014, was due to the conversion of lower-risk securities to loans that carry a higher risk, along with substantial growth in loans supported by an increase in deposits.

Deposits

The composition and cost of the Bank's deposit base are important in analyzing the Bank's net interest margin and balance sheet liquidity characteristics. The Bank's depositors are generally located in its primary market area. Depending on loan demand and other funding requirements, the Bank also attracts deposits through its interest rate pricing. The Bank monitors all deposits that may be sensitive to interest rate changes to help ensure that liquidity risk does not become excessive due to deposit migration. Deposits at December 31, 2014, were \$1.36 billion, compared to \$1.18 billion at December 31, 2013. The 14.5% increase was primarily due to the closure of a large competitor bank in Guam, the acquisition of additional government accounts in the Freely Associated States, U.S. government payments for land use and other purposes, and the acceleration of economic recovery in the Commonwealth of the Northern Mariana Islands. These increases were partially offset by a reduction in deposits in the California region following a decrease in the interest rate paid on savings accounts there.

The Bank does not currently accept brokered deposits because it already maintains ample liquidity, but may do so in the future.

Liquidity

Our liquidity position refers to our ability to maintain cash flows sufficient to fund operations and to meet obligations and other commitments in a timely fashion. We believe that the Bank's liquidity position is more than sufficient to meet our operating expenses, borrowing needs and other obligations for 2015, and management has tested and determined that, even under severely stressed scenarios, the Bank's liquidity will be more than adequate to meet our requirements. Our liquidity has increased significantly as we shifted from longer-duration, Held-To-Maturity securities in our investment portfolio to shorter-duration, Available-For-Sale investments as a defensive measure due to historically low interest rates and yields, and the possibility that those rates and yields will increase as the U.S. economy continues to improve. At December 31, 2014, we had \$105.9 million in cash and cash equivalents and approximately \$86.9 million in available borrowing capacity from various sources, including the Federal Home Loan Bank ("FHLB"), the Federal Reserve Bank of San Francisco ("FRB"), and Federal Funds facilities with several financial institutions. The Bank also had \$128.9 million in unpledged securities available at December 31, 2014. Our loan-to-deposit ratio decreased to 72.3% at December 31, 2014, compared to 73.8% at December 31, 2013, as our net loans increased by 12.4% and our deposits grew by 14.5%.

Lending

Our loans originate almost entirely through the branch offices located in our primary market. As the Bank has approached a saturation point in our primary service area, we have expanded our activities in California through our branch in San Francisco. The total loan portfolio remains well diversified with commercial and industrial loans accounting for 21.4% and commercial real estate loans accounting for 40.7% of the total loan portfolio at December 31, 2014. Construction loans increased from 0.1% of the portfolio at December 31, 2013, to 4.1% at December 31, 2014. Residential mortgages and other consumer-related loans accounted for the remaining 33.9% of total loans at December 31, 2014. The increase in gross loans in 2014 compared to 2013 was primarily due to an increase in our commercial loan portfolio, including expansion of our lending in California, partially offset by a decrease in residential mortgages. The Bank also had an increase of \$5.2 million in loans sold to the Federal Home Loan Mortgage Corporation ("Freddie Mac") from \$208.6 million at December 31, 2013, to \$213.8 million at December 31, 2014, but these loans are off-book, except for the amortized value of the associated mortgage servicing rights. The Bank exercises careful selectivity with respect to the types of loans it chooses to originate.

Net Interest Income

The management of interest income and expense is fundamental to the performance of the Company and the Bank. Net interest income, the difference between interest income and interest expense, is the largest component of the Bank's total revenue. Management closely monitors both total net interest income and the net interest margin (net interest income divided by average earning assets).

The Bank, through its asset and liability management policies and practices, as overseen by its Asset and Liability Committee, seeks to maximize net interest income without exposing itself to an excessive level of interest rate risk. Interest rate risk is managed by monitoring the pricing, maturity and repricing options of all classes of interest bearing assets and liabilities. This is discussed in more detail under Liquidity and Asset/Liability Management. In addition, we believe there are measures and initiatives we can take to improve the net interest margin, including increasing loan rates, maintaining interest rate floors on floating rate loans, reducing nonperforming assets, managing deposit interest rates and reducing higher-cost deposits.

From January 22, 2008, through December 16, 2008, the Federal Reserve's Open Market Committee reduced short-term interest rates by 325 basis points in response to the credit crisis and economic downturn that resulted from the collapse in the U.S. housing market and the subsequent global recession. The target Federal Funds Rate in the range of 0.00% to 0.25% remains in effect, and has been

reinforced by massive purchases of financial assets by the Federal Reserve in its programs of quantitative easing. The decrease in short-term rates immediately affected the rates applicable to many of the Bank's loans. While the decrease in interest rates also lowered the cost of interest bearing deposits, which represent the Bank's primary funding source, these deposits tend to re-price more slowly than floating rate loans. The historically low level of short-term interest rates, including the prime rate, has significantly compressed the Bank's net interest margin.

Management of Credit Risk

We continue to proactively identify, quantify and manage our problem loans. Early identification of problem loans and potential future losses helps enable us to resolve credit issues with potentially less risk and lower ultimate losses. We maintain an allowance for loan losses in an amount that we believe is adequate to absorb probable and projected incurred losses in the portfolio. While we strive to carefully monitor and manage credit quality and to identify loans that may be deteriorating, circumstances can change at any time that may result in future losses for loans included in the portfolio, that as of the date of the financial statements have not yet been identified as potential problem loans. Through established credit practices, we adjust the allowance for loan losses accordingly. However, because future events are uncertain, there may be loans that deteriorate, some of which could occur in an accelerated time frame. As a result, future additions to the allowance may be necessary. Because the loan portfolio contains a number of commercial loans, commercial real estate and construction loans with relatively large balances, deterioration in the credit quality of one or more of these loans may require a significant increase to the allowance for loan losses. Future additions to the allowance may also be required based on changes in the financial condition of borrowers, such as have resulted due to the current economic conditions. Additionally, federal and local banking regulators throughout our market area, as an integral part of their supervisory function, periodically review our allowance for loan losses. These regulatory agencies may require us to recognize further loan loss provisions or charge-offs based upon their judgments, which may be different from ours. Any increase in the allowance for loan losses would have an adverse effect, which may be material, on our financial condition and results of operation.

Further discussion of the management of credit risk appears under "*Provision for Loan Losses*" and "*Allowance for Loan Losses*".

Non-Interest Income

While net interest income remains the largest single component of total revenues, non-interest income is an important component, as well. In total, the Bank received \$10.8 million in non-interest income during 2014, a decrease of \$879 thousand from the \$11.7 million recorded for 2013, and less than the \$12.6 million received in 2012. The decrease from 2013 to 2014 is due in part to reductions in income from providing merchant services and net gains on investment securities to \$1.3 million and \$471 thousand, respectively, for 2014, down from \$2.4 million and \$627 thousand, respectively, in 2013. These were partially offset by an increase in cardholder income, from \$971 thousand in 2013 to \$1.3 million in 2014.

Non-Interest Expense

Management considers the control of operating expenses to be a critical element of the performance of the Company and the Bank. Over the last several years, the Bank has undertaken initiatives to contain its non-interest expense and improve its efficiency. Nevertheless, total non-interest expense was \$55.7 million for year ended December 31, 2014, compared to \$54.4 million for year ended December 31, 2013, and increase of \$1.2 million. This increase was largely the result of increasing costs associated with salaries and employee benefits, from \$25.5 million in 2013 to \$26.1 million in 2014, higher professional services expenses and contract services expense, which increased by \$420 thousand and \$398 thousand, respectively, a rise in furniture and equipment depreciation expense, which was up by \$263 thousand, and an increase in general, administrative and other expenses by \$190 thousand. These increases were partially offset by reductions of \$846 thousand in expenses associated with other real estate owned and of \$161 thousand in Federal Deposit Insurance Corporation assessments. Operating expenses in 2013 were \$1.1 million higher than in 2012, primarily due to a \$996 thousand increase in expenses associated with other real estate owned, a \$607 thousand increase in occupancy expense, and an increase of \$358 thousand in Federal Deposit Insurance Corporation assessments, partially offset by reductions of \$268 thousand in professional services expense, \$143 thousand in furniture and equipment depreciation, and \$140 thousand in stationery and supplies expense from their levels in 2012.

Capital Management

As part of its asset and liability management process, the Company continually assesses its capital position to take into consideration growth, expected earnings, risk profile and potential corporate activities that it may choose to pursue.

During the past several years, the Bank's principal source of increases in capital has been retained earnings, supplemented by stock purchases through our Employee Stock Purchase Plan. See Note 14 of *Notes to Consolidated Financial Statements* in Item 15 of this Annual Report for a description of the Employee Stock Purchase Plan. Since the end of 2010, though, the Bank's assets have grown by 48.0%, and those sources of additional capital have not kept pace.

Although the Bank remains "well capitalized" by all three regulatory measures of capital adequacy, those ratios have been decreasing because of the Bank's rapid growth. Consequently, the Company completed a private placement of \$1.0 million of its common stock on December 17, 2014.

In the offering, the Company issued its stock to certain "accredited investors" within the meaning of Rule 501 of the Securities Act of 1933, as amended (the "Securities Act"), at a purchase price of \$9.45 per share (the "Offering"). These are restricted shares, which may not be resold for a period of two years. The terms of the offering were set forth in a Stock Purchase Agreement, dated December 10, 2014, entered into between the Company and each investor. The proceeds from the offering will allow the Company to support the continued organic growth of the Company's banking subsidiary in its existing market areas and will enable us to further serve the needs of individuals and businesses in those markets.

The Company's common stock was offered and sold only to investors that met the "accredited investor" definition of Rule 501 of the Securities Act in reliance on the exemption from registration afforded under Section 4(2) of the Securities Act and Rule 504 of Regulation D under the Securities Act. The common stock offered in the Offering has not been registered under the Securities Act or state securities laws, and may not be offered or sold in the United States without being registered with the Securities and Exchange Commission (the "SEC") or through an applicable exemption from SEC registration requirements.

Results of Operations

The Bank earns income from two primary sources. The first is net interest income, which is interest income generated by earning assets less interest expense on interest-bearing liabilities. The second is non-interest income, which primarily consists of service fees and charges, net investment securities gains, income from merchants for processing credit and debit card transactions, and non-interest income from holders of the Bank's credit cards. The majority of the Company's non-interest expenses are operating costs that relate to providing a full range of banking services to our customers.

Net Interest Income and Net Interest Margin

The level of net interest income depends on several factors in combination, including earning assets, yields on earning assets, the cost of interest-bearing liabilities, and the relative volumes of earning assets and interest-bearing liabilities. To maintain its net interest margin, the Bank must manage the relationship between interest earned and interest paid.

The following Distribution, Rate and Yield table presents the average amounts outstanding for the major categories of the Company's balance sheet, the average interest rates earned or paid thereon, and the resulting net interest margin on average interest earning assets for the periods indicated. Average balances are based on monthly averages.

Distribution, Rate and Yield

	Years Ended December 31,					
	2014			2013		
	Average Balance	Interest Earned/Paid	Average Yield/Rate	Average Balance	Interest Earned/Paid	Average Yield/Rate

¹ Includes interest bearing deposit balances we maintain with other financial institutions and the Federal Reserve Bank of San Francisco.

² Includes all investment securities in the Available-for-Sale and the Held-to-Maturity classifications.

³ Includes average balances of non-accrual loans.

The Distribution, Rate and Yield table above sets forth the dollar amounts in interest earned and paid for each major category of interest earning assets and interest-bearing liabilities for the noted periods, as well as their respective yields and costs, and the resulting interest rate spreads and net interest margins.

The Bank's net interest margin, expressed as a percentage of average earning assets, was 4.52% for 2014, down 19 basis points from 4.81% for 2013, even though average earning assets increased by 13.6% during the year, from \$1.2 billion in 2013 to \$1.4 billion in 2014. The primary reason for the decrease in the net interest margin was that, although average loan balances increased by \$93.2 million, or 11.2%, the average yield on the entire loan portfolio decreased by 43 basis points so that interest earnings on loans increased by only \$2.6 million, or 4.4%. Re-pricing of existing loans to lower interest rates during 2014, as well as new loans made in a more competitive environment, caused the decrease in the average yield on the loan portfolio. Yields on interest earning deposits in other banks and investment securities decreased by 10 basis points and 17 basis points, respectively, also contributing to the overall 41 basis point decline in the yield on average earning assets from 2013 to 2014. Average total interest-bearing liabilities increased by 11.1% during 2014, to \$979.9 million from \$882.1 million the previous year, yet the cost of deposits and other borrowings decreased by 16 basis points, to 0.38% in 2014 from 0.54% in 2013, principally as a result of a reduction in the interest rate paid on consumer savings deposits.

Net interest income for the year ended December 31, 2014, increased \$3.9 million, to \$62.7 million, compared to \$58.8 million a year earlier, primarily due to an increase in interest income derived from the growth in average loan balances, supplemented by an increase in income from investment securities and a reduction in interest paid on money market and savings deposits and other borrowings. Net interest income for 2013 increased by \$2.1 million from 2012, primarily due to an increase in interest income derived from the increase in average loan balances, coupled with the reduction in interest paid on interest-bearing deposits, and partially offset by a decrease in income from investment securities. The Bank's net interest margin was 4.81% in 2013, compared to 5.01% in 2012, a decrease of 20 basis points.

A substantial portion of the Bank's earning assets are variable-rate loans that re-price when the Bank's reference rate, which usually corresponds with the New York prime lending rate, is changed. This is in contrast to a large base of core deposits that are generally slower to re-price. This causes the Bank's balance sheet to be asset-sensitive, which means that, all else being equal, net interest margin will be higher during periods when short-term interest rates are rising and lower when rates are falling. However, because the interest rate on our personal savings accounts is higher than our competitors', we will not necessarily have to raise rates on that portion of our core deposits as general market interest rates increase, mitigating the sensitivity of our net interest margin to rising interest rates.

Provision for Loan Losses

Credit risk is inherent in the lending business. The Bank establishes an allowance for loan losses through charges to earnings, which are shown in the statements of income as the provision for loan losses. Specifically identifiable and quantifiable known losses are promptly charged off against the allowance. The provision for loan losses is allocated monthly and evaluated quarterly through a determination of the adequacy of the Bank's allowance for loan losses, and reset if necessary, charging the shortfall, if any, to the current quarter's expense. This has the effect of creating variability in the amount and frequency of charges to the Bank's earnings. The provision for loan losses and level of allowance for each period are dependent upon many factors, including loan growth, net charge-offs, changes in the composition of the loan portfolio, delinquencies, management's assessment of the quality of the loan portfolio, the valuation of problem loans and the general economic conditions in the Bank's market area.

For 2014, the Bank had a provision for loan losses of \$4.5 million, compared to a provision for loan losses of \$2.1 million for 2013 and \$3.9 million for 2012. The provision for loan losses increased by \$2.4 million in 2014 from the previous year primarily as a result of the write-down two commercial loans by \$1.6 million against the allowance for loan losses in the third and fourth quarters of 2014. The Bank also raised the monthly provision in the fourth quarter to cover the risk associated with growth in our loan portfolio. The 2014 provision is deemed by management to provide a sufficient allowance for loan losses due to net losses during the year, as well as to maintain the allowance for loan losses at a level that is adequate to absorb all reasonably expected future losses and to reflect management's perception of risk in the existing loan portfolio, as well as improvements in the quality of that portfolio and more successful collection efforts. The decrease in the 2013 provision for loan losses compared to 2012 reflects a better than expected risk profile and overall performance of the loan portfolio, as well as management's reassessment of economic conditions.

The allowance for loan losses represented 1.28%, 1.38% and 1.60% of total loans at December 31, 2014, 2013 and 2012, respectively. Provisions for loan losses are charged to operating income to bring the allowance for loan losses to a level deemed appropriate by the Bank based on the factors discussed under "*Allowance for Loan Losses.*"

Non-interest income

The following table sets forth the various components of the Company's non-interest income:

	Years Ended December 31,			Increase (decrease) 2014 versus 2013		Increase (decrease) 2013 versus 2012	
	2014	2013	2012	Amount	Percent	Amount	Percent
(Dollars in thousands)							
Non-interest Income							
Service charges and fees	\$ 4,557	\$ 4,416	\$ 4,118	\$ 141	3.2%	\$ 298	7.2%
Investment securities gains, net...	471	627	1,351	(156)	-24.9%	(724)	-53.6%
Income from merchants	1,334	2,365	2,233	(1,031)	-43.6%	132	5.9%
Income from cardholders	1,322	971	1,260	351	36.1%	(289)	-22.9%
Trustee fees	492	616	811	(124)	-20.1%	(195)	-24.0%
Other income	2,637	2,697	2,794	(60)	-2.2%	(97)	-3.5%
Total non-interest income.....	<u>\$ 10,813</u>	<u>\$ 11,692</u>	<u>\$ 12,567</u>	<u>\$ (879)</u>	<u>-7.5%</u>	<u>\$ (875)</u>	<u>-7.0%</u>

Total non-interest income in 2014 was \$879 thousand, or 7.5%, lower than in 2013, primarily because of a sharp decrease of \$1.0 million, or 43.6%, in income from merchant services due to lower settlement fees and higher processing fees as we convert our merchant customers to a new vendor platform, and a \$156 thousand decrease in net gains on the sale of investment securities, partially offset by a \$351 thousand increase in income from cardholders. The proportional composition of non-interest income remained relatively constant, except that service charges and fees increased from 37.8% to 42.1% of the total while income from merchant services decreased from 20.2% to 12.3% of the total and income from cardholders increased from 8.3% to 12.2% of the total. Other sources of non-interest income include loan servicing fees and income from the Bank-owned life insurance policies. Total non-interest income in 2013 was \$875 thousand lower than in 2012, but its composition changed due to there being a reduction of \$724 thousand in net investment securities gains, to \$627 thousand, a \$298 thousand decrease in income from cardholders, and a \$195 thousand decrease in trustee fees. These decreases were partially offset by a \$298 thousand increase in income from service charges and fees.

Non-interest expense

The following table sets forth the various components of the Company's non-interest expense:

	2014	2013	2014 vs. 2013		2012	2013 vs. 2012		
			\$ Variance	% Variance		\$ Variance	% Variance	
Non-Interest Expense:

Contract services.....	1,694	3%	1,296	2%	1,356	3%
Other real estate owned	297	1%	1,143	2%	147	0%
Stationery & supplies.....	826	1%	724	1%	864	2%
Training & education.....	736	1%	687	1%	639	1%
General, administrative & other	6,540	12%	6,350	12%	6,418	12%
Total Non-Interest Expenses	<u>\$ 55,675</u>	100%	<u>\$ 54,447</u>	100%	<u>\$ 53,354</u>	100%

Non-interest expense totaled \$55.7 million for the year ended December 31, 2014, an increase of \$1.2 million from \$54.4 million in 2013. This increase is primarily attributed to the \$657 thousand increase in salaries & employee benefits, up by 2.6% from the year ended December 31, 2013, due to merit raises and increases in some benefits expenses. In addition, professional services expense increased by \$420 thousand, contract services expense increased by \$398 thousand and furniture & equipment expense increased by \$263 thousand, along with a \$190 thousand increase in our general, administrative and other expenses. These increases were partially

offset by the \$846 thousand decrease in other real estate owned (OREO) expense to a more normal level after a surge in 2013, and a \$161 thousand decline in the Federal Deposit Insurance Corporation's assessment.

In 2013, total non-interest expense increased by \$1.1 million to \$54.4 million, as compared to \$53.4 million in 2012. This increase is primarily attributed to the \$996 thousand increase in other real estate owned expense, due in part to the write-down of a property in California. In addition, occupancy expense increased by \$607 thousand, along with a \$358 thousand increase in the Federal Deposit Insurance Corporation's assessment. These increases were partially offset by the \$268 thousand decrease in professional services expense.

Income Tax Expense

The Company computes its provision for income taxes on a monthly basis. The effective tax rate is determined by applying the Bank's statutory income tax rate to pre-tax book income, as adjusted for permanent differences between pre-tax book income and actual taxable income. These permanent differences include, but are not limited to, tax-exempt interest income, increases in the cash surrender value of life insurance policies, certain expenses that are not allowed as tax deductions, and tax credits.

The Bank pays income taxes in Guam and the Commonwealth of the Northern Mariana Islands under a territorial "mirror" of the U.S. Internal Revenue Code, with payments made to the respective territorial governments instead of the U.S. Treasury; there is no equivalent of a state income tax in either of these jurisdictions. The Bank also pays taxes to the governments of the Republic of Palau, the Federated States of Micronesia, the Republic of the Marshall Islands and the State of California. The Bank's territorial and state income tax expense in 2014 was \$3.8 million, as compared to an income tax expense of \$4.1 million in 2013 and \$3.4 million in 2012.

The difference in the effective tax rate compared to the combined territorial, foreign and state statutory tax rates of 34% is primarily the result of the Bank's portfolio of tax-exempt loans to the government of Guam totaling \$47.9 million and \$28.7 million at December 31, 2014 and 2013, respectively.

Some items of income and expense are recognized in different years for tax purposes than when applying generally accepted accounting principles, leading to timing differences between the Bank's actual tax liability and the amount accrued for this liability based on book income. These temporary differences comprise the "deferred" portion of the Bank's tax expense or benefit, which is accumulated on the Bank's books as a deferred tax asset or deferred tax liability until such time as they reverse. At the end of 2014 and 2013, the Bank had a net deferred tax asset of \$5.5 million.

Realization of the net deferred tax assets is primarily dependent upon the Bank generating sufficient taxable income to obtain a benefit from the reversal of net deductible temporary differences, utilization of tax credit carry-forwards and the net operating loss carry-forwards for Guam, the Commonwealth of the Northern Mariana Islands and California state income tax purposes. The amount of deferred tax assets considered realizable is subject to adjustment in future periods based on estimates of future taxable income. Under generally accepted accounting principles, a valuation allowance is required to be recognized if it is "more likely than not" that a deferred tax asset will not be realized. The determination of whether the deferred tax assets will actually be realized is highly subjective and dependent upon judgment concerning management's evaluation of both positive and negative evidence, including forecasts of future income, cumulative losses, applicable tax planning strategies, and assessments of current and future economic and business conditions.

In assessing the realization of deferred tax assets at December 31, 2014, based on these factors, the Bank believed that it was more likely than not that the Bank will realize only \$5.5 million of the benefits of these deductible differences. Therefore, a valuation allowance of \$2.3 million for deferred tax asset was recorded at December 31, 2014.

In assessing the realization of deferred tax assets at December 31, 2013, the Bank believed that it was more likely than not that the Bank will realize only \$6.6 million of the benefits of these deductible differences. Therefore, a valuation allowance of \$2.0 million for deferred tax asset was recorded at December 31, 2013.

Financial Condition

As of December 31, 2014, total assets were \$1.47 billion, an increase of 14.2% from \$1.28 billion at December 31, 2013. Total securities available-for-sale (at fair value) were \$230.6 million, an increase of 26.1% from \$182.8 million at December 31, 2013. The total loan portfolio, net of allowance for loan losses and deferred fees, was \$967.4 million, an increase of 12.4% from \$860.9 million at year-end 2013. Total deposits were \$1.36 billion, an increase of 14.5% from \$1.18 billion at year-end 2013. The Bank had no short-term borrowings at December 31, 2014.

Securities Portfolio

The following table reflects the estimated fair value of Available-for-Sale securities and the amortized cost of Held-to-Maturity securities, for each category for the past two years:

Investment Portfolio

	December 31, 2014

Total	\$ 231,541	\$ 230,557	\$ 105,280	\$ 107,008

The securities portfolio is the second largest component of the Bank's interest earning assets, and the structure and composition of this portfolio is important to an analysis of the financial condition of the Bank and the Company. The portfolio serves the following purposes: (i) it provides a source of pledged assets for securing certain deposits and borrowed funds, as may be required by law or by specific agreement with a depositor or lender; (ii) it can be used as an interest rate risk management tool, since it provides a large base of assets, the maturity and interest rate characteristics of which can be changed more readily than the loan portfolio to better match changes in the deposit base and other funding sources of the Bank; and (iii) it is an alternative interest earning use of funds when loan demand is weak or when deposits grow more rapidly than loans.

Sixty-nine percent of the Bank's securities at December 31, 2014, were classified under existing accounting rules as "Available-for-Sale" to allow flexibility in the management of the portfolio. Accounting guidance requires Available-for-Sale securities to be marked to fair market value, with an offset to other comprehensive income (loss), a component of stockholders' equity, recorded on a quarterly basis. The remaining 31% of the investment portfolio was in Held-to-Maturity securities, which the Bank is willing and believes it will be able to retain until they mature, and are recorded on an amortized cost basis.

The Bank's portfolio has historically been comprised primarily of: (i) U.S. Government sponsored entities' debt securities for liquidity and pledging; (ii) mortgage-backed securities, which in many instances can also be used for pledging, and which generally enhance the yield of the portfolio; (iii) municipal obligations, which provide tax free income and limited pledging potential; and (iv) collateralized mortgage obligations, which generally enhance the yield of the portfolio. Since the downgrade of many municipal obligations and their respective insurers in the past few years, the Bank no longer holds municipal bonds, but may do so again when markets become more stable.

Compared to December 31, 2013, the Bank's securities portfolio increased by \$64.0 million to 22.9% of total assets at December 31, 2014, from 21.2% at December 31, 2013. The Bank decreased its holding of mortgage-back securities by \$60.1 million to \$122.9 million at December 31, 2014, from \$183.1 million at December 31, 2013. During the same period, the Bank's holdings of U.S. government agency pool securities increased by \$12.1 million, to \$68.0 million, and its holdings of U.S. government agency and sponsored enterprise debt securities increased by \$112.1 million. The Bank has not used interest rate swaps or other derivative instruments to hedge fixed rate loans or securities to otherwise mitigate interest rate risk.

Loans

The Bank's loans represent the largest portion of earning assets, substantially greater than the securities portfolio or any other asset category, and the quality and diversification of the loan portfolio is an important consideration when assessing the financial condition of the Bank and the Company.

Gross loans represented 67.0% of total assets at December 31, 2014, as compared to 68.2% at December 31, 2013. The ratio of gross loans to deposits decreased to 72.5% at the end of 2014 from 74.0% at the end of 2013. Demand for loans has strengthened within the Bank's Guam, California and Freely Associated States markets due to the improving economic environment, but the Bank has remained selective with respect to the types of loans it chooses to originate. However, the purchase of \$100.3 million in mortgage and consumer loans from Wells Fargo Financial in December 2011 helped the Bank to grow its loan portfolio substantially during that year, and \$69.9 million of those loans remained on the Bank's books at December 31, 2014.

The Loan Distribution table that follows sets forth the Bank's gross loans outstanding, deferred fee income amortized over the life of some loans, the allowance for loan losses and the percentage distribution in each loan category at the dates indicated.

The Bank's loan portfolio is concentrated in commercial loans (which include loans to governments), primarily in commercial real estate, hotels and gas stations, with the balance in working capital and equipment financing. These are followed by other consumer loans and residential mortgages and. The increase in the Bank's loan portfolio in 2014 was due to customary loan activity throughout our markets, the addition of several significant commercial loans in both the San Francisco and Guam regions, and consumer loan promotions. The Bank's gross loans were concentrated in Guam, San Francisco and the Commonwealth of the Northern Mariana Islands, at 95.1% as of December 31, 2014, compared to 95.2% as of December 31, 2013. The only industry concentration that was considered significant at December 31, 2014, was within our commercial real estate loan portfolio, which at 44.8% of total gross loans constituted a higher proportion than the 43.6% of total loans at the end of 2013.

The Bank's commercial loans are made for working capital, financing the purchase of equipment or for other business purposes. Commercial loans include loans with maturities ranging from thirty days to one year and "term loans" with maturities normally ranging from three to ten years. Short-term business loans are generally intended to finance current transactions and typically provide for periodic principal payments, with interest payable monthly. Term loans normally carry floating interest rates, with monthly payments of both principal and interest, but may be amortized over a longer period than the term of the loan, with a balloon payment at the end of the term.

The Bank is an active participant in the Small Business Administration (SBA), State Small Business Credit Initiative (SSBCI), Nor-Cal Financial Development Corp. and U.S. Department of Agriculture guaranteed lending programs, and has been approved by the SBA as a lender under the Preferred and Patriot Express Lender Programs. The Bank regularly makes such guaranteed loans and is often recognized as the largest originator of SBA loans in Guam, with an outstanding volume of \$10.5 million at December 31, 2014.

As of December 31, 2014, commercial and residential real estate loans of \$581.7 million consist primarily of adjustable and fixed rate loans secured by deeds of trust or mortgages on commercial and residential property, and comprised 59.2% of the total loan portfolio. The Bank's commercial mortgages at December 31, 2014, consist of \$399.7 million, or 40.7% of gross loans. Commercial construction loans comprise \$40.0 million, or 4.1%, of gross loans. Residential mortgages were \$142.0 million, or 14.5%, of gross loans. Properties securing the commercial and residential real estate loans are located in the Bank's primary markets, which include the San Francisco Bay area.

The Bank's commercial real estate loans consist primarily of loans based on the borrower's cash flow and are secured by deeds of trust or mortgages on commercial and residential property to provide a secondary source of repayment. The Bank generally restricts commercial real estate term loans to no more than the lower of 75% of the property's appraised value or the purchase price of the

property during the initial underwriting of the credit, depending on the type of property and its utilization. The Bank offers both fixed and floating rate loans. Maturities on commercial real estate loans are generally five years (with amortization up to twenty-five years and a balloon payment due at maturity), and maturities on residential mortgage loans are typically between 15 and 30 years, with many of those loans sold to the Federal Home Loan Mortgage Corporation with the retention of servicing rights. SBA and certain other real estate loans that can be sold in the secondary market may be granted for longer maturities.

The Bank's construction loans primarily finance the development and construction of commercial and residential properties. The Bank uses underwriting guidelines to assess the likelihood of repayment from sources such as sale of the property or availability of permanent mortgage financing prior to making the construction loan. Construction loans increased \$39.3 million to \$40.0 million at December 31, 2014, from \$697 thousand at December 31, 2013.

Additionally, the Bank makes consumer loans for the purpose of financing automobiles, various types of consumer goods, and other personal purposes. Consumer loans generally provide for the monthly payment of principal and interest. Most of the Bank's consumer loans are either unsecured, secured by the personal property being purchased or, in the instances of home equity loans, real property.

At December 31, 2014, total gross loans increased by \$107.1 million, or 12.2%, to \$982.3 million from \$875.2 million at December 31, 2013. The increase in loans was largely attributed to an \$85.1 million increase in commercial loans to \$649.6 million at December 31, 2014, from \$564.5 million at December 31, 2013. This was due to several large loans originated in California and in Guam. By category, the increase in commercial loans was due to a \$39.3 million growth in commercial construction loans, \$26.5 million growth in the commercial & industrial loans, supplemented by a \$19.3 million increase in commercial mortgage loans. The increase in commercial loans was supplemented by a \$22.0 million increase in consumer loans to \$332.7 million at December 31, 2014, up from \$310.7 million at December 31, 2013. The increase in consumer loans was principally due to growth of \$22.1 million in other consumer loans as a result of pre-approved loans and a holiday loan promotion, and \$11.7 million in automobile loans. The growth of other consumer loans and automobile loans was offset by an \$11.7 million decrease in residential mortgages, due to principal paydowns, payoffs and refinancing with the Federal Home Loan Mortgage Corporation in response to favorable interest rates.

At December 31, 2014, loans outstanding were comprised of approximately 65.82% variable rate loans and 34.18% fixed rate loans.

Since it first opened in 1972, the Bank has expanded its operations and its branch network, first in Guam, then in the other islands of our region and in San Francisco, California. In the interests of enhancing performance and stability through market and industry diversification, the Bank has increased its focus on growth in the San Francisco area in recent years, adding personnel with experience and expertise in the Bay Area. The following table provides figures for loans in the Bank's administrative regions for the years ending December 31, 2012, 2013 and 2014:

	At December 31,		
	2012	2013	2014
Guam	\$ 498,728	\$ 550,380	\$ 631,889
Commonwealth of the Northern Mariana Islands.....	\$ 65,703	\$ 66,252	\$ 66,055
The Freely Associated States of Micronesia *	\$ 40,618	\$ 41,030	\$ 47,227
California.....	\$ 143,783	\$ 203,221	\$ 222,222
Total	<u>\$ 748,832</u>	<u>\$ 860,883</u>	<u>\$ 967,393</u>

* The Freely Associated States are comprised of the Federated States of Micronesia (Chuuk, Kosrae, Pohnpei and Yap), the Republic of Palau and the Republic of the Marshall Islands.

As the table indicates, the Bank's total net loans increased by 12.4% during 2014 and by 15.0% during 2013. Total loans in Guam increased by \$81.5 million, or 14.8%, accounting for 76.5% of total portfolio growth. Loan growth in California was a distant second at \$19.0 million, or 17.8% of total loan growth, and outstanding loans in the Freely Associated States of Micronesia grew by \$6.2 million, or 15.1%. For the two years ended December 31, 2014, Guam accounted for 60.9% of total loan growth and California contributed 35.9%. Although the economy in the Commonwealth of the Northern Mariana Islands is recovering at a more rapid pace, loan growth has not yet caught up.

Loan Maturities

The following table presents the maturity distribution of the Bank's loans as of December 31, 2014. The table shows the distribution of such loans between those with predetermined (fixed) interest rates and those with variable (floating) interest rates. Floating rates generally fluctuate with changes in the New York prime rate, as reflected in The Wall Street Journal, and the Bank of Guam prime rate.

Loan Maturities

	At December 31, 2014				
	Due in Less Than 1 Year	Due in More Than 1 Year But Less Than 5 Years	Due in More Than 5 Years	Non-Accrual	Total

Total.....	<u>\$ 26,673</u>	<u>\$ 493,875</u>	<u>\$ 443,619</u>	<u>\$ 18,107</u>	<u>\$ 982,274</u>

Loan Servicing

As of December 31, 2014 and 2013, there were \$213.8 million and \$208.6 million, respectively, in Federal Home Loan Mortgage Corporation loans that were serviced by the Bank.

Loan servicing rights are included in Accrued Interest Receivable and Other Assets on the consolidated balance sheets, and are reported net of amortization. There was no valuation allowance as of December 31, 2014 and 2013, as the fair market value of the assets was greater than the carrying value.

Nonperforming Assets

Financial institutions generally have a certain level of exposure to credit quality risk, and could potentially receive less than a full return of principal and interest if a debtor becomes unable or unwilling to repay. Since loans are the most significant assets of the Bank and generate the largest portion of its revenues, the Bank's management of credit risk is focused primarily on loan quality.

Banks have generally suffered their most severe earnings declines as a result of customers' inability to generate sufficient cash flow to service their debts, and/or downturns in national and regional economies and declines in overall asset values, including real estate prices.

The Bank's credit policies identify allowable geographic credit concentrations. In addition, these policies establish the Bank's underwriting standards and the methods of monitoring credit quality on an ongoing basis. The Bank's internal credit risk controls are focused on underwriting practices, credit originating procedures, training, risk management techniques, and familiarity with loan customers, as well as the relative diversity and geographic concentration of our loan portfolio.

The Bank's credit risk may also be affected by external factors, such as the level of interest rates, employment, general economic conditions, real estate values, and trends in particular industries or geographic markets. As an independent community bank serving a specific geographic area, the Bank must contend with the unpredictable changes in the general regional market and, particularly, primary local markets. The Bank's asset quality has been affected in the past by the impact of national and regional recessions, consumer bankruptcies, and depressed real estate values.

Nonperforming assets are comprised of the following: loans for which the Bank is no longer accruing interest; restructured loans; loans 90 days or more past due and still accruing interest (although they are generally placed on non-accrual when they become 90 days past due, unless they are both well-secured and in the process of revision or collection); and other real estate owned ("OREO") from foreclosures. Management's classification of a loan as "non-accrual" is an indication that there is reasonable doubt as to the full recovery of principal or interest on the loan. At that point, the Bank stops accruing interest income, and reverses any uncollected interest that had previously been accrued. The Bank begins recognizing interest income again only as cash interest payments are received and it has been determined the collection of all outstanding principal is no longer in doubt. These loans may or may not be

collateralized, and collection efforts are pursued. Loans may be restructured by management when a borrower has experienced some change in financial status causing an inability to meet the original repayment terms and where the Bank believes the borrower will eventually overcome those circumstances and make full repayment. OREO consists of properties acquired by foreclosure or similar means that management is offering or will offer for sale. Total OREO, net of OREO reserves, was \$4.5 million at December 31, 2014, compared to \$4.6 million at December 31, 2013.

Nonperforming Assets

The following table provides nonperforming assets by asset type as of December 31, 2014 and 2013:

	December 31,	
	2014	2013
	(Dollars in Thousands)	
Non-performing Assets:		
Non-accrual Loans past due 30 days or more	\$ 9,386	\$ 10,343

Total Consumer	6,168	6,168
Total Nonperforming Loans	\$ 10,613	\$ 11,250

Allowance for Loan Losses

The Bank maintains its allowance for loan losses at a level which, in management's judgment, is adequate to absorb prospective credit losses inherent in the loan portfolio as of the balance sheet date. The amount of the allowance is based on management's evaluation of the collectability of the loan portfolio, including the nature and volume of the portfolio, credit concentrations, trends in historical loss experience, the level of certain classified and impaired loans, and economic conditions, along with their related impacts on specific borrowers and industry groups. The allowance is increased by provisions for loan losses, which are charged against earnings, and reduced by charge-offs, net of recoveries. Because of uncertainties inherent in the estimation process, management's estimate of potential credit losses in the loan portfolio and the related allowance may change from time to time.

The Bank's allowance for loan losses increased by \$449 thousand to \$12.53 million in 2014 from \$12.08 million at the end of 2013. The increase in the allowance for loan losses in 2014 was based on management's periodic reevaluations of its inherent risk. Due to this reevaluation, the Bank increased its monthly provision from \$325 thousand to \$375 thousand. The Bank had \$6.0 million in charge-offs in 2014, which were partially offset by loan recoveries of \$1.9 million.

Net loans charged-off includes the realization of losses in the portfolio that were partially recognized previously through provisions for loan losses and write-downs of loan principal valuations. Net charge-offs were \$4.1 million in 2014, significantly greater than the net charge-offs of \$2.2 million in 2013, and the net charge-offs of \$2.8 million in 2012, primarily because of two large loan write-downs in the third and fourth quarters of 2014. Historical net loan charge-offs are not necessarily indicative of the amount of net charge-offs that the Bank will realize in the future.

The table in Note 6 – Loans, under *Credit Quality Indicators*, provides a summary of the allocation of the allowance for loan losses for specific categories at the dates indicated. The allocation presented should not be interpreted as an indication that charges to the allowance for loan losses will be incurred in these amounts or proportions, or that the portion of the allowance allocated to each category represents the total amount available for charge-offs that may occur within these categories.

Allocation of Loan Loss Allowance

The material set forth in Note 6 of Notes to Consolidated Financial Statements in Item 15 of this Annual Report on Form 10-K is incorporated by reference.

Goodwill

On September 15, 2011, the FASB issued ASU No. 2011-08 “*Testing Goodwill for Impairment*”, which gives entities testing goodwill for impairment the option of performing a qualitative assessment before calculating the fair value of a reporting unit in Step 1 of the goodwill impairment test. Under this amendment, an entity would not be required to calculate the fair value of a reporting unit unless the entity determines, on the basis of qualitative factors, that it is more likely than not that its fair value is less than the carrying amount. The ASU is effective for all entities for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. The adoption of ASU No. 2011-08 has not had and is not expected to have a material impact on the Bank’s statements of income and condition.

Deposits

The composition and cost of the Bank’s deposit base are important components in analyzing the Bank’s net interest margin and balance sheet liquidity characteristics, both of which are discussed in greater detail in other sections in this report. The Bank’s liquidity is impacted by the volatility of deposits or other funding instruments or, in other words, by the propensity of that money to leave the institution for interest rate-related or other reasons. Deposits can be adversely affected if economic conditions in the Bank’s market area weaken. Potentially, the most volatile deposits in a financial institution are jumbo certificates of deposit, meaning time deposits with balances that equal or exceed \$100,000, as customers with balances of that magnitude are typically more rate-sensitive than customers with smaller balances.

The following table summarizes the distribution of deposits for the periods indicated:

	December 31,	
	2014	2013
	(Dollars in Thousands)	
Non-interest bearing deposits	\$ 391,108	\$ 321,408
Interest bearing deposits		
Demand deposits	144,601	127,642
Regular Savings.....	579,983	534,530
Time deposits:		
\$100,000 or more	42,500	43,299
Less than \$100,000	13,203	12,553
Other interest bearing deposits	184,119	144,013
Total Interest bearing deposits	<u>964,406</u>	<u>862,037</u>
Total Deposits.....	<u>\$ 1,355,514</u>	<u>\$ 1,183,445</u>

The Bank gathers deposits from among the communities it serves. The Bank’s business is not generally seasonal in nature, and the Bank is not primarily dependent upon funds from sources outside the United States of America, but approximately 21.1% of its deposit base at December 31, 2014, is acquired in the Micronesian islands that are politically organized in free association with the United States and use the U.S. dollar as their currency. At December 31, 2014 and 2013, 32.76% and 29.42% of deposits were from domestic and foreign government sources, respectively.

Non-interest and low interest-bearing demand deposits increased \$86.7 million, or 19.3%, to \$535.7 million at December 31, 2014, compared to \$449.1 million at December 31, 2013.

As mentioned earlier, the Bank has expanded its operations and its branch network since it first opened in 1972, first in Guam, then in the other islands of our region and in San Francisco, California. As time has passed, the Bank has gathered market share in each of the islands. In recent years, in order to diversify its geographic market, the Bank has increased its focus on growth in the San Francisco area. The following table provides figures for deposits in the Bank's administrative regions for the years ending December 31, 2012, 2013 and 2014:

	At December 31,		
	2012	2013	2014
Guam	\$ 640,893	\$ 645,056	\$ 792,378
Commonwealth of the Northern Mariana Islands.....	\$ 180,220	\$ 207,402	\$ 230,654
The Freely Associated States of Micronesia *	\$ 212,722	\$ 254,900	\$ 285,509
California.....	\$ 68,705	\$ 76,087	\$ 46,973
Total	<u>\$ 1,102,540</u>	<u>\$ 1,183,445</u>	<u>\$ 1,355,514</u>

* The Freely Associated States are comprised of the Federated States of Micronesia (Chuuk, Kosrae, Pohnpei and Yap), the Republic of Palau and the Republic of the Marshall Islands.

During 2014, deposits increased by a total of \$172.1 million, of which \$147.3 million, or 85.6%, was in the Bank's Guam branches. Deposits increased in our Freely Associated States branches by \$30.6 million and increased in our CNMI branches by \$23.3 million. Overall, the Bank's deposit base increased by 14.5% during 2014, and by 7.3% during 2013. In contrast, deposits decreased in the California region by 38.3% in the year ended December 31, 2014, after increasing by 10.7% during 2013. The California region accounted for an offset of 16.9% against total Bank deposit growth during 2014, after having contributed 9.1% of total deposit growth during 2013. The decrease of the California region's deposit base was the result of lower interest rates being offered on savings accounts in an effort to reduce the Bank's cost of funds.

Deposit Maturity Distribution

At December 31, 2014, the scheduled maturities of time deposits were as follows:

Year ending December 31,	
2015.....	\$ 52,756
2016.....	994
2017.....	309
2018.....	291
2019 and Thereafter	1,353
Total	<u>\$ 55,703</u>

The Bank provides and services government and business deposit accounts that are frequently more than \$100,000 in average balance per account. The account activity for some account types and client types necessitates appropriate liquidity management practices by the Bank to ensure its ability to fund withdrawals.

Off-Balance Sheet Arrangements

In the normal course of business, the Bank makes commitments to extend credit to its customers as long as there are no violations of any conditions established in the associated contractual arrangements. These commitments are obligations that represent a potential credit risk to the Bank, yet are not reflected in any form within the Company's consolidated balance sheets. Total unused commitments to extend credit were \$134.5 million at December 31, 2014, as compared to \$121.6 million at December 31, 2013. Unused commitments represented 13.7% and 13.9% of outstanding gross loans at December 31, 2014 and 2013, respectively.

The effect on the Bank's revenues, expenses, cash flows and liquidity from the unused portion of the commitments to provide credit cannot be reasonably predicted, because there is no certainty that these lines of credit will ever be fully utilized, if at all. For more information regarding the Company's off-balance sheet arrangements, see Note 16 to the financial statements located elsewhere herein.

The following table presents the Bank's commitments to extend credit for the periods indicated:

	December 31,	
	2014	2013
Commitments to extend credit	<u>\$ 134,525</u>	<u>\$ 121,618</u>
Letters of credit:		
Standby letters of credit.....	\$ 48,451	\$ 47,543
Other letters of credit.....	<u>2,684</u>	<u>2,582</u>
Total	<u>\$ 51,135</u>	<u>\$ 50,125</u>

Contractual Obligations

The Bank utilizes facilities, equipment and land under various operating leases with terms ranging from 1 to 99 years. Some of these leases include scheduled rent increases. The total amount of the rent is being debited to expense on the straight-line method over the lease terms in accordance with ASC Topic 840, "Leases". The Bank has recorded a deferred obligation of \$820 thousand and \$760 thousand as of December 31, 2014 and 2013, respectively, which has been included within other liabilities, to reflect the excess of rent expense over cash paid on the leases.

At December 31, 2014, annual lease commitments under the above noncancelable operating leases were as follows:

Years ending December 31,	
2015.....	\$ 1,411
2016.....	1,203
2017.....	977
2018.....	762
2019 and Thereafter	<u>17,783</u>
Total.....	<u>\$ 22,136</u>

The Bank leases certain facilities from two separate entities in which two of its directors have separate ownership interests. Lease payments made to these entities during the years ended December 31, 2014, 2013 and 2012 approximated \$370, \$370 and \$358, respectively.

Additionally, the Bank leases office space to third parties, with original lease terms ranging from 3 to 5 years and option periods ranging up to 15 years. At December 31, 2014, minimum future rents to be received under non-cancelable operating sublease agreements were \$40 thousand, \$27 thousand, \$0 and \$0 for the years ending December 31, 2015, 2016, 2017 and 2018, respectively.

A summary of rental activities for years ended December 31, 2014, 2013 and 2012, is as follows:

	2014	2013	2012
Rent expense.....	\$ 2,472	\$ 2,343	\$ 2,293
Less: sublease rentals.....	<u>273</u>	<u>268</u>	<u>257</u>
Net rent expense.....	<u>\$ 2,199</u>	<u>\$ 2,075</u>	<u>\$ 2,036</u>

Liquidity and Asset/Liability Management

Liquidity refers to the Bank's ability to maintain cash flows sufficient to fund operations and to meet obligations and other commitments in a timely and cost-effective fashion. At various times the Bank requires funds to meet short-term cash requirements brought about by loan growth or deposit outflows, the purchase of assets, or liability repayments. The Bank's large base of core deposits is an integral part of its ability to manage its liquidity position appropriately. These core deposits are generated by offering traditional banking services in its service areas and have, historically, been a stable source of funds. To manage liquidity needs properly, cash inflows must be timed to coincide with anticipated outflows, or other sufficient liquid resources must be available to meet varying demands. The Bank manages cash and investment securities in order to be able to meet unexpected, sudden changes in levels of its assets or deposit liabilities without maintaining excessive amounts of balance sheet liquidity. Excess balance sheet liquidity can negatively impact the Bank's interest margin. In order to meet short-term liquidity needs, the Bank may utilize overnight Federal Funds purchases and other borrowing arrangements with correspondent banks, and use interest rate pricing to attract new deposits from local sources; it also maintains collateralized lines of credit with the FHLB and the FRB. In addition, the Bank can obtain cash for temporary needs by selling securities that it classifies as being Available-for-Sale.

At December 31, 2014, the Bank had an increase in gross loans of \$107.1 million from December 31, 2013, but was able to improve its liquidity position due to the \$172.1 million increase in its deposit base. One of the measures of liquidity is our loan-to-deposit ratio, based upon gross loans, which decreased to 72.5% at December 31, 2014, compared to 74.0% at December 31, 2013.

FHLB, FRB and Other Borrowings and Available Lines of Credit

The Bank has off-balance sheet liquidity in the form of Federal Funds purchase arrangements with correspondent banks, as well as collateralized borrowing arrangements with the FHLB and the FRB. The Bank can borrow from the FHLB on a short-term (typically overnight) or long-term (more than one year) basis. At December 31, 2014, the Bank had no long-term borrowings. The Bank had an available line of credit of \$45.9 million with the FHLB of Seattle at December 31, 2014.

The Bank can also borrow from the FRB's discount window. It had \$24.8 million of investment securities pledged to the FRB San Francisco as collateral on an available line of credit of \$24.0 million at December 31, 2014, none of which credit was outstanding.

At December 31, 2014, the Bank had arrangements for Federal Funds purchases of up to \$17.0 million from three of its U.S. correspondent financial institutions. The Bank had no Federal Funds purchases outstanding at December 31, 2014 or 2013.

At December 31, 2014, the Company had no other borrowed funds.

Capital Resources

The Bank is subject to various regulatory capital requirements administered by the United States federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Bank's consolidated financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Bank must meet specific capital guidelines that involve quantitative measures of their assets, liabilities and certain off-balance-sheet items, as calculated under regulatory accounting practices.

Quantitative measures established by regulation to ensure capital adequacy require the Bank to maintain minimum amounts and ratios (set forth in the following table) of total and Tier 1 capital (as defined in the regulations) to risk-weighted assets (as defined) and of Tier 1 capital (as defined) to average assets (as defined). Management believes, as of December 31, 2014 and 2013, that the Bank met all capital adequacy requirements to which it is subject.

As of December 31, 2014, the most recent notification from the FDIC categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, an institution must maintain minimum total risk-based, Tier 1 risk-based and Tier 1 leverage ratios as set forth in the following table. There are no conditions or events since the notification that management believes have changed the Bank's category. The Bank's actual capital amounts and ratios as of December 31, 2014 and 2013 are also presented in the table.

	<i>Actual</i>		For Capital Adequacy Purposes		To Be Well Capitalized Under Prompt Corrective Action Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
At December 31, 2014:						
Total capital (to Risk Weighted Assets).....	\$ 114,606	11.83%	\$ 77,504	8.00%	\$ 96,881	10.00%
Tier 1 capital (to Risk Weighted Assets).....	\$ 102,486	10.58%	\$ 38,752	4.00%	\$ 58,128	6.00%
Tier 1 capital (to Average Assets)	\$ 102,486	7.01%	\$ 58,520	4.00%	\$ 73,150	5.00%
At December 31, 2013:						
Total capital (to Risk Weighted Assets).....	\$ 108,238	12.53%	\$ 69,114	8.00%	\$ 86,392	10.00%
Tier 1 capital (to Risk Weighted Assets).....	\$ 97,563	11.43%	\$ 34,130	4.00%	\$ 51,195	6.00%
Tier 1 capital (to Average Assets)	\$ 97,563	7.60%	\$ 51,320	4.00%	\$ 64,151	5.00%

Market Risk

Market risk is the risk of loss of future earnings, fair values or cash flows that may result from changes in the price of a financial instrument. The value of a financial instrument may change as a result of changes in interest rates, foreign currency exchange rates, commodity prices, equity prices and other market changes that affect market risk sensitive instruments. Market risk is an attribute of all market risk sensitive financial instruments, including securities, loans, deposits and borrowings, as well as a company's role as a financial intermediary in customer-related transactions. The objective of market risk management is to avoid excessive exposure of the company's earnings and equity to loss, and to reduce the volatility inherent in certain types of financial instruments.

Interest Rate Risk Management

Market risk arises from changes in interest rates, exchange rates, commodity prices and equity prices. The Bank's market risk exposure is primarily that of interest rate risk, and it has established policies and procedures to monitor and limit earnings and balance sheet exposure to changes in interest rates. The Bank does not engage in the trading of financial instruments, and has only nominal direct exposure to currency exchange rate risk, but has indirect exposure to exchange rate risk because of the dominant position of foreign tourism in its primary markets.

The principal objective of interest rate risk management (often referred to as "asset/liability management") is to manage the financial components of the Bank's balance sheet, as well as their characteristics, in a manner that will optimize the risk/reward equation for earnings and capital in relation to changing interest rates. The Bank's exposure to market risk is reviewed on a monthly basis by its Asset and Liability Committee. Interest rate risk is the potential of economic losses due to future interest rate changes. These economic losses can be reflected as a loss of future net interest income and/or a loss of current fair market values. The objective is to measure the effect on net interest income and to adjust the balance sheet to minimize the inherent risk while simultaneously maximizing income. Management realizes certain risks are inherent, and that the goal is to identify and manage those risks. Management uses two methodologies to manage interest rate risk: (i) a standard GAP analysis; and (ii) an interest rate shock simulation model.

The planning of asset and liability maturities is an integral part of the management of an institution's net interest margin. To the extent that the maturities of assets and liabilities do not match in a changing interest rate environment, the net interest margin may change over time. Even with perfectly matched re-pricing of assets and liabilities, risks remain in the form of prepayment risk for some loans and securities, or in the form of risks of delays in the adjustment of interest rates applying to either earning assets with floating rates or to interest bearing liabilities. The Bank has generally been able to control its exposure to changing interest rates by maintaining a substantial proportion of its portfolio in floating interest rate loans and a majority of its time deposits with relatively short maturities.

Interest rate changes do not affect all categories of assets and liabilities equally or at the same time. Varying interest rate environments can create unexpected changes in prepayment levels of assets and liabilities, which may have a significant effect on the net interest margin and are not reflected in the interest sensitivity analysis table. Because of these factors, an interest sensitivity gap report may not provide a complete assessment of the exposure to changes in interest rates.

The Bank uses modeling software for asset/liability management in order to simulate the effects of potential interest rate changes on its net interest margin, and to calculate the estimated fair values of the Bank's financial instruments under different interest rate scenarios. The program utilizes current balances, interest rates, maturity dates and re-pricing information for individual financial instruments, and incorporates assumptions on the characteristics of embedded options along with pricing and duration for those instruments to project the effects of a given interest rate change on the Bank's interest income and interest expense. Rate scenarios consisting of key rate and yield curve projections are run against the Bank's investment, loan, deposit and borrowed funds portfolios. These rate projections can be shocked (an immediate and parallel change in all base rates, up or down) and ramped (with incremental increases or decreases in rates over a specified time period), based on current trends and forecasts, including stable economic conditions.

The following table sets forth the estimated changes in the Bank's net interest income that would result from the designated instantaneous parallel shifts in interest rates noted, as of December 31, 2014. Computations of prospective effects of hypothetical interest rate changes are based on numerous assumptions, including relative levels of market interest rates, loan prepayments and deposit decay, and should not be relied upon as indicative of actual results. (Please note that, in the current interest rate environment, the reductions in rates presented in the analysis are unlikely to occur.)

	Increase/(Decrease) in Estimated Net Interest Income	
	Amount	Percent
	(Dollars in thousands)	
Change in Interest Rates (basis points)		
+400	\$ 18,948	28.96%
+300	\$ 14,071	21.51%
+200	\$ 9,223	14.10%
+100	\$ 4,164	6.37%
± 0	\$ -	0.00%
-100	\$ (1,114)	-1.70%
-200	\$ (1,997)	-3.05%
-300	\$ (2,247)	-3.44%
-400	\$ (2,430)	-3.71%

These data do not reflect any actions that we may undertake in response to changes in interest rates, such as changes in rates paid on certain deposit accounts based on local competitive factors, which could improve or attenuate the actual impact on net interest income.

As with any method of gauging interest rate risk, there are certain shortcomings inherent to the methodology noted above. The model assumes interest rate changes are instantaneous, and result in parallel shifts in the yield curve. In reality, rate changes are rarely instantaneous. The use of the simplifying assumption that short-term and long-term rates change by the same degree also disregards historic rate change patterns, which rarely show parallel yield curve shifts. Further, the model assumes that certain assets and liabilities of similar maturity or period to re-pricing will react in the same way to changes in rates. In reality, certain types of financial instruments may react in advance of changes in market rates, while the reaction of other types of financial instruments may lag significantly behind the change in general market rates. Additionally, the methodology noted above does not reflect the full impact of annual and lifetime restrictions on changes in rates for certain assets, such as adjustable rate loans. When interest rates change, actual loan prepayments and actual early withdrawals from time certificates may deviate significantly from the assumptions used in the model. Finally, this methodology does not measure or reflect the impact that higher rates may have on adjustable-rate loan clients' ability to service their debt. All of these factors are considered in less formulaic ways in monitoring the Bank's exposure to interest rate risk.

Critical Accounting Policies

General

The Company's consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States of America (generally accepted accounting principles, or "GAAP"). The financial information contained within our consolidated financial statements is, to a significant extent, based on approximate measures of the financial effects of transactions and events that have already occurred. A variety of factors could affect the ultimate value that is obtained, either when earning income, recognizing an expense, recovering an asset or relieving a liability. In certain instances, we use a discount factor and prepayment assumptions to determine the present value of assets and liabilities. A change in the discount factor or prepayment speeds could increase or decrease the values of those assets and liabilities, which would result in either a beneficial or adverse impact to our financial results. We use historical loss factors as one factor in determining the inherent loss that may be present in our loan portfolio. Actual losses could differ significantly from the historical factors that we use. Other estimates that we use are related to the realization of our deferred tax assets and the expected useful lives of our depreciable assets. In addition, GAAP itself may change from one previously acceptable method to another, although the economics of our transactions would remain the same.

Fair Value of Securities

In accordance with GAAP, the Bank revalues the Available-for-Sale component of its investment portfolio on a quarterly basis, and records any unrealized gain or loss as an adjustment to other comprehensive income in its equity accounts. Held-to-Maturity securities are recorded at their amortized book value. The Bank also evaluates whether any of its security holdings are Other Than Temporarily Impaired ("OTTI"), but has determined that, as of December 31, 2014, none of its securities are deemed to be OTTI.

Allowance for Loan Losses

The allowance for loan losses is an estimate of the potential losses in our loan portfolio. Our accounting for estimated loan losses was previously discussed under the heading, “*Allowance for Loan Losses.*”

Loan Sales and Servicing

The initial recording of servicing assets is based on the estimated fair values of the respective components. In recording the initial value of the servicing assets, the Bank uses estimates which are based upon management’s consideration of market participants’ expectations regarding the performance of the mortgage servicing rights, including cost of servicing, contractual income, future prepayment and discount rates.

Deferred Tax Assets

Our net deferred income tax asset arises from temporary differences between the carrying amount of assets and liabilities reported in the financial statements and the amounts used for income tax return purposes. Our accounting for Deferred Tax Assets was previously discussed under the heading “*Income Tax Expense*”.

ITEM 7A. Quantitative and Qualitative Disclosures About Market Risk

As a financial institution, the Bank’s primary component of market risk is interest rate volatility. Fluctuations in interest rates will ultimately impact both the level of income and expense recorded on most of the Bank’s assets and liabilities and the market value of all interest-earning assets, other than those which have a short term to maturity. Based upon the nature of the Bank’s operations, the Bank is not subject to significant direct foreign exchange or commodity price risks. The Bank has no market risk sensitive instruments, or any other financial instruments, that are held for trading purposes. As of December 31, 2014, the Bank did not use interest rate derivatives to hedge its interest rate risk.

The information concerning quantitative and qualitative disclosure or market risk called for by Item 305 of Regulation S-K is included as part of Item 7 of this Annual Report.

ITEM 8. Financial Statements and Supplementary Data

The response to this item is submitted as a separate section of this Annual Report. See Part IV, Item 15.

ITEM 9. Changes In and Disagreements with Accountants on Accounting and Financial Disclosures

None.

ITEM 9A. Controls and Procedures

Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our reports under the Securities Exchange Act of 1934, as amended, (the “Exchange Act”) is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission (the “SEC”), and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure. In designing and evaluating our disclosure controls and procedures, our management recognized that any system of controls and procedures, no matter how well designed and operated, can provide only a reasonable assurance of achieving the desired control objectives, as ours are designed to do, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures in selecting those that we adopted.

In accordance with SEC rules, an evaluation was performed under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer of the effectiveness, as of December 31, 2014, of the Company’s disclosure controls and procedures pursuant to Exchange Act Rules 13a-15(e) and 15d-15(e). In December 2014, the Company identified that it did not include a shareholder advisory vote on “say-on-pay” or a shareholder advisory vote on “say-on-frequency” as required by Rule 14a-21 in the Company proxy statements for its 2013 and 2014 annual meetings of stockholders. The Company is a smaller reporting company, and the failure to include such advisory votes was inadvertent. Management reevaluated the effectiveness of the Company’s disclosure controls and procedures for each quarter until December 31, 2014, and concluded that the Company’s disclosure controls and procedures were not effective for those quarters in ensuring that all requirements were met in 2013 and 2014 with respect to the

Company's proxy statement. The Company has implemented additional procedures, including securities counsel review of all future SEC filings, to ensure that all requirements, including the requirements of Rule 14a-21, are met. Based on such evaluation, and with such changes implemented, our Chief Executive Officer and our Chief Financial Officer concluded that, as of December 31, 2014, our disclosure controls and procedures were effective at the reasonable assurance level.

Internal Control Over Financial Reporting

Management's Annual Report on Internal Control Over Financial Reporting

Management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act. Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. Internal control over financial reporting includes those written policies and procedures that:

- pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of our assets;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States of America;
- provide reasonable assurance that our receipts and expenditures are being made only in accordance with authorization of our management and Board of Directors; and,
- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of assets that could have a material effect on our consolidated financial statements.

Internal control over financial reporting includes the controls themselves, monitoring and internal auditing practices, and actions taken to correct deficiencies as they are identified. Because of its inherent limitations, internal control over financial reporting may not prevent or detect all potential misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risks that controls may become inadequate because of changes in conditions or because the degree of compliance with the policies or procedures may deteriorate.

Management's Assessment of Internal Control Over Financial Reporting

Our management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2014, based on criteria for effective internal control over financial reporting described in "*Internal Control – Integrated Framework*" issued by the Committee of Sponsoring Organizations of the Treadway Commission. Management's assessment included an evaluation of the design and the testing of the operational effectiveness of the Company's internal control over financial reporting. Based upon this assessment, management believes that, as of December 31, 2014, there was no control deficiency or aggregation of deficiencies that constituted a material weakness, and that BankGuam Holding Company maintained effective internal control over financial reporting.

Management previously disclosed a material weakness in internal control over financial reporting in its annual report on Form 10-K for the year ended December 31, 2011, and on Form 10-Q for the quarter ended March 31, 2012, relating to our internal controls over the accounting and review of our 2001 Non-Statutory Stock Option Plan, and the depreciation of the Bank's headquarters building. To remediate these material weaknesses, management has modified its procedures and placed additional controls over the accounting practices and review of its stock-based compensation, and has engaged a third party to assist with the review of the timing difference of tax depreciation and depreciation recorded in accordance with GAAP. As a result of these actions, management of the Company believes these material weaknesses were satisfactorily remediated as of December 31, 2014.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting during the year ended December 31, 2014, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

This Annual Report on Form 10-K does not include an attestation report of the Company's registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's registered public accounting firm pursuant to the rules of the SEC that permit the Company to provide only management's assessment in this Annual Report.

ITEM 9B. Other Information

None.

PART III

ITEM 10. Directors, Executive Officers and Corporate Governance

Pursuant to General Instruction G(3) of Form 10-K, the information required by this Item 10 is incorporated by reference from the information contained in our Proxy Statement to be filed with the Securities and Exchange Commission in connection with the solicitation of proxies for our 2015 Annual Meeting of Stockholders (the “2015 Proxy Statement”) under the sections entitled “Board of Directors – Nominees for Directors,” “Executive Compensation – Executive Officers,” “Board of Directors – Committees, Membership and Meetings,” “Corporate Governance – Code of Ethics” and “Section 16(a) Beneficial Ownership Reporting Compliance.”

ITEM 11. Executive Compensation

The information required by this Item 11 is incorporated by reference from the information contained in our 2015 Proxy Statement under the sections entitled “Board of Directors – Committees, Membership and Meetings,” “Board of Directors – Director Compensation” and “Executive Compensation.”

ITEM 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information required by this Item 12 is incorporated by reference from the information contained in our 2015 Proxy Statement under the sections entitled “Beneficial Ownership of Common Stock” and “Executive Compensation – Equity Compensation Plan Information.”

ITEM 13. Certain Relationships and Related Transactions and Director Independence

The information required by this Item 13 is incorporated by reference from the information contained in our 2015 Proxy Statement under the sections entitled “Corporate Governance – Director Independence” and “Transactions with Related Persons.”

ITEM 14. Principal Accountant Fees and Services

The information required by this Item 14 is incorporated by reference from the information contained in our 2015 Proxy Statement under the section entitled “Ratification of Selection of Independent Registered Public Accounting Firm.”

PART IV

ITEM 15. Exhibits And Financial Statement Schedules

(a)(1) Financial Statements

The following financial statements are part of this report:

	<u>Page</u>
Report of Independent Registered Public Accounting Firm	50
Consolidated Financial Statements:	51
Statements of Financial Condition as of December 31, 2014 and 2013	51
Statements of Income for the years ended December 31, 2014, 2013 and 2012	52
Statements of Comprehensive Income for the years ended December 31, 2014, 2013 and 2012	53
Statements of Stockholders' Equity for the years ended December 31, 2014, 2013 and 2012.....	54
Statements of Cash Flows for the years ended December 31, 2014, 2013 and 2012	55
Notes to Consolidated Financial Statements	56

(a)(2) Financial Statement Schedules

All schedules to the Financial Statements are omitted because of the absence of the conditions under which they are required or because the required information is included in the Financial Statements or accompanying notes.

(b) Exhibits

The exhibit list required by this Item is incorporated by reference to the Exhibit Index included in this report.

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the Company has duly caused this report on Form 10-K to be signed on its behalf by the undersigned thereunto duly authorized.

BANKGUAM HOLDING COMPANY

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders
BankGuam Holding Company

We have audited the accompanying consolidated statements of financial condition of BankGuam Holding Company and subsidiary (collectively, the “Company”) as of December 31, 2014 and 2013, and the related consolidated statements of income, comprehensive income, stockholders’ equity, and cash flows for each of the years in the three-year period ended December 31, 2014. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of BankGuam Holding Company and subsidiary as of December 31, 2014 and 2013, and the consolidated results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2014, in conformity with U.S. generally accepted accounting principles.

BankGuam Holding Company
Notes to Consolidated Financial Statements
(In thousands, except per share data)

Note 1 – Nature of Business

Organization

The accompanying consolidated financial statements include the accounts of BankGuam Holding Company (“the Company”) and its wholly-owned subsidiary, Bank of Guam (“the Bank”). The Company is a Guam corporation organized on October 29, 2010 to act as a holding company of the Bank, a 23-branch bank serving the communities in Guam, the Commonwealth of the Northern Mariana Islands (CNMI), the Federated States of Micronesia (FSM), the Republic of the Marshall Islands (RMI), the Republic of Palau (ROP), and San Francisco, California. On August 15, 2011, the Company acquired all of the outstanding common stock of the Bank in a holding company formation transaction (the “Reorganization”).

Other than holding the shares of the Bank, the Company conducts no significant activities, although it is authorized, with the prior approval of its principal regulator, the Board of Governors of the Federal Reserve System (the “Federal Reserve Board”) to engage in a variety of activities related to the business of banking. Currently, substantially all of the Company’s operations are conducted and substantially all of the assets are owned by the Bank, which accounts for substantially all of our consolidated revenues, expenses and operating income. The Bank provides a variety of financial services to individuals, businesses and governments through its branches. The Bank’s headquarters is located in Hagåtña, Guam, and it operates branches located on Guam, the CNMI, the FSM, the RMI, the ROP and the United States of America. Its primary deposit products are demand deposits, savings and time certificate accounts, and its primary lending products are consumer, commercial and real estate loans.

For ease of reference we will sometimes refer to the Company as “we”, “us” or “our.”

Note 2 – Summary of Significant Accounting Policies

Principles of Consolidation and Basis of Presentation

The accompanying consolidated financial statements have been prepared in accordance with generally accepted accounting principles in effect in the United States (“GAAP”), on a basis consistent with prior periods.

The consolidated financial statements include the accounts of BankGuam Holding Company, the Bank and the Bank’s wholly owned subsidiaries, BankGuam Properties, Inc. and BankGuam Insurance Underwriters, Ltd. All significant intercompany and inter-branch balances and transactions have been eliminated in consolidation.

Assets held by the Bank’s Trust department in a fiduciary capacity are not assets of the Bank, and, accordingly, are not included in the accompanying consolidated financial statements.

Use of Estimates

The preparation of consolidated financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of income and expenses during the periods presented. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change in the near term relate to the determination of the allowance for loan losses, valuation of other real estate owned and the fair value of financial instruments.

Cash and Cash Equivalents

For purposes of the consolidated statements of cash flows, cash and cash equivalents include cash on hand and balances due from banks, Federal Funds sold, and interest bearing deposits with other banks, all of which mature within two hundred forty days. The Bank is required by the Federal Reserve System to maintain cash reserves against certain of its deposit accounts. At December 31, 2014 and 2013, the required combined reserves totaled approximately \$23.6 million and \$18.6 million, respectively.

Restricted Cash

Interest-bearing deposits in banks that mature within one year are carried at cost. \$150 thousand of these deposits is held jointly under the names of Bank of Guam and the Guam Insurance Commissioner, and is for the benefit of a Bank of Guam Trust Department customer, and \$250 thousand of these deposits is held under the Bank of Guam and is pledged for the Banker's Loan Processing (BLP) program.

Investment Securities

Certain debt securities that management has the positive intent and ability to hold to maturity are classified as "held-to-maturity," and are recorded at amortized cost. Securities not classified as held-to-maturity, including equity securities with readily determinable fair value, are classified as "available-for-sale" and are recorded at fair value, with unrealized gains and losses excluded from earnings and reported in other comprehensive income. Purchase premiums and discounts are recognized in interest income using the interest yield method over the terms of the securities. Gains and losses on the sale of securities are recorded on the trade date and are determined using the specific identification method. The Bank does not hold securities for trading purposes.

Declines in the fair value of securities below their cost that are other than temporary are reflected in earnings as realized losses. In determining other-than-temporary losses, management considers many factors, including: (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer, (3) whether the market decline was affected by macroeconomic conditions, and (4) whether the entity has the intent to sell the debt security or more likely than not will be required to sell the debt security before its anticipated recovery. The assessment of whether an other-than-temporary decline exists involves a high degree of subjectivity and judgment, and is based on the information available to management at the time such a determination is made.

Federal Home Loan Bank Stock

The Bank is required to hold non-marketable equity securities, comprised of Federal Home Loan Bank of Seattle ("FHLB") stock, as a condition of membership. These securities are accounted for at cost, which equals par or redemption value. Ownership is restricted and there is no market for these securities. These securities are redeemable at par by the issuing government supported institutions. The primary factor supporting the carrying value is the commitment of the FHLB to perform its obligations, which includes providing credit and other services to the Bank.

Mortgage Servicing Rights (MSR)

Mortgage servicing assets, included in other assets in the consolidated statements of financial condition, are recognized separately when rights are acquired through the sale of mortgage loans. Under the servicing assets and liabilities accounting guidance in ASC Topic 860, "Transfers and Servicing", servicing rights resulting from the sale of loans originated by the Bank are measured at fair value at the date of transfer. The Bank subsequently measures each class of servicing assets using fair value. Under the fair value method, the servicing rights are carried in the statements of financial condition at fair value and the changes in fair value are reported in earnings in the period in which the changes occur. Servicing fee income is recorded as fees earned for servicing loans. The fees are based on a contractual percentage of the outstanding principal, and are recorded as income when earned.

Loans Held for Investment

Loans that management has the intent and ability to hold for the foreseeable future or until maturity or pay-off generally are reported at their outstanding unpaid principal balances, adjusted for charge-offs, an allowance for loan losses, and any deferred fees or costs on originated loans, as well as unamortized premiums or discounts on purchased loans, except for certain purchased loans that fall under the scope of ASC Topic 310-30, "Accounting for Loans and Debt Securities Acquired with Deteriorated Credit Quality" (ASC 310-30).

Interest income is accrued on the unpaid principal balance of loans. Loan origination fees, net of certain direct origination costs, are deferred and recognized as income using the effective interest method over the contractual life of the loans. The accrual of interest on mortgage and commercial loans is discontinued at the time the loan is 90 days past due unless the credit is well-secured and in process of collection. Credit card loans and other unsecured consumer loans are typically charged off no later than 180 days past due. Past due status is based on contractual terms of the loan. In all cases, loans are placed on non-accrual or charged-off at an earlier date if collection of principal or interest is considered doubtful.

All interest accrued but not collected for loans that are placed on non-accrual or charged off are reversed against interest income. The interest on these loans is accounted for on the cash-basis or cost-recovery method, until qualifying for return to accrual. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

The Bank evaluated the portfolio of loans acquired from Wells Fargo Financial in December 2011 (the “Wells Portfolio”), and has elected to account for a portion of those loans under ASC 310-30, “*Accounting for Loans and Debt Securities Acquired with Deteriorated Credit Quality*”. We account for acquired loans under ASC 310-30 when there is evidence of credit deterioration since their origination and it is probable at the date of acquisition that we would be unable to collect all contractually required payments. The Wells Portfolio loans were recorded at their estimated fair value at the time of acquisition. Fair value of acquired loans was determined using a discounted cash flow model based on assumptions about the amount and timing of principal and interest payments, estimated prepayments, estimated default rates, estimated loss severity in the event of defaults, and current market rates. Estimated credit losses were included in the determination of fair value; therefore, an allowance for loan losses was not recorded on the acquisition date.

The carrying value of the Wells Portfolio is reduced by payments received and increased by the portion of the accretable yield recognized as interest income. These loans were acquired with a loss-sharing arrangement. If the Bank has credit losses, net of recoveries, of greater than 0.50% of the remaining portfolio in any given year, Wells Fargo Financial will cover those net losses in an amount up to \$320 thousand per year for five years through 2016.

Loan Origination Fees and Costs

All loan origination fees and related direct costs are deferred and amortized to interest income as an adjustment to yield over the respective lives of the loans using the effective interest method, except for loans that are revolving or short-term in nature for which the straight line method is used, which approximates the interest method.

Allowance for Loan Losses

The allowance for loan losses is established as losses are estimated to be likely, and is funded through a provision for loan losses charged to earnings. Loan losses are charged against the allowance when management believes the uncollectability of a loan is confirmed. Subsequent recoveries, if any, are credited to the allowance.

The allowance for loan losses is evaluated on a regular basis by management and is based upon management’s periodic review of the collectability of loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower’s ability to repay, estimated value of any underlying collateral, and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available.

A loan is considered impaired when, based on current information and events, it is probable that the Bank will be unable to collect the scheduled payments of principal and interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower’s prior payment record, and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan-by-loan basis for commercial and real estate loans by either the present value of expected future cash flows discounted at the loan’s effective interest rate, the loans’ obtainable market price, or the fair value of the collateral if the loan is collateral dependent.

Large groups of smaller balance homogeneous loans are collectively evaluated for impairment. Accordingly, the Bank does not separately identify individual consumer loans for impairment disclosures.

Loans Held for Sale

In its normal course of business, the Bank originates mortgage loans held for sale to the Federal Home Loan Mortgage Corporation (“FHLMC” or “Freddie Mac”). The Bank has elected to measure its residential mortgage loans held for sale at the lower of cost or market. Origination fees and costs are recognized in earnings at the time of origination for newly originated loans held for sale, and the loans are sold to Freddie Mac at par. The Bank recognizes gains on the sale of loans sold to Freddie Mac only to the extent of MSRs retained in such sales.

During the years ended December 31, 2014, 2013 and 2012, the Bank originated and sold approximately \$22.8 million, \$31.5 million and \$31.4 million, respectively, of the above mentioned loans.

Off-Balance Sheet Financial Instruments

In the ordinary course of business, the Bank has entered into commitments to extend credit, including commitments under credit card arrangements, commercial letters of credit and standby letters of credit. Such financial instruments are recorded as off-balance sheet items when the commitment is made, then recorded as balance sheet items if and when funded (See Note 16).

Premises and Equipment

Premises and equipment are reported at cost, less accumulated depreciation and amortization. Depreciation and amortization are computed on the straight-line method over the estimated useful lives of the related assets. Depreciation expense has been computed principally using estimated lives of 15 to 40 years for premises and 5 to 10 years for furniture and equipment. Leasehold improvements are depreciated over the estimated lives of the assets or the expected terms of the leases, if shorter. Expected terms include lease option periods to the extent that the exercise of such options is reasonably assured.

Construction-in-progress consists of accumulated direct and indirect costs associated with the Bank's construction of premises and the purchase of equipment that has not yet been placed in service and, accordingly, has not yet been subjected to depreciation. Such assets begin depreciation over their estimated useful lives when completed and placed in service.

Premises and equipment are periodically evaluated for impairment when events or changes in circumstances indicate the carrying amount may not be recoverable. Impairment exists when the expected undiscounted future cash flows of premises and equipment are less than their carrying amount. In that event, the Bank records a loss for the difference between the carrying amount and the estimated fair value of the asset based on quoted prices.

Other Real Estate Owned

Properties acquired through, or in lieu of, loan foreclosure are held for sale and are initially recorded at the fair value of the property, reduced by estimated selling costs. Subsequent to foreclosure, valuations are periodically performed by management and the assets are carried at the lower of carrying amount or fair value, less the estimated cost to sell. Other real estate owned is estimated using the appraised value of the underlying collateral, discounted as necessary due to management's estimates of changes in economic conditions, less estimated costs to sell. A valuation allowance is increased by provisions charged to earnings. Subsequent write-downs, income and expenses incurred in connection with holding such assets, and gains and losses realized from the sale of such assets, are charged to the valuation allowance.

Goodwill

Goodwill is deemed to have an indefinite life, and is not amortized but is evaluated at least annually for impairment in accordance with ASC Topic 350, "*Intangibles – Goodwill and Other*". Based upon the Company's most recent evaluation, there are no indicators of impairment.

Treasury Stock

Common stock shares repurchased are recorded as treasury stock at cost.

Income Taxes

Income taxes represent taxes recognized under laws of the Government of Guam, which generally conform to U.S. income tax laws. Foreign income taxes result from payments of taxes with effective rates ranging from 2% to 5% of gross income in the FSM, the RMI and the ROP to their respective government jurisdictions. U.S. Federal, California and the Commonwealth of the Northern Mariana Islands income taxes are reflected as foreign taxes for financial reporting purposes.

The Company accounts for income taxes in accordance with income tax accounting guidance ASC Topic 740, "*Income Taxes*".

The income tax accounting guidance results in two components of income tax expense: current and deferred. Current income tax expense reflects taxes to be paid for the period by applying the provisions of the enacted tax law to the taxable income. The Company determines deferred income taxes using the liability (or balance sheet) method. Under this method, the net deferred tax asset or liability is based on the tax effects of the differences between the book and tax bases of assets and liabilities, and enacted changes in tax rates and laws are recognized in the period in which they occur.

Deferred income tax expense results from changes in deferred tax assets and liabilities between periods. Deferred tax assets are recognized if it is more likely than not, based on the technical merits, that the tax position will be realized or sustained upon examination. The term, “more likely than not,” means a likelihood of more than 50 percent; the terms, “examined,” and, “upon examination,” also include resolution of related appeals or litigation processes, if any.

A tax position that meets the “more likely than not” recognition threshold is initially and subsequently measured as the largest amount of which the tax authority has full knowledge of all relevant information. The determination of whether or not a tax position has met the “more likely than not” recognition threshold considers the facts, circumstances, and information available at the reporting date, and is subject to management’s judgment. Deferred tax assets are reduced by a valuation allowance if, based on the weight of evidence available, it is more likely than not that some portion or all of a deferred tax asset will not be realized.

The Company recognizes interest and penalties on income taxes as a component of income tax expense.

Comprehensive Income

Comprehensive income consists of net income and other comprehensive income, including unrealized gains and losses on securities available-for-sale, which are also recognized as separate components of equity.

Earnings Per Common Share

Basic earnings per share represent income available to common stockholders divided by the weighted-average number of common shares outstanding during the period. Diluted earnings per share reflect additional common shares that would have been outstanding if dilutive potential common shares had been issued, as well as any adjustment to income that would result from the assumed issuance. Potential common shares that may have been issued by the Company relate solely to outstanding stock options, and are determined using the treasury stock method.

Fair Value of Financial Instruments/Fair Value Option

Fair values of financial instruments are estimated using relevant market information and other assumptions, as more fully disclosed in Note 19. Fair value estimates involve uncertainties and matters of significant judgment. Changes in assumptions or in market conditions could significantly affect these estimates. In addition, the fair value option provides an option to elect fair value as an alternative measurement for selected financial assets, financial liabilities, unrecognized firm commitments and written loan commitments not previously carried at fair value. The Company and the Bank have elected the fair value option for its mortgage servicing rights originated subsequent to 2005. The election was made to better reflect the underlying economics and to mitigate operational complexities in risk management activities.

Transfers of Financial Assets

Transfers of financial assets are accounted for as sales when control over the assets has been surrendered. Control over transferred assets is deemed to be surrendered when, (i) the assets have been isolated from the Bank – put presumptively beyond the reach of the transferor and its creditors, even in bankruptcy or other receivership, (ii) the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and (iii) the Bank does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity or the ability to unilaterally cause the holder to return specific assets.

Contingencies

From time to time, the Company may become involved in disputes, litigation and other legal actions. In such event, the Company estimates the range of liability related to pending litigation where the amount and range of loss can be estimated and information available prior to the issuance of financial statements indicates such loss is considered probable. Where a liability is probable and there is a range of estimated loss with no best estimate in the range, the Company records a charge equal to at least the minimum amount in the range.

Subsequent Events

Subsequent events are events or transactions that occur after the balance sheet date but before financial statements are issued. The Company recognizes in the financial statements the effects of all subsequent events that provide additional evidence about conditions that existed at the date of the balance sheet, including the estimates inherent in the process of preparing the financial statements. The Company's financial statements do not recognize subsequent events that provide evidence about conditions that did not exist at the date of the balance sheet but arose after the balance sheet date and before financial statements are available to be issued.

The Company has evaluated events subsequent through the date that these consolidated financial statements are being filed with the Securities and Exchange Commission.

Note 3 – Recent Accounting Pronouncements

In February 2013, the FASB issued ASU 2013-02, "*Reporting of Amounts Reclassified out of Accumulated Other Comprehensive Income*", which requires an entity to report the effect of significant reclassifications out of accumulated other comprehensive income on the respective lines in the entity's net income if the amount being reclassified is required under GAAP to be reclassified in its entirety to net income. The ASU is effective for fiscal years, and interim periods within those years, beginning after December 15, 2012. The adoption of ASU 2013-02 did not have a material impact on our consolidated financial condition or results of operations.

In July 2013, the FASB issued ASU 2013-11, "*Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists*", which amended its guidance on income taxes to eliminate diversity in the financial statement presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists. The amendments clarify whether unrecognized tax benefits should be presented as a liability on the balance sheet or as a reduction of a deferred tax asset. This guidance is effective for interim and annual periods beginning after December 15, 2013. Early adoption is permitted. We adopted this guidance on January 1, 2014, and it did not have a material impact on our financial statement presentation.

In January 2014, the FASB issued ASU 2014-04, "*Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure*", which clarifies the timing of when a creditor is considered to have taken physical possession of residential real estate collateral for a consumer mortgage loan, resulting in the reclassification of the loan receivable to real estate owned. A creditor has taken physical possession of the property when either (1) the creditor obtains legal title through foreclosure, or (2) the borrower transfers all interests in the property to the creditor via a deed in lieu of foreclosure or a similar legal agreement. The Update also requires disclosure of the amount of foreclosed residential real estate property held by the creditor and the recorded investment in residential real estate mortgage loans that are in process of foreclosure. This guidance is effective for interim and annual periods beginning after December 15, 2014. We adopted this guidance on January 1, 2015, and do not expect that it will have a material impact on our consolidated financial condition or results of operations.

In August 2014, the FASB issued ASU 2014-14, "*Receivables – Troubled Debt Restructurings by Creditors (Subtopic 310-40): Classification of Certain Government-Guaranteed Mortgage Loans upon Foreclosure (a consensus of the FASB Emerging Issues Task Force)*", which addresses the classification of certain foreclosed mortgage loans held by creditors that are either fully or partially guaranteed under government programs. Under certain government-sponsored loan guarantee programs, qualifying creditors can extend mortgage loans to borrowers with a guarantee that entitles the creditor to recover all or a portion of the unpaid principal balance from the government if the borrower defaults. The ASU requires that a mortgage loan be derecognized and that a separate other receivable be recognized upon foreclosure if certain conditions are met. The separate other receivable should be measured based on the amount of the loan balance (principal and interest) expected to be recovered. For public business entities, the guidance is effective for annual periods beginning after December 15, 2014 and interim periods within that year. We adopted this guidance on January 1, 2015, and do not expect that it will have a material impact on our consolidated financial condition or results of operations.

Note 4 – Interest-Bearing Deposits and Restricted Cash

The Company had \$79.4 million and \$64.8 million in interest bearing deposits at other financial institutions at December 31, 2014 and 2013, respectively. The weighted average percentage yields on these deposits were 0.18% and 0.28% at December 31, 2014 and 2013, respectively. Interest bearing deposits with financial institutions can be withdrawn by the Bank on demand, and are considered cash equivalents for purposes of the consolidated statements of financial condition and cash flows.

At December 31, 2014 and 2013, we had \$400 thousand of restricted cash, held in time deposits that were scheduled to mature within one year. Of these deposits, \$150 thousand are held jointly under the names of Bank of Guam and the Guam Insurance Commissioner, and serve as a bond for the Bank of Guam Trust Department, and \$250 thousand is held under the Bank of Guam, and is pledged for Banker's Loan Processing (BLP) program with Pacific Coast Bankers Bank in California. These amounts are included in the interest-bearing deposits in the preceding paragraph. The weighted average percentage yields on these restricted cash deposits were 0.31% and 0.37% at December 31, 2014 and 2013, respectively.

Note 5 – Investment Securities

The amortized cost and estimated fair value of investment securities, with gross unrealized gains and losses, was as follows:

	December 31, 2014			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
<u>Securities Available-for-Sale</u>				
U.S. government agency and sponsored enterprise (GSE) debt securities	\$ 100,679	\$ 70	\$ (185)	\$ 100,564

Total	<u>\$ 88,989</u>	<u>\$ 944</u>	<u>\$ (1,113)</u>	<u>\$ 88,820</u>

At December 31, 2014 and 2013, investment securities with a carrying value of \$206.9 million and \$170.5 million, respectively, were pledged to secure various government deposits and other government requirements.

The amortized cost and fair value of investment securities by contractual maturity at December 31, 2014 and 2013, are shown below.

	December 31, 2014			
	Available-for-Sale		Held-to-Maturity	
	Amortized Cost	Fair Value	Amortized Cost	Estimated Fair Value
	(Dollars in Thousands)			
Due within one year	\$ -	\$ -	\$ -	\$ -
Due after one but within five years	104,635	104,590	23,751	23,829
Due after five years but within ten years ...	32,311	32,333	51,214	52,585
Due after ten years.....	94,595	93,634	30,315	30,594
Total	<u>\$ 231,541</u>	<u>\$ 230,557</u>	<u>\$ 105,280</u>	<u>\$ 107,008</u>

	December 31, 2013			
	Available-for-Sale		Held-to-Maturity	
	Amortized Cost	Fair Value	Amortized Cost	Estimated Fair Value
	(Dollars in Thousands)			
Due within one year	\$ -	\$ -	\$ 37	\$ 38
Due after one but within five years	5,084	5,196	565	600
Due after five years but within ten years ...	39,155	38,923	57,154	57,153

Total	<u>\$ 185,144</u>	<u>\$ 182,832</u>	<u>\$ 88,989</u>	<u>\$ 88,820</u>

For the years ended December 31, 2014, 2013 and 2012, proceeds from sales of available-for-sale securities amounted to \$92.8 million, \$132.0 million and \$141.4 million, respectively; gross realized gains were \$520 thousand, \$916 thousand and \$1.3 million, and gross realized losses were \$50 thousand, \$289 thousand and \$47 thousand respectively; gross unrealized gains were \$368 thousand, \$234 thousand and \$3.1 million, and gross unrealized losses were \$1.4 million, \$2.5 million and \$430 thousand, respectively.

During the fourth quarter of 2014, the Company sold nine securities classified as held-to-maturity. The nine securities comprised two mortgage-backed securities issued by the Federal Home Loan Mortgage Corporation (“FHLMC”), and seven mortgage-backed securities issued by the Federal National Mortgage Association. The sale of these securities was not deemed as “tainting” the classification of the held-to-maturity portfolio as these securities had collected a substantial portion of at least 85% of the principal outstanding at acquisition date and were considered as maturities for purposes of the classification of securities and the disclosure requirements in accordance with ASC Topic 320, *Investments – Debt and Equity Securities*.

Temporarily Impaired Securities

The following table indicates the gross unrealized losses and fair value of the Bank's investments, with unrealized losses that are not deemed to be OTTI, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position at December 31, 2014 and 2013.

	December 31, 2014					
	Less Than Twelve Months		More Than Twelve Months		Total

The Bank does not believe that the investment securities that were in an unrealized loss position as of December 31, 2014, which comprised a total of 59 securities, were other than temporarily impaired. Specifically, the 59 securities are comprised of the following: 22 Small Business Administration (SBA) Pool securities, 1 mortgage-backed securities issued by Federal National Mortgage Association (FNMA), 1 mortgage-backed security issued by Federal Home Loan Mortgage Corporation (FHLMC), 13 mortgage-backed securities issued by Government National Mortgage Association (GNMA), and 22 U.S. Treasuries.

Total gross unrealized losses were primarily attributable to changes in interest rates, relative to when the investment securities were purchased, and not due to the credit quality of the investment securities. The Bank does not intend to sell the investment securities that were in an unrealized loss position and it is not likely that the Bank will be required to sell the investment securities before recovery of their amortized cost bases, which may be at maturity.

Note 6 – Loans

The Bank provides commercial and industrial, commercial mortgage, commercial construction, automobile and other consumer loans in each of the markets it serves. It also offers residential mortgage, home equity and certain U.S. government guaranteed loans in Guam, the Northern Mariana Islands and California.

Outstanding loan balances are presented net of unearned income, net deferred loan fees, and unamortized discount and premium totaling \$2.4 million at December 31, 2014. Loans subject to ASC 310-30 are presented net of the related accretable yield and nonaccretable difference.

The loan portfolio consisted of the following at:

	December 31,			
	2014		2013	
	Amount	Percent	Amount	Percent
	(Dollars in thousands)			
Commercial				
Commercial & industrial	\$ 209,871	21.4%	\$ 183,364	21.0%
Commercial mortgage	399,737	40.7%	380,454	43.5%
Commercial construction	39,979	4.1%	697	0.1%
Total commercial	649,587	66.1%	564,515	64.5%
Consumer				
Residential mortgage	141,074	14.4%	152,757	17.5%
Home equity	910	0.1%	1,039	0.1%
Automobile	18,995	1.9%	7,269	0.8%
Other consumer loans ¹	171,708	17.5%	149,593	17.1%
Total consumer	332,687	33.9%	310,658	35.5%
Gross loans	982,274	100.0%	875,173	100.0%
Deferred fee (income) costs, net	(2,355)		(2,213)	
Allowance for loan losses	(12,526)		(12,077)	
Loans, net	\$ 967,393		\$ 860,883	

¹ Comprised of other revolving credit, installment, and overdrafts.

At December 31, 2014, total gross loans increased by \$107.1 million, to \$982.3 million, up from \$875.2 million at December 31, 2013. The growth in loans was largely attributed to (i) a \$39.3 million increase in commercial construction loans, to \$40.0 million from \$697 thousand, due primarily to a loan for the construction of a hotel in Guam, (ii) a \$26.5 million increase in the commercial and industrial loan category, to \$209.9 million from \$183.4 million, (iii) an increase of \$19.2 million in the commercial mortgage category, to \$399.7 million from \$380.5 million, (iv) an increase of \$22.1 million in the other consumer loan category, from \$149.6 million to \$171.7 million, and an increase of \$11.7 million in automobile loans, from \$7.3 million to \$19.0 million, primarily due to consumer loan promotions and an aggressive automobile loan program. These were partially offset by an \$11.7 million decrease in residential mortgage loans, to \$141.1 million from \$152.8 million.

Certain loans acquired in the acquisition of a portfolio of loans from Wells Fargo in December 2011 are subject to ASC 310-30 (formerly SOP 03-3 (see Note 1)). These included loans at the date of acquisition for which it was probable that we would not collect all contractual principal and interest. Loans within the scope of ASC 310-30 are initially recorded at fair value, and no allowance is carried over or initially recorded. A summary of the major categories of loans outstanding acquired from Wells Fargo showing those subject to ASC 310-30 is presented in the following table.

	December 31, 2014		
	ASC 310-30 loans	All other	Total loans
Consumer:			
Residential mortgage.....	\$ -	\$ 70,164	\$ 70,164
Home equity.....	-	-	-

Total consumer	136	70,164	70,300
Deferred fee (income) costs, net	-	(1)	(1)
Allowance for loan losses	-	(506)	(506)
Total loans	\$ 136	\$ 69,657	\$ 69,793

Allowance for Loan Losses

The allowance for loan losses is evaluated on a regular basis by management, and is based upon management’s periodic review of the collectability of loans in light of historical experience, the nature of volume of the loan portfolio, adverse situations that may affect the borrower’s ability to repay, estimated value of any underlying collateral, and prevailing economic conditions. This evaluation is inherently subjective, as it requires estimates that are susceptible to significant revision as more information becomes available.

The allowance for loan losses is first determined by analyzing all classified loans (Substandard and Doubtful) in non-accrual for loss exposure and establishing specific reserves, as needed. ASC 310-10 defines loan impairment as the existence of uncertainty concerning collection of all principal and interest per the contractual terms of a loan. For collateral-dependent loans, impairment is typically measured by comparing the loan amount to the fair value of collateral, less costs to sell, with a specific reserve established for the “shortfall” amount. Other methods can be used in estimating impairment (market price or present value of expected future cash flows discounted at the loan’s original interest rate).

The portion of the allowance that covers unimpaired loans is based on historical charge-off experience and expected loss, given the default probability derived from the Bank’s internal risk rating process. Other adjustments may be made to the allowance for pools of loans after an assessment of internal or external influences on credit quality that are not fully reflected in the historical loss or risk rating data.

Our loss migration analysis tracks a certain number of quarters of loan loss history and industry loss factors to determine historical losses by classification category for each loan type, except certain consumer loans. These calculated loss factors are then applied to outstanding loan balances for all loans on accrual designated as “Pass,” “Special Mention,” “Substandard” or “Doubtful” (“classification categories”). Additionally, a qualitative factor that is determined utilizing external economic factors and internal assessments is applied to each homogeneous loan pool. We also conduct individual loan review analyses, as part of the allowance for loan loss allowance allocation process, applying specific monitoring policies and procedures in analyzing the existing loan portfolios.

Credit Quality Indicators

The Bank uses several credit quality indicators to manage credit risk, including an internal credit risk rating system that categorizes loans and leases into pass, special mention, substandard, doubtful or loss categories. Credit risk ratings are applied individually to those classes of loans and leases that have significant or unique credit characteristics and that benefit from a case-by-case evaluation. These are typically loans and leases to businesses or individuals in the classes which comprise the commercial portfolio segment. Groups of loans and leases that are underwritten and structured using standardized criteria and characteristics, such as statistical models (e.g., credit scoring or payment performance), are typically risk-rated and monitored collectively. These are typically loans and leases to individuals in the classes which comprise the consumer portfolio segment.

The following are the definitions of the Bank’s credit quality indicators:

Pass (A): Exceptional: Essentially risk-free credit. These are loans of the highest quality that pose virtually no risk of loss to the Bank. This includes loans fully collateralized by means of a savings account(s) and time certificate(s) of deposit, and by at least 110% of the loan amount. Borrowers should have strong financial statements, good liquidity and excellent credit.

Pass (B): Standard: Multiple “strong sources of repayment.” Loans to strong borrowers with a demonstrated history of financial and managerial performance. Risk of loss is considered to be low. Loans are well structured, with clearly identified primary and readily available secondary sources of repayment. Loans may be secured by an equal amount of funds in a savings account or time certificate of deposit. Loans may be secured by marketable collateral whose value can be reasonably determined through outside appraisals. Very strong cash flow and relatively low leverage.

Pass (C): Acceptable: “Good” primary and secondary sources of repayment. Loans to borrowers of average financial strength, stability and management expertise. Borrower should be a well-established individual or company with adequate financial resources to weather short-term fluctuations in the marketplace. Financial ratios and trends are favorable. The loans may be unsecured or supported by non-real estate collateral for which the value is more difficult to determine, reasonable credit risk and requiring an average amount of account officer attention. Unsecured credit is to be of unquestionable strength.

Pass (D): Monitor: “Sufficient” primary source of repayment and acceptable secondary source of repayment. Acceptable business or individual credit, but the borrower’s operations, cash flow or financial conditions evidence moderate to average levels of risk. Loans are considered to be collectable in full, but may require a greater-than-average amount of loan officer attention. Borrowers are capable of absorbing normal setbacks without failure.

Special Mention: A special mention asset has potential weaknesses that deserve close monitoring. These potential weaknesses may result in a deterioration of the repayment prospects for the asset or in the institution’s credit position at some future date. Special Mention assets are not adversely classified and do not expose an institution to sufficient risk to warrant adverse classification. Special Mention should neither be a compromise between a pass grade and substandard, nor should it be a “catch all” grade to identify any loan that has a policy exception.

Substandard: A substandard asset is inadequately protected by the current sound worth and payment capacity of the obligor or the collateral pledged. Assets so classified must have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. Assets are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

Formula Classified: Formula classified loans are all loans and credit cards delinquent 90 days and over which have yet to be formally classified Special Mention, Substandard or Doubtful by the Bank’s Loan Committee. In most instances, the monthly formula total is comprised primarily of residential real estate and consumer loans and credit cards. Commercial loans are typically formally classified by the Loan Committee no later than their 90-day delinquency, and thus do not become part of the formula classification. Real estate loans 90-days delinquent are in the foreclosure process and are typically completed within another 60 days, and thus are not formally classified during this period.

Doubtful: A loan with weaknesses well enough defined that eventual repayment in full, on the basis of currently existing facts, conditions and values, is highly questionable, even though certain factors may be present which could improve the status of the loan. The probability of some loss is extremely high, but because of certain known factors, which may work to the advantage of strengthening of the assets (i.e. capital injection, perfecting liens on additional collateral, refinancing plans, etc.), its classification as an estimated loss is deferred until its more exact status can be determined.

Loss: Loans classified as “Loss” are considered uncollectible, and are either unsecured or are supported by collateral that is of little to no value. As such, their continuance as recorded assets is not warranted. While this classification does not mandate that a loan has no ultimate recovery value, losses should be taken in the period these loans are deemed to be uncollectible. Loans identified as loss are immediately approved for charge off. The Bank may refer loans to outside collection agencies, attorneys, or its internal collection division to continue collection efforts. Any subsequent recoveries are credited to the Allowance for Loan Losses.

Set forth below is a summary of the Company’s activity in the allowance for loan losses during the years ended:

	December 31,		
	2014	2013	2012
	(Dollars in thousands)		
Balance, beginning of period.....	\$ 12,077	\$ 12,228	\$ 11,101
Provision for loan losses	4,540	2,095	3,900
Recoveries on loans previously charged off.....	1,779	1,814	3,294
Charged off loans	(5,870)	(4,060)	(6,067)
Balance, end of period.....	<u>\$ 12,526</u>	<u>\$ 12,077</u>	<u>\$ 12,228</u>

The increase in the allowance is primarily due to the growth of the overall loan portfolio, partially offset by a reduction in classified loans and a decline in delinquency rates, along with management's reassessment of economic conditions and prospects. The allowance for loan losses will change in the future in response to changes in the size, composition and quality of the loan portfolio, as well as periodic reassessments of prospective economic conditions.

Set forth below is information regarding gross loan balances and the related allowance for loan losses, by portfolio type, for the years ended December 31, 2014 and 2013.

	<u>Commercial</u>	<u>Residential Mortgages</u>	<u>Consumer</u>	<u>Total</u>

Charge-offs	(470)	(168)	(3,422)	(4,060)
Recoveries	116	143	1,555	1,814
Provision	90	(506)	2,511	2,095
Balance at end of year	<u>\$ 5,987</u>	<u>\$ 922</u>	<u>\$ 5,168</u>	<u>\$ 12,077</u>
Allowance balance at end of year related to:				
Loans individually evaluated for impairment	\$ -	\$ -	\$ -	\$ -
Loans collectively evaluated for impairment	<u>\$ 5,987</u>	<u>\$ 922</u>	<u>\$ 5,168</u>	<u>\$ 12,077</u>
Loan balances at end of year:				
Loans individually evaluated for impairment	\$ 10,239	\$ 6,412	\$ 195	\$ 16,846
Loans collectively evaluated for impairment	554,276	147,384	156,667	858,327
Ending Balance	<u>\$ 564,515</u>	<u>\$ 153,796</u>	<u>\$ 156,862</u>	<u>\$ 875,173</u>

Impairment is measured on a loan-by-loan basis for commercial and real estate loans by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral (if the loan is collateral dependent). Large groups of smaller-balance homogeneous loans are collectively evaluated for impairment. The Bank performs direct write-downs of impaired loans with a charge to the allocated component of the allowance, therefore reducing the allocated component of the reserve to zero at the end of each reporting period.

The following table provides a summary of the delinquency status of the Bank's gross loans by portfolio type:

¹ Comprised of other revolving credit, installment, and overdrafts.

The Bank's outstanding loan balances have increased by \$107.1 million over the past year and the delinquency rate of 2.6% at December 31, 2014, was 0.9% lower than the rate at December 31, 2013. The primary reason for the decrease was a \$3.6 million decline in residential mortgage delinquencies and a \$1.7 million decrease in commercial mortgage delinquencies, partially offset by a \$253 thousand increase in automobile loan delinquencies.

Generally, the accrual of interest on a loan is discontinued when principal or interest payments become more than 90 days past due, unless management believes the loan is adequately collateralized and it is in the process of collection. When a loan is placed on non-accrual status, previously accrued but unpaid interest is reversed against current income. Subsequent collections of cash are applied as principal reductions when received, except when the ultimate collectability of principal is probable, in which case interest payments are credited to income. Non-accrual loans may be restored to accrual status when principal and interest become current and full repayment is expected. The following table provides information as of December 31, 2014 and 2013, with respect to loans on non-accrual status, by portfolio type:

Total outstanding loans, gross	<u><u>\$ 982,274</u></u>	<u><u>\$ 875,173</u></u>	<u><u>\$ 107,101</u></u>

As the above table indicates, the Company's total loans approximated \$982.3 million at December 31, 2014, up from \$875.2 million at December 31, 2013. The disaggregation of the portfolio by risk rating in the table reflects the following changes between December 31, 2013, and December 31, 2014:

- Loans rated "pass" totaled \$949.5 million at December 31, 2014, up from \$826.9 million at December 31, 2013, due primarily to the increase of \$39.3 million in commercial construction loans, primarily in Guam, and an increase of \$37.7 million in commercial & industrial loans, \$27.5 million in commercial mortgage loans and \$22.0 million on other consumer loans. The other consumer loans increase is due to new bookings and promotional programs, and the increase in automobile loans is the result of more aggressive efforts in originating dealer loans. These increases were offset by a \$15.3 million reduction in residential mortgages, which included the downgrade of \$4.9 million of loans purchased in 2011 from Wells Fargo Financial to the "formula classified" category, and a decrease of \$176 thousand in home equity due to payoffs and paydowns.
- The "special mention" category was \$18.9 million lower at December 31, 2014, than at December 30, 2013. Commercial & industrial loans decreased by \$9.6 million, due primarily to an upgrade of a \$3.1 million loan relationship to "pass" and the payoff of \$6.2 million. Commercial mortgage loans decreased by \$9.4 million, due to the upgrade of an \$8.0 million loan relationship from "special mention" to "pass".
- Loans classified "substandard" increased by \$226 thousand, to \$13.0 million, at December 31, 2014, from \$12.8 million at December 31, 2013. The increase was primarily in the commercial mortgage loan category due to the downgrade of a \$3.8 million loan relationship to the "substandard" category and \$352 thousand of residential mortgage loans. Substandard commercial & industrial loans decreased by \$1.6 million, primarily due to one large loan charge-down of \$1.5 million due to the borrower experiencing cash flow difficulties.
- The "formula classified" category increased by \$3.1 million during the period, from the addition of non-accrual loans. The increase of \$3.3 million in non-accrual residential mortgage loans was partially offset by a decrease of \$314 thousand in classified commercial mortgage loans.

Impaired Loans

A loan is considered impaired when, based on current information and events, it is probable that the Bank will be unable to collect the scheduled payments of principal and interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed.

Impaired loans include loans that are in non-accrual status and other loans that have been modified in Troubled Debt Restructurings (TDRs), where economic concessions have been granted to borrowers experiencing financial difficulties. These concessions typically result from the Company's loss mitigation actions, and could include reductions in the interest rate, payment extensions, forgiveness of principal, forbearance or other actions taken with the intention to maximize collections.

The following table sets forth information regarding non-accrual loans and restructured loans, at December 31, 2014 and 2013:

Impairment is measured on a loan-by-loan basis for commercial and real estate loans by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral if the loan is collateral-dependent. Large groups of smaller balance homogeneous loans are collectively evaluated for impairment. The Bank performs direct write-downs of impaired loans with a charge to the allocated component of the allowance, thereby reducing the allocated component of the reserve to zero at the end of each reporting period.

Troubled Debt Restructurings

In accordance with FASB's Accounting Standard Update No. 2011-02, "A Creditor's Determination of Whether a Restructuring is a Troubled Debt Restructuring" (ASU No. 2011-02), the Bank had \$9.9 million of troubled debt restructurings (TDRs) as of December 31, 2014. The restructured loans recorded with the Bank represent financing receivables, modified for the purpose of alleviating temporary impairments to the borrower's financial condition. The modifications that the Bank has extended to borrowers have come in the form of a change in the amortization terms, reduction in the interest rate, interest only payments and, in limited cases, a concession to the outstanding loan balance. The workout plan between the borrower and Bank is designed to provide a bridge for the cash flow shortfalls in the near term. As the borrower works through the near term issues, in most cases, the original contractual terms will be reinstated.

At December 31, 2013, the Bank carried \$9.1 million of troubled debt restructurings. This increased by \$791 thousand, to \$9.9 million, by December 31, 2014, due primarily to two additional loans restructured during 2014.

	December 31, 2014		
	Cost	Accumulated Depreciation	Net Book Value
Buildings	\$ 27,102	\$ (17,755)	\$ 9,347
Furniture and equipment.....	24,386	(17,873)	6,513
Automobiles and mobile facilities	1,082	(598)	484
Leasehold improvements.....	4,192	(3,156)	1,036
	56,762	(39,382)	17,380
Construction in progress.....	1,206	-	1,206
	<u>\$ 57,968</u>	<u>\$ (39,382)</u>	<u>\$ 18,586</u>

	December 31, 2013		
	Cost	Accumulated Depreciation	Net Book Value
Buildings	\$ 26,954	\$ (16,725)	\$ 10,229
Furniture and equipment.....	24,807	(19,404)	5,403
Automobiles and mobile facilities	1,063	(724)	339
Leasehold improvements.....	4,317	(3,076)	1,241
	57,141	(39,929)	17,212
Construction in progress.....	1,037	-	1,037
	<u>\$ 58,178</u>	<u>\$ (39,929)</u>	<u>\$ 18,249</u>

For the years ended December 31, 2014, 2013 and 2012, depreciation and amortization expense was \$3.5 million, \$3.1 million and \$3.0 million, respectively.

Note 8 – Other Assets

A summary of other assets at December 31, 2014 and 2013 follows:

	2014	2013
Bank Owned Life Insurance	\$ 11,667	\$ 10,974
Prepaid income tax.....	-	409
Prepaid expenses.....	5,257	4,536
Other real estate owned, net (Note 9)	4,454	4,610
Deferred tax asset, net (Note 13)	5,511	5,603
Mortgage servicing rights	1,405	1,354
Other	2,707	692
Total other assets.....	<u>\$ 31,001</u>	<u>\$ 28,178</u>

Note 9 – Other Real Estate Owned

Other real estate owned is presented net of an allowance for losses. A summary of the changes in other real estate owned is as follows:

	2014	2013
Balance at beginning of year.....	\$ 4,610	\$ 4,384
Additions	922	2,193
Sales	(807)	(896)
	4,725	5,681
Write-downs and loss on sale, net	(119)	(127)
Change in valuation allowances	(152)	(944)
Balance at end of year.....	<u>\$ 4,454</u>	<u>\$ 4,610</u>

A summary of other real estate owned operations, which are included in non-interest expenses, for the years ended December 31, 2014, 2013 and 2012, is as follows:

	<u>2014</u>	<u>2013</u>	<u>2012</u>
Other real estate owned operations, net	\$ 2	\$ 143	\$ 96
Loss (gain) on the sale of the other real estate owned	119	127	74
Write-downs	152	1,213	(63)
Change in valuation allowances	-	(15)	121
Net losses from other real estate owned operations	<u>\$ 273</u>	<u>\$ 1,468</u>	<u>\$ 228</u>

Note 10 – Deposits

A summary of deposits at December 31, 2014 and 2013, follows:

	<u>December 31,</u>	
	<u>2014</u>	<u>2013</u>
	(Dollars in Thousands)	
Non-interest bearing deposits	\$ 391,108	\$ 321,408
Interest bearing deposits		
Demand deposits	144,601	127,642
Regular Savings.....	579,983	534,530
Time deposits:		
\$100,000 or more	42,500	43,299
Less than \$100,000	13,203	12,553
Other interest bearing deposits	184,119	144,013
Total Interest bearing deposits	<u>964,406</u>	<u>862,037</u>
Total Deposits.....	<u>\$ 1,355,514</u>	<u>\$ 1,183,445</u>

At December 31, 2014, the scheduled maturities of time deposits were as follows:

<u>Year ending December 31,</u>	
2015.....	\$ 52,756
2016.....	994
2017.....	309
2018.....	291
2019 and Thereafter	1,353
Total	<u>\$ 55,703</u>

Note 11 – Borrowings

Federal Home Loan Bank (FHLB) Advances

The Bank has a credit line with the FHLB of Seattle equal to 20% of total assets. At December 31, 2014 and 2013, the Bank did not have outstanding advances against this credit line under Blanket Agreements for Advances and Security Agreements (“the Agreements”). The Agreements enable the Bank to borrow funds from the FHLB to fund mortgage loan programs and to satisfy certain other funding needs.

Overnight Fed Funds Lines

At December 31, 2014 and 2013, the Bank had \$17.0 million in Federal Funds lines of credit available with its correspondent banks. No borrowings were outstanding as of December 31, 2014.

Note 12 – Transactions with Board of Directors

The Directors of the Company and the Bank, and certain of the businesses with which they are associated, conduct banking transactions with the Company in the ordinary course of business. All loans and commitments to loan included in such transactions are made in accordance with applicable laws and on substantially the same terms, including interest rates and collateral, as those

prevailing at the same time for comparable transactions with persons of similar creditworthiness that were not affiliated with the Company, and did not present any undue risk of collectability.

The following is a summary of loan transactions with the Board of Directors of the Company and certain of their associated businesses:

	Years Ended December 31,	
	2014	2013
	(Dollars in thousands)	
Beginning balance.....	\$ 5,040	\$ 5,234
Undisbursed commitments	-	154
New loans granted	481	376
Principal repayments	(1,646)	(724)
Ending balance of term loans.....	\$ 3,875	\$ 5,040
Year-end balance of revolving accounts.....	2,861	5,751
Total term loans and revolving accounts	<u>\$ 6,736</u>	<u>\$ 10,791</u>

Deposits by Board of Directors members and executive officers held by the Bank were \$6.5 million and \$6.9 million at December 31, 2014 and 2013, respectively.

Note 13 – Income Taxes

The Bank files income tax returns in Guam, the CNMI and the State of California. The Bank is no longer subject to U.S. federal, state and local, or non-U.S. income tax examinations by tax authorities for years before 2008.

The income tax provision includes the following components:

	For the Years		
	2014	2013	2012
Government of Guam tax expense (benefit):			
Current	\$ 2,767	\$ 3,995	\$ 3,728
Deferred	(416)	(232)	(644)
Foreign income taxes (including U.S. income taxes)	1,405	317	340
Total income tax expense.....	<u>\$ 3,756</u>	<u>\$ 4,080</u>	<u>\$ 3,424</u>

The reasons for the differences between the statutory federal income tax rate and the effective tax rates are summarized as follows:

	2014	2013	2012
Statutory Guam income tax rate	34.00%	34.00%	34.00%
Permanent differences	-6.80%	-5.50%	-6.80%
Other	1.00%	0.80%	1.10%
Total income tax expense.....	<u>28.20%</u>	<u>29.30%</u>	<u>28.30%</u>

The difference between effective income tax expense and income tax expense computed at the Guam statutory rate was due to nontaxable interest income earned on loans to the Government of Guam for each of the years ended December 31, 2014, 2013 and 2012.

The components of deferred income taxes are as follows:

	<u>2014</u>	<u>2013</u>	<u>2012</u>
Deferred loan origination fees	\$ (50)	\$ (115)	\$ (148)
Mortgage servicing rights	18	24	89
Loan loss provision.....	(155)	53	(388)
Deferred rent obligation.....	(21)	(22)	(24)
Other real estate owned valuation.....	-	50	(24)
Fixed assets.....	22	22	23
FAS 123R.....	(10)	(7)	(4)
SERP	(220)	(237)	(168)
Net operating loss	(304)	(430)	(408)
Change in valuation allowance.....	304	430	408
Deferred tax (benefit) provision.....	<u>\$ (416)</u>	<u>\$ (232)</u>	<u>\$ (644)</u>

The components of the net deferred tax asset are as follows:

	<u>2014</u>	<u>2013</u>
Deferred tax asset:		
Allowance for loan losses.....	\$ 4,318	\$ 4,164
Net operating loss.....	2,279	1,974
Loan origination fees.....	815	765
FAS 123R.....	423	412
Net unrealized loss on securities held-to-maturity ...	28	86
Net unrealized gain on securities available-for-sale	335	786
Deferred rent obligation	283	262
Accruals not currently deductible.....	735	512
Total deferred tax asset	<u>9,216</u>	<u>8,961</u>
Deferred tax liability:		
Fixed assets	(941)	(917)
Mortgage servicing rights.....	(485)	(467)
Total deferred tax liability.....	<u>(1,426)</u>	<u>(1,384)</u>
Valuation allowance	(2,279)	(1,974)
Net deferred tax asset	<u>\$ 5,511</u>	<u>\$ 5,603</u>

A valuation allowance of \$2.3 million has been provided at December 31, 2014, to reduce the deferred tax asset because, in management’s opinion, it is more likely than not that less than the entire amount will be realized.

We record as a “deferred tax asset” on our balance sheet an amount equal to the tax credit and tax loss carry-forwards and tax deductions (“tax benefits”) that we believe will be available to us to offset or reduce the amounts of our income taxes in future periods. Under applicable federal and state income tax laws and regulations, such tax benefits will expire if not used within specified periods of time. Accordingly, the ability to fully use our deferred tax asset depends on the amount of taxable income that we generate during those time periods. At least once each year, or more frequently, if warranted, we make estimates of future taxable income that we believe we are likely to generate during those future periods. If we conclude, on the basis of those estimates and the amount of the tax benefits available to us, that it is more likely than not that we will be able to fully utilize those tax benefits prior to their expiration, we recognize the deferred tax asset in full on our balance sheet. On the other hand, if we conclude on the basis of those estimates and the amount of the tax benefits available to us that it has become more likely than not that we will be unable to utilize those tax benefits in full prior to their expiration, then we would establish (or increase any existing) valuation allowance to reduce the deferred tax asset on our balance sheet to the amount which we believe we are more likely than not to be able to utilize. Such a reduction is implemented by recognizing a non-cash charge that would have the effect of increasing the provision, or reducing any credit, for income taxes that we would otherwise have recorded in our statements of operations. The determination of whether and the extent to which we will be able to utilize our deferred tax asset involves significant management judgments and assumptions that are subject to period-to-period changes as a result of changes in tax laws, changes in the market, or economic conditions that could affect our operating results or variances between our actual operating results and our projected operating results, as well as other factors.

Note 14 – Employee Benefit Plans

Stock Purchase Plan

The Bank's 2011 Employee Stock Purchase Plan (the "2011 Plan") was adopted by the Bank's Board of Directors and approved by the Bank's Stockholders on May 2, 2011. This plan was subsequently adopted by the Company after the Reorganization. The 2011 Plan is open to all employees of the Company and the Bank who have met certain eligibility requirements.

Under the 2011 Plan, as amended and restated as of July 1, 2012, eligible employees can purchase, through payroll deductions, shares of common stock at a discount. The right to purchase stocks is granted to eligible employees during a period of time that is established from time to time by the Board of Directors of the Company. Eligible employees cannot accrue the right to purchase more than \$25 thousand worth of stock at the fair market value at the beginning of each offer period. Eligible employees also may not purchase more than one thousand five hundred (1,500) shares of stock in any one offer period. The shares are purchased at 85% of the fair market price of the stock on the enrollment date. The Bank recognized \$30 thousand in compensation expense at December 31, 2014 and \$21 thousand at December 31, 2013.

Executive Employment Agreements

The President and the Executive Vice President are employed under separate agreements terminating December 31, 2017, and May 31, 2018, respectively. Under the agreements, the President and the Executive Vice President receive specified base salaries, which are adjusted annually for changes in the U.S. Consumer Price Index, plus an incentive bonus. The President's and the Executive Vice President's bonuses are based on profitability, also within a defined limit, subject to adjustments based on the Bank meeting certain performance criteria.

Under a Phantom Stock unit and stock option plan, the President and Executive Vice President may elect to receive up to \$100 thousand each in Phantom Stock units in lieu of an equal amount of incentive bonus, as computed in their employment agreements. These non-voting Phantom Stock units may be held for receipt of dividends equal to the dividend rate of the Bank's common stock, or may be redeemed at a price equal to the market value of the Bank's common stock. In addition, for each Phantom Stock unit received, the executive employee receives options to purchase three shares of the Bank's common stock at a price equal to the market value of the stock at the date the options are granted. The redemption of the Phantom Stock or the exercise of the options will result in the forfeiture by the executive employee of any rights under the other. At December 31, 2014 and 2013, there were no Phantom Stock units outstanding under the plan, nor have such units ever been issued as of December 31, 2014.

Senior Vice Presidents' Employment Agreements

Two Senior Vice Presidents entered into separate five-year employment agreements on April 25, 2011. Under the agreements, they receive specified base salaries and they may receive bonuses, within a defined limit, based on the Bank's profitability, adjusted by certain Bank performance criteria. One of those contracts is no longer in effect.

On January 1, 2012, seven Senior Vice Presidents entered into separate five-year employment agreements terminating on December 31, 2016. Under the agreements, they receive specified base salaries and they may receive bonuses, within a defined limit, based on the Bank's profitability, adjusted by certain Bank performance criteria.

One Senior Vice President entered into an employment agreement commencing on August 9, 2013, and terminating on December 31, 2016. Under this agreement, there is a specified base salary and there may be bonuses, within a defined limit, based on the Bank's profitability, as adjusted by certain Bank performance criteria.

Employee Retirement Savings Plan

The Bank has a 401(k) Plan whereby substantially all employees, with at least one year of continuous service, are eligible to participate in the Plan. Effective March 1, 2008, the Bank makes matching contributions equal to 100% of an employee's deferrals, up to 1% of the employee's compensation, plus 50% of the employee's deferrals that exceed 1% but are less than 6% of the employee's compensation. Previously, matching contributions vested to the employee over a five-year period of service. Effective March 1, 2008, matching contributions become 100% vested to the employee after two years of service. For the years ended December 31, 2014, 2013 and 2012, the expense attributable to the Plan was \$489, \$464 and \$440, respectively.

Supplemental Executive Retirement Plan ("SERP")

In April 2011, the Bank established an unfunded Supplemental Executive Retirement Plan (the "SERP") for its Executive Officers and Senior Vice Presidents. The SERP provides that, subject to meeting certain vesting requirements described below, they will become

entitled to receive 12 equal successive monthly retirement payments totaling \$50,000 per annum for Senior Vice Presidents, \$100,000 for the Executive Vice President, and \$150,000 for the President and CEO for the 15 years immediately following the date of their retirement or other termination of their employment. Their monthly retirement payments are not tied to service with the Bank.

The Company follows FASB ASC 715-30-35, which requires us to recognize in our balance sheet the funded status of any post-retirement plans that we maintain, and to recognize, in other comprehensive income, changes in funded status of any such plans in any year in which changes occur.

The changes in the projected benefit obligation of other benefits under the Plan during 2013 and 2014, its funded status at December 31, 2013 and 2014, and the amounts recognized in the balance sheet at December 31, 2013 and 2014, were as follows:

	At December 31,	
	2014	2013
Change in benefit obligation:		
Benefit obligation at beginning of period.....	\$ 1,468	\$ 792
Service cost	565	642
Interest cost	64	34
Participant contributions.....	-	-
Plan amendments.....	-	-
Combination/divestiture/curtailment/settlement/termination..	-	-
Actuarial loss/(gain)	-	-
(Benefits paid)	-	-
Benefit obligation at end of period.....	<u>\$ 2,097</u>	<u>\$ 1,468</u>
Funded status:		
Amounts recognized in the Statement of Financial Condition		
Unfunded accrued SERP liability—current.....	\$ 2,097	\$ 1,468
Unfunded accrued SERP liability—noncurrent.....	-	-

Amortization of net actuarial loss/(gain)	-	-
Total recognized year to date in other comprehensive income.....	<u>\$ -</u>	<u>\$ -</u>
Assumptions as of December 31,:		
Assumed discount rate.....	4.33%	4.33%
Rate of compensation increase	0.00%	0.00%

As of December 31, 2014, \$0 benefits are expected to be paid in the next six years and a total of \$521 thousand of benefits are expected to be paid in year 2021. \$0 is expected to be recognized in net periodic benefit cost in 2015.

Note 15 – Earnings Per Common Share

Basic earnings per share represent income available to common stockholders divided by the weighted-average number of common shares outstanding during the period. Diluted earnings per share reflect additional common shares that would have been outstanding if dilutive potential common shares had been issued, as well as any adjustment to income that would result from the assumed issuance. Potential common shares that may be issued by the Bank relate solely to shares for which employees' funds have been collected but not issued under the Employee Stock Purchase Plan for 2013 and 2014, and are determined using the treasury stock method.

Earnings per common share have been computed based on reported net income and the following share data:

	Years Ended December 31,		
	2014	2013	2012
Net income available for common stockholders.....	\$ 9,560	\$ 9,868	\$ 8,620
Weighted average number of common shares outstanding	8,818	8,790	8,779
Effect of dilutive options	-	-	1
Weighted average number of common shares outstanding - used to calculate diluted earnings per common share	<u>\$ 8,818</u>	<u>\$ 8,790</u>	<u>\$ 8,780</u>
Income per common share:			
Basic	<u>\$ 1.08</u>	<u>\$ 1.12</u>	<u>\$ 0.98</u>
Diluted	<u>\$ 1.08</u>	<u>\$ 1.12</u>	<u>\$ 0.98</u>

Note 16 – Commitments and Contingencies

The Bank is a party to credit-related financial instruments with off-balance-sheet risk, in the normal course of business, to meet the financing needs of its customers. These financial instruments include commitments to extend credit, standby letters of credit and commercial letters of credit. Such commitments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount reflected in the consolidated financial statements.

The Bank's exposure to credit loss, in the event of nonperformance by the other parties to financial instruments for loan commitments and letters of credit, is represented by the contractual amount of these instruments. The Bank follows the same credit policies in making commitments and conditional obligations as it does for on-balance sheet instruments.

A summary of financial instruments with off-balance-sheet risk at December 31, 2014 and 2013 is as follows:

	December 31,	
	2014	2013
Commitments to extend credit	<u>\$ 134,525</u>	<u>\$ 121,618</u>
Letters of credit:		
Standby letters of credit	\$ 48,451	\$ 47,543
Other letters of credit	2,684	2,582
Total	<u>\$ 51,135</u>	<u>\$ 50,125</u>

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require the payment of a fee. The commitments for certain lines of credit may expire without being drawn upon. Therefore, the total commitment amounts do not necessarily represent future cash requirements. The Bank evaluates each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained, if it is deemed necessary by the Bank upon extension of credit, is based on management's credit evaluation of the customer.

Commercial and standby letters of credit are conditional commitments issued by the Bank to guarantee the performance of a customer to a third party or the shipment of merchandise from a third party. Those letters of credit are primarily issued to support government and private borrowing arrangements. Essentially all letters of credit issued have expiration dates within one year. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The Bank generally holds collateral supporting these commitments.

The Bank considers its standby letters of credit to be guarantees. At December 31, 2014, the maximum undiscounted future payments that the Bank could be required to make was \$48.5 million. All of these arrangements mature within one year. The Bank generally has

recourse to recover from the customer any amounts paid under these guarantees. Most of the guarantees are fully collateralized; however, some are unsecured. The Bank had not recorded any liabilities associated with these guarantees at December 31, 2014.

Mortgage loans serviced for others are not included in the accompanying consolidated statements of condition. The unpaid principal balances of mortgage loans serviced for others were \$213.8 million and \$208.6 million at December 31, 2014 and 2013, respectively. On December 31, 2014 and 2013, the Bank recorded mortgage servicing rights at their fair value of \$1.4 million and \$1.4 million, respectively.

The Bank utilizes facilities, equipment and land under various operating leases with terms ranging from 1 to 99 years. Some of these leases include scheduled rent increases. The total amount of the rent is being debited to expense under the straight-line method over the lease terms, in accordance with ASC Topic 840, "Leases". The Bank has recorded a deferred obligation of \$820 thousand and \$760 thousand as of December 31, 2014 and 2013, respectively, which has been included within other liabilities, to reflect the excess of rent expense over cash paid on the leases.

At December 31, 2014, annual lease commitments under the above noncancelable operating leases were as follows:

Years ending December 31,	
2015	\$ 1,411
2016	1,203
2017	977
2018	762
2019 and Thereafter	17,783
Total	<u>\$ 22,136</u>

The Bank leases certain facilities from two separate entities in which two of its directors have separate ownership interests. Lease payments made to these entities during the years ended December 31, 2014, 2013 and 2012 approximated \$370 thousand, \$370 thousand and \$358 thousand, respectively.

Additionally, the Bank leases office space to third parties, with original lease terms ranging from 3 to 5 years with option periods ranging up to 15 years. At December 31, 2014, minimum future rents to be received under noncancelable operating sublease agreements were \$40 thousand, \$27 thousand, \$0 thousand and \$0 thousand for the years ending December 31, 2015, 2016, 2017 and 2018, respectively.

A summary of rental activities for years ended December 31, 2014, 2013 and 2012, is as follows:

	<u>2014</u>	<u>2013</u>	<u>2012</u>
Rent expense.....	\$ 2,472	\$ 2,343	\$ 2,293
Less: sublease rentals.....	273	268	257
Net rent expense.....	<u>\$ 2,199</u>	<u>\$ 2,075</u>	<u>\$ 2,036</u>

Legal Contingencies

The Bank is involved in certain legal actions and claims that arise in the ordinary course of business. Management believes that, as a result of its legal defenses and insurance arrangements, none of these matters are expected to have a material adverse effect on the Bank's financial position, results of operations or cash flows.

Note 17 – Minimum Regulatory Capital Requirements

The Bank is subject to various regulatory capital requirements administered by the United States federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Bank's consolidated financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Bank must meet specific capital guidelines that involve quantitative measures of their assets, liabilities and certain off-balance-sheet items, as calculated under regulatory accounting practices.

Quantitative measures established by regulation to ensure capital adequacy require the Bank to maintain minimum amounts and ratios (set forth in the following table) of total and Tier 1 capital (as defined in the regulations) to risk-weighted assets (as defined) and of Tier 1 capital (as defined) to average assets (as defined). As of December 31, 2014 and 2013, the Bank met all capital adequacy requirements to which it is subject.

As of December 31, 2014, the most recent notification from the Federal Deposit Insurance Corporation categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, an institution must maintain minimum total risk-based, Tier 1 risk-based and Tier 1 leverage ratios as set forth in the following tables.

There are no conditions or events since the notification that management believes have changed the Bank's category. The Bank's actual capital amounts and ratios as of December 31, 2014 and 2013 are also presented in the table.

	<i>Actual</i>		For Capital Adequacy Purposes		To Be Well Capitalized Under Prompt Corrective Action Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
At December 31, 2014:						
Total capital (to Risk Weighted Assets).....	\$ 114,606	11.83%	\$ 77,504	8.00%	\$ 96,881	10.00%
Tier 1 capital (to Risk Weighted Assets).....	\$ 102,486	10.58%	\$ 38,752	4.00%	\$ 58,128	6.00%
Tier 1 capital (to Average Assets)	\$ 102,486	7.01%	\$ 58,520	4.00%	\$ 73,150	5.00%
At December 31, 2013:						
Total capital (to Risk Weighted Assets).....	\$ 108,238	12.53%	\$ 69,114	8.00%	\$ 86,392	10.00%
Tier 1 capital (to Risk Weighted Assets).....	\$ 97,563	11.43%	\$ 34,130	4.00%	\$ 51,195	6.00%
Tier 1 capital (to Average Assets)	\$ 97,563	7.60%	\$ 51,320	4.00%	\$ 64,151	5.00%

In early July 2013, the Federal Reserve Board and the FDIC issued final rules implementing the Basel III regulatory framework and related Dodd-Frank Wall Street Reform and Consumer Protection Act changes. The rules revise minimum capital requirements and adjust prompt corrective action thresholds. The final rules revise the regulatory capital elements, add a new common equity Tier 1 capital ratio, increase the minimum Tier 1 capital ratio requirement, and implement a new capital conservation buffer. The rules also permit certain banking organizations to retain, through a one-time election, the existing treatment for accumulated other comprehensive income. The final rules took effect for community banks on January 1, 2015, subject to a transition period for certain parts of the rules. Management believes the Company and the Bank will remain well-capitalized under the new rules.

Note 19 – Fair Value of Assets and Liabilities

The Bank uses fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. In accordance with ASC Topic 820, “*Fair Value Measurements and Disclosures*”, the fair value of a financial instrument is the price that would be received in selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value is best determined based upon quoted market prices. However, in many instances, there are no quoted market prices for the Bank’s various financial instruments. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. Accordingly, the fair value estimates may not be realized in an immediate settlement of the instrument. The fair value guidance provides a consistent definition of fair value, which focuses on exit price in an orderly transaction (that is, not a forced liquidation or distressed sale) between market participants at the measurement date under current market conditions. If there has been a significant decrease in the volume and level of activity for the asset or liability, a change in valuation technique or the use of multiple valuation techniques may be appropriate. In such instances, determining the price at which willing market participants would transact at the measurement date under current market conditions depends on the facts and circumstances and requires the use of significant judgment. The fair value is a reasonable point within the range that is most representative of fair value under current market conditions.

Fair Value Hierarchy

In accordance with this guidance, the Bank groups its financial assets and financial liabilities, generally measured at fair value, in three levels, based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value.

- Level 1: Valuation is based on quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date. Level 1 assets and liabilities generally include debt and equity securities that are traded in an active exchange market, as well as certain U.S. Treasury securities that are highly liquid and are actively traded in over-the-counter markets. Valuations are obtained from readily available pricing sources for market transactions involving identical assets or liabilities.
- Level 2: Valuation is based on inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. The valuation may be based on quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the asset or liability, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.
- Level 3: Valuation is based on unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets and liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which determination of fair value requires significant management judgment or estimation.

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

Financial assets measured at fair value on a recurring basis as of December 31, 2014 and 2013, are as follows:

	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
At December 31, 2014.....				
U.S. treasury notes and bonds.....	\$ 55,512	\$ -	\$ -	\$ 55,512
U.S. government agency and sponsored enterprise (GSE) debt securities.....	-	45,053	-	45,053
U.S. government agency pool securities.....	-	49,871	-	49,871
U.S. government agency or GSE.....	-	80,121	-	80,121
Other assets:				
MSRs.....	-	-	1,405	1,405
Total assets.....	<u>\$ 55,512</u>	<u>\$ 175,045</u>	<u>\$ 1,405</u>	<u>\$ 231,962</u>
At December 31, 2013.....				
U.S. government agency and sponsored enterprise (GSE) debt securities.....	\$ -	\$ -	\$ -	\$ -
U.S. government agency pool securities.....	-	54,292	-	54,292
U.S. government agency or GSE.....	-	128,540	-	128,540
Other assets:				
MSRs.....	-	-	1,354	1,354
Total assets.....	<u>\$ -</u>	<u>\$ 182,832</u>	<u>\$ 1,354</u>	<u>\$ 184,186</u>

There were no liabilities measured at fair value on a recurring basis as of December 31, 2014 and 2013.

During the periods ended December 31, 2014, 2013 and 2012, the changes in Level 3 assets (consisting solely of MSRs) measured at fair value on a recurring basis are as follows:

	December 31,		
	2014	2013	2012
Beginning balance	\$ 1,354	\$ 1,285	\$ 1,028
Realized and unrealized net gains:			
Included in net income.....	51	69	257
Included in other comprehensive income	-	-	-
Purchases, sales and issuances			
Purchases	(22,834)	(31,546)	(31,391)
Sales.....	22,834	31,546	31,391
Issuances.....	-	-	-
Ending balance	<u>\$ 1,405</u>	<u>\$ 1,354</u>	<u>\$ 1,285</u>

There were no transfers in or out of the Bank's Level 3 financial assets for the periods ended December 31, 2014, 2013 and 2012.

The valuation techniques for assets measured at fair value on a recurring basis are as follows:

Investment Securities

When quoted prices are available in an active market, the Bank classifies the securities within Level 1 of the valuation hierarchy. Level 1 securities include highly liquid U.S. Government debt and equity securities.

If quoted market prices are not available, the Bank estimates fair values using pricing models and discounted cash flows that consider standard input factors such as observable market data, benchmark yields, interest rate volatilities, broker/dealer quotes, and credit spreads. Examples of such instruments, which would generally be classified within Level 2 of the valuation hierarchy, include GSE obligations, corporate bonds, and other securities. Mortgage-backed securities are included in Level 2 if observable inputs are available. In certain cases where there is limited activity or less transparency around inputs to the valuation, the Bank would classify those securities in Level 3. At December 31, 2014 and 2013, the Bank did not have any Level 3 securities.

Mortgage Servicing Rights

The fair value measurement of mortgage servicing rights is based upon quoted prices, if available. If quoted prices are not available, fair values are measured using independent pricing models or other model-based valuation techniques that incorporate assumptions that market participants would use in estimating the fair value of servicing rights. The most important of these assumptions is the interest rate used in discounting the future cash flows into their present value. Other assumptions might include estimates of prepayment speeds, costs to service, escrow account earnings, contractual servicing fee income, prepayment and late fees, among other considerations. The Bank's mortgage servicing rights are considered a Level 3 measurement at December 31, 2014 and 2013.

Assets Measured at Fair Value on a Nonrecurring Basis

Under certain circumstances the Bank makes adjustments to fair value for assets and liabilities even though they are not measured at fair value on an ongoing basis. The following table presents the financial instruments carried on the consolidated statements of condition by caption and by level in the fair value hierarchy at December 31, 2014 and 2013, for which a nonrecurring change in fair value has been recorded:

	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
December 31, 2014				
Financial assets:				
Loans, net				
Impaired loans	\$ -	\$ -	\$ 140	\$ 140
Other assets				
Other real estate owned	\$ -	\$ -	\$ 4,454	\$ 4,454
December 31, 2013				
Financial assets:				
Loans, net				
Impaired loans	\$ -	\$ -	\$ 364	\$ 364
Other assets				
Other real estate owned	\$ -	\$ -	\$ 4,610	\$ 4,610

During the year 2014, four loans were identified as being collateral deficient from their carrying value of \$928 thousand. The loans were written down by \$57 thousand to their new appraised value of \$871 thousand. The fair value of loans subject to write downs are estimated using the appraised value of the underlying collateral, discounted as necessary due to management's estimates of changes in economic conditions, less the estimated costs of selling the assets.

Additionally, the Bank may make fair value adjustments to nonfinancial assets and liabilities in certain circumstances (such as impairments) though such nonfinancial assets and liabilities are not measured at fair value on recurring basis. The Bank does not have nonfinancial assets or liabilities for which a nonrecurring fair value measurement was required during the periods ended December 31, 2014 and 2013.

Fair Value of Other Financial Instruments

The estimated fair values of the Bank's other financial instruments, excluding those assets recorded at fair value on a recurring basis on the Bank's consolidated statements of condition, are as follows:

	Carrying Amount	Estimated fair value		
		Level 1	Level 2	Level 3
(Dollar in thousand)				
December 31, 2014				
Financial assets:				
Cash and cash equivalents	\$ 105,908	\$ 105,908	\$ -	\$ -
Restricted cash	400	400	-	-
Investment securities held-to-maturity	105,280	-	107,008	-
Loans	967,393	-	-	964,171
Total	<u>\$ 1,178,981</u>	<u>\$ 106,308</u>	<u>\$ 107,008</u>	<u>\$ 964,171</u>
Financial liabilities:				
Deposits	\$ 1,355,514	\$ -	\$ -	\$ 1,346,624
Total	<u>\$ 1,355,514</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 1,346,624</u>
December 31, 2013				
Financial assets:				
Cash and cash equivalents	\$ 96,583	\$ 96,583	\$ -	\$ -
Restricted cash	400	400	-	-
Investment securities held-to-maturity	88,989	-	88,820	-
Loans	860,883	-	-	859,808
Total	<u>\$ 1,046,855</u>	<u>\$ 96,983</u>	<u>\$ 88,820</u>	<u>\$ 859,808</u>
Financial liabilities:				
Deposits	\$ 1,183,445	\$ -	\$ -	\$ 1,185,531
Total	<u>\$ 1,183,445</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 1,185,531</u>

The following methods were used by the Company in estimating fair value for its financial instruments not previously disclosed:

Cash and Cash Equivalents

The carrying amount of cash and short-term instruments approximates fair value based on the short-term nature of the assets.

Interest-Bearing Deposits in Banks

Fair values for other interest-bearing deposits are estimated using discounted cash flow analyses based on current rates for similar types of deposits.

Loans

For variable-rate loans that re-price frequently and with no significant change in credit risk, fair values are based on carrying values. Fair values for other loans are estimated using discounted cash flow analyses, using interest rates currently being offered for loans with similar terms to borrowers of similar credit quality. Fair values for nonperforming loans are estimated using discounted cash flow analyses or underlying collateral values, where applicable.

Deposit Liabilities

The fair values disclosed for demand deposits (for example, interest and non-interest checking, passbook savings and certain types of money market accounts) are, by definition, equal to the amount payable on demand at the reporting date (that is, their carrying amounts). Fair values for fixed-rate certificates of deposit are estimated using a discounted cash flow calculation that applies market interest rates currently on comparable instruments to a schedule of aggregated expected monthly maturities on time deposits.

Short-Term Borrowings

The carrying amounts of Federal Funds purchased and FHLB advances maturing within ninety days approximate their fair values.

Long-Term Borrowings

Fair value of FHLB advances maturing after ninety days is determined based on expected present value techniques based on current market rates for advances with similar terms and remaining maturities.

Accrued Interest

The carrying amount of accrued interest approximates fair value due to its short term nature.

CONSENT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

We consent to the incorporation by reference in the Registration Statement of BankGuam Holding Company (the “Company”) on Form S-8 (File No. 333-182615, effective July 11, 2012) of our report dated March 17, 2015 with respect to the consolidated financial statements as of December 31, 2014 and 2013 and for the three years ended December 31, 2014 of the Company appearing in this Annual Report on Form 10-K.

CERTIFICATION PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Lourdes A. Leon Guerrero, certify that:

1. I have reviewed this Annual Report on 10-K of BankGuam Holding Company;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
